Willerton, 1992 How do Soviet politicians rise to power How are national and regional regimes formed How are conflicting political interests brought together as policies are developed in the Soviet Union In *Patronage and Politics in the USSR* first published in 1991 Professor John Willerton offers major insights into the patronage networks that have dominated elite mobility regime formation and governance in the Soviet Union during the past twenty five years Using the biographical and career details of over two thousand national leaders and regional officials in Azerbaijan and Lithuania John Willerton traces the patron client relations underlying recruitment mobility and policymaking He explores the strategies of power consolidation and coalition building used by Soviet chief executives since 1964 as well as the institutional links and policy outcomes that have resulted from network politics The author also assesses the manner and extent to which leaders in politically stable and less stable settings spanning different national cultural contexts have relied upon patronage networks to consolidate power and to govern Finally Professor Willerton explores how in a period of dramatic change patron client networks may have given way to institutionalised interest groups and political parties **Ideology, Politics, and Government in the Soviet Union** John Alexander Armstrong, 1986 Using a social science approach the author presents the historical and ideological foundations of today's Soviet political system and provides a concise but thorough exposition of the Soviet political and legal institutions including the role of the Communist Party This fourth edition also addresses economic issues nationality problems and the interplay of domestic and international forces in Soviet foreign policy Originally published in 1962 by Frederick A Praeger Inc **Economics And Politics In The USSR** Hans-Hermann Hohmann, 2019-03-05 Soviet scholars have apparently stayed clear of meaningful analysis of such touchy subjects as interdependence and conflict in the relationship between economics and politics Very little has been published on this issue no surprise in a system that controls centrally both politics and the economy with an emphasis on rapid economic development The absence of meaningful Soviet research led the Federal Institute for East European and International Studies in Cologne to sponsor an international interdisciplinary conference on the subject Contributions to the resulting book cover three main areas The first includes the impact of traditional Russian political culture on contemporary

Soviet economic thinking and behavior the rank of economic aims in the priority system of Soviet politics and the function of economic institutions in the implementation of political aims The second concerns the role of political lobbies in the economy and repercussions of economic change for Soviet politics Foreign economic relations and the USSR's foreign policy make up the third area The concluding discussion reviews the state of international research and identifies areas for future study
