Politics And The Stages Of Growth:

Politics and the Stages of Growth W. W. Rostow, 1971-08-09 In *The Stages of Economic Growth* for which he is known around the world W W Rostow distinguished five basic stages of growth experienced by societies as they change from a pre industrial state to full economic maturity In this book the analysis is continued but the focus is shifted from economic growth to politics Professor Rostow sees politics as an eternal triangle of competing imperatives of security welfare and constitutional order Using this concept he examines the political meaning and content of each of the stages as experienced by eight countries Great Britain France China Japan Russia Turkey Mexico and the United States He goes on to consider in the heart of the book a uniquely political stage the search for quality which is possible in an age of high mass consumption Special attention is given the United States Professor Rostow also examines the character of politics in the developing nations of today and makes explicit what he sees to be the lessons of history and the contemporary world for these nations He concludes by using his analysis to speculate on possibilities for peace in the global community

Racial Politics at the Crossroads Marcus D. Pohlmann, 1996 In one of the closest and most racially polarized elections in the history of urban America Dr W W Herenton in 1991 became the first African American mayor of Memphis Racial Politics at the Crossroads is an in depth case study of that election exploring the unique circumstances that produced the outcome As Marcus Pohlmann and Michael Kirby explain politics in Memphis had by 1991 reached what they call a point of racial reflexivity One of the key factors that had helped elect black mayors in other cities a significant level of white liberal support for the African American candidate was largely absent in Memphis Instead the racial chasm was so wide that it precluded any cross racial appeals by either candidate and consequently the mayoral contest between Herenton and incumbent Richard Hackett consisted of parallel campaigns Rather than engage each other in debate of the issues or the usual pattern of attacks and counterattacks the two candidates concentrated on turning out and registering their own racial constituencies Herenton s success in the end hinged on the mobilization of an extraordinary level of black support in combination with critical demographic and legal factors The authors suggest that the election might easily have gone the other way if for example Memphis had been allowed to continue its annexation of predominantly white suburbs The authors analyze the election in the context of the city s history of racial politics and contrast the political dynamics of Memphis with that of other cities Finally in an epilogue written in light of Herenton s decisive 1995 reelection in which he faced only token opposition the authors conclude that bridging the black white divide in Memphis will continue to be the greatest challenge facing Herenton s administration but that the most recent election results do suggest that a significant step has been made in that direction The Authors Marcus D Pohlmann is professor of political science at Rhodes College in Memphis and the author most recently of Governing the Postindustrial City Michael P Kirby associate professor of
