The Common Mind Philip Pettit, 1996-04-18 What makes human beings intentional and thinking subjects How does their intentionality and thought connect with their social nature and their communal experience How do the answers to these questions shape the assumptions which it is legitimate to make in social explanation and political evaluation These are the broad ranging issues which Pettit addresses in this novel study *The Common Mind* argues for an original way of marking off thinking subjects in

particular human beings from other intentional systems natural and artificial It holds by the holistic view that human thought requires communal resources while denying that this social connection compromises the autonomy of individuals And in developing the significance of this view of social subjects this holistic individualism it outlines a novel framework for social and political theory Within this framework social theory is allowed to follow any of a number of paths space is found for intentional interpretation and decision theoretic reconstruction for structural explanation and rational choice derivation But political theory is treated less ecumenically The framework raises serious questions about contractarian and atomistic modes of thought and it points the way to a republican rethinking of liberal commitments **North and South of Tweed** Jeanie
