Secret Life Of Buildings:

The Secret Lives of Buildings Edward Hollis, 2009-11-10 A strikingly original beautifully narrated history of Western architecture and the cultural transformations that it represents Concrete marble steel brick little else made by human hands seems as stable as immutable as a building Yet the life of any structure is neither fixed nor timeless Outliving their original contexts and purposes buildings are forced to adapt to each succeeding age To survive they must become shape shifters In an inspired refashioning of architectural history Edward Hollis recounts more than a dozen stories of such metamorphosis highlighting the way in which even the most familiar structures all change over time into something rich and strange The Parthenon that epitome of a ruined temple was for centuries a working church and then a mosque the cathedral of Notre Dame was restored to a design that none of its original makers would have recognized Remains of the Berlin Wall meanwhile which was once gleefully smashed and bulldozed are now treated as precious relics With *The Secret Lives of Buildings* Edward Hollis recounts the most enthralling of these metamorphoses and shows how buildings have come to embody the history of Western culture Hollis exposes the surprisingly motley histories of some of the world's great landmarks The chapter on the Parthenon actually brought me to tears Jenna Russell *The Boston Globe* What a happy tingle of discovery to come across a book that differs sharply from all the others in its field Hollis thinks with such originality and writes with such flair that he is a pleasure to read Stanley Abercrombie *The American Scholar* *The Secret Life of Buildings* Gavin Macrae-Gibson, 1988 *The Secret Lives of Buildings* Edward Hollis, 2009-09 A building is a capricious thing it is inhabited and changed and its existence is a tale of constant and curious transformation This title tells the stories of thirteen buildings beginning with the once upon a time when they first appeared through the years of appropriation ruin and renovation and ending with a temporary ever after **The Secret Life of Buildings**, 2018 CENTER 21 *The Secret Life of Buildings* employs the nascent philosophies of speculative realism and object oriented ontology to illuminate architecture as a peculiar set of objects phenomena relations materials and operations Object oriented ontology OOO is a philosophy that considers all objects virtual or physical large or small singular or plural closed or open to be on equal ontological footing Although it doesn't exclude humans it treats them as just another set of objects This volume explores OOO's significance to architecture and possibly vice versa Publisher's description **The Secret Life of Buildings** Philadelphia Museum of Art, 2005 **Seeing the light** The Open University, This 10 hour free course explored the various effects of the sun on ourselves and our homes and how house design differs accordingly with the climate **Secret life of buildings; an American mythology for modern architecture** G. MACRAE-GIBSON, 1985 *The Secret Life of Buildings* Macrae, **Obsolescence** Daniel M. Abramson, 2016-02-12 In our architectural pursuits we often seem to be in search of something newer grander or more efficient and this phenomenon is not novel In the spring of 1910 hundreds of workers labored day and night to demolish the Gillender Building in New York once the loftiest office tower in the world in order to make way for a taller skyscraper The

New York Times puzzled over those who would sacrifice the thirteen year old structure as ruthlessly as though it were some ancient shack In New York alone the Gillender joined the original Grand Central Terminal the Plaza Hotel the Western Union Building and the Tower Building on the list of just one generation s razed metropolitan monuments In the innovative and wide ranging *Obsolescence* Daniel M Abramson investigates this notion of architectural expendability and the logic by which buildings lose their value and utility The idea that the new necessarily outperforms and makes superfluous the old Abramson argues helps people come to terms with modernity and capitalism s fast paced change *Obsolescence* then gives an unsettling experience purpose and meaning Belief in obsolescence as Abramson shows also profoundly affects architectural design In the 1960s many architects worldwide accepted the inevitability of obsolescence experimenting with flexible modular designs from open plan schools offices labs and museums to vast megastructural frames and indeterminate building complexes Some architects went so far as to embrace obsolescence s liberating promise to cast aside convention and habit envisioning expendable short life buildings that embodied human choice and freedom Others we learn were horrified by the implications of this ephemerality and waste and their resistance eventually set the stage for our turn to sustainability the conservation rather than disposal of resources Abramson s fascinating tour of our idea of obsolescence culminates in an assessment of recent manifestations of sustainability from adaptive reuse and historic preservation to postmodernism and green design which all struggle to comprehend and manage the changes that challenge us on all sides

