Politics Of British Defense Policy 1945:

Making British Defence Policy Robert Self, 2022-06-16 This book explores the process by which defence policy is made in contemporary Britain and the institutions actors and conflicting interests which interact in its inception and continuous reformulation Rather than dealing with the substance of defence policy this study focuses upon the institutional actors involved in this process This is a subject which has commanded far more interest from public Parliament government and the armed forces since the protracted bloody and ultimately unsuccessful British military involvement in Iraq and Afghanistan The work begins with a discussion of two contextual factors shaping policy The first relates to the impact of Britain's special relationship with the United States over defence and intelligence matters while the second considers the impact of Britain's relatively disappointing economic performance upon the funding of British defence since 1945 It then goes on to explore the role and impact of all the key policy actors from the Prime Minister Cabinet and core executive to the Ministry of Defence and its relations with the broader Whitehall village and the Foreign Office and Treasury in particular The work concludes by examining the increasing influence of external policy actors and forces such as Parliament the courts political parties pressure groups and public opinion This book will be of much interest to students of British defence policy security studies and contemporary military history

The Rise And Fall of British Naval Mastery Paul Kennedy, 2017-01-26 Paul Kennedy's classic naval history now updated with a new introduction by the author This acclaimed book traces Britain's rise and fall as a sea power from the Tudors to the present day Challenging the traditional view that the British are natural sons of the waves he suggests instead that the country's fortunes as a significant maritime force have always been bound up with its economic growth In doing so he contributes significantly to the centuries long debate between continental and maritime schools of strategy over Britain's policy in times of war Setting British naval history within a framework of national international economic political and strategic considerations he offers a fresh approach to one of the central questions in British history A new introduction extends his analysis into the twenty first century and reflects on current American and Chinese ambitions for naval mastery Excellent and stimulating Correlli Barnett The first scholar to have set the sweep of British Naval history against the background of economic history Michael Howard Sunday Times By far the best study that has ever been done on the subject a sparkling and apt quotation on practically every page Daniel A Baugh International History Review The best single volume study of Britain and her naval past now available to us Jon Sumida Journal of Modern History

British Defence Policy John Baylis, 1989-03-15 This study of British defence policy argues that a one off defence review is not enough but a regular process of defence reviews every five years provide a long term strategic direction which the author maintains is lacking at present

British Power and International Relations during the 1950s Michael J. Turner, 2009-10-08 This book examines Britain's role and influence in a pivotal decade The postwar international order was still taking shape in the 1950s Much was unsettled and in these circumstances Britain could realistically expect to remain

and be treated as one of the Big Three world powers along with the United States and Soviet Union. Some adjustments were required in British priorities and methods in view of changing pressures and needs at home and abroad but the continuing desire was to make Britain's position tenable in those parts of the world that were of special importance to British prestige, power, strategy, prosperity and security. This book elucidates the motives behind key decisions, discusses their far-reaching consequences, explains why some options were taken and others rejected and places British policy making in the appropriate international context. Designed primarily for undergraduate and beginning postgraduate students, the book offers an up-to-date, single-volume treatment of major themes in British and international history, historiographical synthesis and comment, detailed narrative accessible, easy to follow analysis and a clear evidence-based point of view concerning the survival of British power in challenging times. *Quarterly Review of Military Literature*, 1977

The Politics of British Defense Policy, 1945-1964 William P. Snyder, 1964 [The British Nuclear Deterrent](#) Peter Malone, 2022-02-16 The United Kingdom was the first country to undertake atomic energy research and development for military purposes. In April 1940 the British government commissioned a group of scientists to study the possibilities of manufacturing a uranium bomb in wartime. Originally published in 1984, this book traces the development of British nuclear weapons from those early times to the present. It examines the decisions of Atlee and the MacMillan governments in sustaining the nuclear deterrent through the hydrogen bomb and the Polaris programme and discusses in detail the decision to proceed with Trident. Throughout the narrative is set against the background of British domestic politics and Anglo-American relations. The book demonstrates why for nearly forty years British governments remained committed to an independent nuclear deterrent as the last line of defence should NATO fail.
