Hanif Al Hakim, Sigit Arif Bowo, 2023-02-10 This is an open access book Wael B Hallaq a renowned sharia scholar has called sharia an episteme that suffered a structural death following the dawn of modernity in the nineteenth and early twentieth centuries Hallaq 2009 15 16 Yet its resurgent is remarkable across a number of jurisdictional fault lines from Muslim majority nations in Middle East and Southeast Asia to Muslim minority societies in Western Europe and North America Across these jurisdictions the relationship between sharia and state law is central It includes sharia state encounters notably in the form of state Islamic law in the field of family law which is often asserted as the core or last stronghold of sharia Moors 2003 2 Coulson 1969 115 6 and other substantive areas of law such as Islamic economics and Islamic philanthropy and also jinayah Islamic penal law Regardless of their differences in their own specific context these areas somehow manage to secure an importance place in the modern days It involves different loci of authority to interpret legislate and enforce sharia or parts of it that not only flourish but also being challenged around the Muslim world Equally important are implications of the increasingly unsettled authority of apparently agreed upon substance of sharia To contribute on these issues we would like to invite scholars from diverse discipline including law anthropology and Islamic studies working in both Muslim majority and Muslim minority contexts to present their works in our International Seminar on Sharia Law and Muslim Society ISSLaMS

Handbook of Globalization, Governance, and Public Administration Ali Farazmand, Jack Pinkowski, 2006-07-25

Globalization transcends borders and cultures as it develops both from the natural flow of information and communication technologies and as a directed and driven quest for global hegemony by self serving corporations and world political heavyweights It bears a multifaceted web of influence that manifests in inequalities in growth prosperity and **The Public Economy in Crisis** June A. Sekera, 2016-07-04 This Brief proposes a new theory of public economics which deemphasizes reliance on the free market and affirms the importance of public goods and services within the context of the democratic process and constitutional governance Public non market production makes up from a quarter to more than half of all economic activity in advanced democratic nation states Yet by imposing market precepts on the public domain as mainstream economics political science and public administration do public governing capacity is weakened and the democratic system suffers Agencies originally created to meet public needs are being warped into entities whose purpose is to generate revenue and in some cases deliver private profits at public expense Drawing on classic public finance literature this book illustrates the differences between public economy and the market model and why those differences matter Building on this the Brief sketches the elements of a new theory of the public non market and illuminates its connections to the delegation of power and collective provision of resources from the polity This book will be useful to scholars of public economics political science and public administration as well as policy makers and those working in the public sector **Public Service Efficiency** Rhys Andrews, Tom Entwistle, 2014-01-03 The current economic and political climate places ever greater pressure on public organizations to deliver services in a cost efficient way Focused on the costs of service delivery governments across the

world have introduced a series of business like practices from performance management to public private partnership in the belief that these will increase the efficiency of their public services However both the debate about public service efficiency and the policies and practices introduced to advance it have developed without a coherent account of what efficiency means in this context and how it should be realized The predominance of a rather narrow definition of the term very often focused on the ratio of inputs to outputs has tended to polarise opinion either for or against efficiency agenda Yet public service efficiency more broadly conceived is an inescapable fact of the public manager s task environment indeed in the past the notion of efficiency was central to the emergence of the field of public administration This book will recover public service efficiency from the relatively narrow terms of recent debates by examining theories and evidence relating to technical allocative distributive and dynamic efficiencies In exploring the relationship between efficiency and democracy this book will move current debates in public administration forward by reflecting on the trade offs between the different dimensions of efficiency that public organizations confront
