**The Silver Blade, The True Chronicle of A Double Mystery** Charles Edmonds Walk,2022-11-24

Excerpt About six o'clock on an evening in the early part of a recent November the drowsy quiet sometimes pervading police headquarters was rudely broken by the precipitate entrance of a young man who made his way hurriedly to the door marked in neat gilt letters CHIEF OF POLICE In addition to the reserve squad whose vigil never ends many other officers were present in the lazy transition stage between going on and going off duty The attention of them all was immediately attracted to the stranger and held by his extraordinary manner from the instant he became visible in the flickering gas lights until he finally disappeared In the first place he was not such a one as usually comes to the city hall basement either voluntarily or when haled hither by one of the law's myrmidons for he was fashionably even fastidiously attired with a marked preciosity of manner which would have been even more noticeable under ordinary conditions But it was not over any idiosyncrasy of apparel or customary detail of personality that the aroused curiosity of the officers lingered Inured as they were to uncommon and surprising events they were nevertheless startled by this young man's advent and greatly interested in his extreme discomposure It was obvious to the most casual glance that he was the victim of a fright so potent that it possessed him to the complete exclusion of every other feeling made him oblivious of the scrutiny to which he was subjected and drove him blindly to the commission of some idea fixed by the terror which mastered him And there was one other still more

powerful emotion depicted in his pallid twitching countenance a horror unspeakable

**Common Sense, the Turing Test, and the Quest for Real AI** Hector J. Levesque,2018-03-09 What artificial intelligence can tell us about the mind and intelligent behavior What can artificial intelligence teach us about the mind If AI's underlying concept is that thinking is a computational process then how can computation illuminate thinking It's a timely question AI is all the rage and the buzziest AI buzz surrounds adaptive machine learning computer systems that learn intelligent behavior from massive amounts of data This is what powers a driverless car for example In this book Hector Levesque shifts the conversation to good old fashioned artificial intelligence which is based not on heaps of data but on understanding commonsense intelligence This kind of artificial intelligence is equipped to handle situations that depart from

previous patterns as we do in real life when for example we encounter a washed out bridge or when the barista informs us there s no more soy milk Levesque considers the role of language in learning He argues that a computer program that passes the famous Turing Test could be a mindless zombie and he proposes another way to test for intelligence the Winograd Schema Test developed by Levesque and his colleagues If our goal is to understand intelligent behavior we had better understand the difference between making it and faking it he observes He identifies a possible mechanism behind common sense and the capacity to call on background knowledge the ability to represent objects of thought symbolically As AI migrates more and more into everyday life we should worry if systems without common sense are making decisions where common sense is needed