YOU-TOPIA Erik Veldhoen, 2013 You Topia You topia is about people and about organisations It's about the future of our society You topia is not a utopia but is based largely on experience and evidence You topia is also a work of philosophy based on logical reasoning that is grounded in experience and evidence You topia is a call to action How can we become our own leaders in this promising seductive world You topia is above all else about the journey that we must make to regain the balance between desire and discipline It is a world in which people and organisations perform better and are therefore happier and more successful Let the journey to You topia begin There's no excuse to put it off any longer It will be worth your while Welcome to the new world You topia Your ideal space Because it's all about the choices that you make The moments you choose to do everyday things The places you choose to do your work The people you choose to meet The relevant discipline you choose to exercise The relevant energy you choose to spend The inspiration that you seek to achieve a satisfactory

balance in your life This ideal place isn't yours alone however We share the place in order to do our everyday things You can choose time and again but your choices must always fit smoothly into the larger organisation to which you belong and into the turbulent society around you Ultimately everyone has to see to their own needs Everyone has to develop the discipline required to meet the obligations that they take upon themselves the obligations they have towards themselves and towards their environment The choices we make in that respect will ultimately change the way we look at life And that might mean anything from orderly regularity to total chaos from an anarchical free state to a safe haven and from steady as a rock to Bacchanalian licentiousness We have to internalise the freedom we are given We have to combine the playing field and the rules of the game into a single formula and give them meaning If we do that respectfully and consciously then all will be well Ever since Frederick Taylor introduced his Principles of Scientific Management our work and our lives have been in the clutches of management You topia shows that severely curtailing our desire to manage everything will improve our lives Every individual can harness his or her own energy and master his or her productivity All organisations need do is facilitate this as best they can Not only is that possible but it is also going to happen because You topia is technology driven Without digitisation we would not have access to information any time anywhere Without the virtual workspace we would not be able to work whenever and wherever it suits us Modern technology has weaned us off desks and offices and rigid timetables It has forced us to reconsider time and place And time and place must be given new meaning in a future that will be entirely different from our post industrial era You topia channels this innovation in a particular direction by looking holistically at our new physical virtual and mental reality In You topia less really is more *The Secret Life of Buildings* ,2014 Italy's Renaissance in Buildings and Gardens Frederick Kiefer,2024-10-08 Palaces villas and churches These were the highlights of my first visit to Italy I took a lot of photos and looked forward to sharing them with friends and family Back home though I found that I didn't recall much about the places that impressed me Although I had the benefit of a half day guide in Rome Florence and Venice I sometimes had difficulty hearing what was said on crowded streets and busy interiors The guides were capable but had only enough time to mention a few major features As a rule they skimmed on actually describing buildings that intrigued me And so they were not especially helpful in providing the insights I wanted Upon my return I found myself wondering Where did the architects actually find their ideas What did they want to accomplish And what do their choices tell us about their time My sojourn in Italy would have been more satisfying if I had come away with a fuller account of what I had seen What I most needed was context This book supplies that context Contemplation of antiquity and the exchange of views among architects released a surge of intellectual energy not seen for a millennium a development that would never have happened so quickly were it not for Johannes Gutenberg's invention of printing with movable type This development in turn led to architects heightened self awareness of their collective enterprise They read what their fellow architects wrote and thereby gained in sophistication They were no longer merely masons They became architects in the modern sense They

took pride in their achievements and shared a conviction that the visual culture they created was far superior to that of the previous thousand years. Their embrace of classical civilisation had a visceral urgency. Rome after all was a culture with a storied past peopled by larger than life figures. To learn what the ancients had created in word or stone could supply a shortcut to wisdom. And emulating the Romans would provide new models of aesthetic excellence. This endeavour became known as the Renaissance or rebirth. The Reformation however changed everything. Martin Luther brought to issue a quandary. How exactly was Christianity to be reconciled with the pagan past if at all. Could one source of inspiration be sustained without compromising the other. Religious reform questioned the aesthetic achievements of the previous hundred years. The story of Renaissance architecture represents the effort to find an accommodation. The States of 'theory' David Carroll, 1990. This book constitutes a critical investigation and rethinking of the grounds and possibilities of theory and the place and critical function theory can serve within various disciplines notably history and aesthetics.
