Muslim Medical Ethics Jonathan E. Brockopp, Thomas Eich, 2021-02-09 A timely exploration of balancing Islamic heritage with contemporary medical and health concerns Muslim Medical Ethics draws on the work of historians health care professionals theologians and social scientists to produce an interdisciplinary view of medical ethics in Muslim societies and of the impact of caring for Muslim patients in non Muslim societies Edited by Jonathan E Brockopp and Thomas Eich the volume challenges traditional presumptions of theory and practice to demonstrate the ways in which Muslims balance respect for their heritage with the health issues of a modern world Like members of many other faiths Muslims are deeply engaged by the technological challenges posed by modern biomedicine and they respond to those challenges with enormous creativity whether as patients doctors or religious scholars Muslim Medical Ethics demonstrates that religiously based cultural norms often inform medical practice and vice versa in an ongoing discourse The contributors map the breadth and boundaries of this discourse through discussions of contested issues on the cutting edge of ethical debates from fertilized embryos in Saudi Arabia to patient autonomy in Toronto from organ trafficking in Egypt to sterilization in Tanzania As the authors illustrate the effects of Muslim medical ethics have ramifications beyond the Muslim world With growing populations of Muslims in North America and Europe Western physicians and health care workers should be educated on the special needs of this category of patients In every essay the richness of the Islamic tradition is visible In the premodern period Muslim physicians were considered among the best in the world building and improving on Greek and Indian traditions Muslim physicians today continue that tradition while incorporating scientific advances Scholars of Islamic law work closely with physicians to develop ethical guidelines for national and international bodies and individual Muslims take full advantage of advances in medicine and religious law combining them with the wisdom of Sufism and traditions of family and community This exploration of Muslim medical ethics is therefore a foray into the richness and sophistication of the Islamic tradition itself Designed as an engaging point of entrance for students in religious studies anthropology ethics and medical humanities this pathbreaking volume also has utility for health care professionals and policy makers

The Moral World of the Qur'an Muḥammad 'Abd Allāh Darāz, 2008 This book analyzes for the first time in English the ethical theory that underpins Quranic legislation by providing a classification of specific verses in which Islam s holy book discusses moral issues It demonstrates the ways in which the

Quran theoretically and practically provides the moral code to which Muslims around the world adhere. The author divides his analysis into a survey of Quranic attitudes towards the basic ethical issues of obligation and responsibility issues of moral psychology such as motivation and intention as well as matters of social ethics such as the function of law in society. He then explores the meanings of individual morality within the family and civil society and the relationship of morality to the idea of the state.

Islamic Ethics Abdulaziz Sachedina, 2022-06-10. There have been two main traditions of writing on ethics in the Islamic tradition: one philosophical and related to the works of Aristotle and other Greek philosophers represented by thinkers such as Avicenna and one theological represented by such figures as the famous theologian al-Qadi Abd al-Jabbar. Some later scholars attempted to combine those two traditions. For the most part, however, the views of the jurists have been ignored. Abdulaziz Sachedina here calls attention to this third tradition of ethics which has its home in legal literature. The problem is that Islamic jurists did not produce a genre of ethical manuals and their form of ethics which Sachedina terms juridical ethics must be derived or extracted from works that ostensibly treat legal rulings and obligations or scriptural hermeneutics and legal theory. Presenting an outline of the version of Islamic ethics that is embedded in the textual legacy of the Islamic legal tradition, he argues that this juridical ethics is an important even dominant form of ethics in modern Islam. He notes that this form of ethics has been challenged by modernity and examines the variety of ways in which legal ethical thinkers have reacted. How do Muslim religious leaders come to grips with modern demands of directing their communities to live as modern citizens of nation states? What kind of moral and spiritual resources are being garnered by their scholars to respond to the new issues in sciences more immediately in medicine and constantly changing social relationships? To answer these pressing questions, it is necessary to go beyond the philosophical ethics of virtue and human character and acknowledge the importance of ethics to the formulation in Muslim interpretive jurisprudence of religious and moral decisions that are based on reason and revelation.

Traditional Islamic Ethics: The Concept of Virtue and its Implications for Contemporary Human Rights Irfaan Jaffer, 2021-09-07. Traditional Islamic Ethics: The Concept of Virtue and its Implications for Human Rights concentrates on the subject of Islam and modernity and Islam and human rights, a topic that has become popular and relevant with the rise of globalization and the interest in Islamic extremism and human rights. This book distinguishes itself by operating within the framework of the traditional school of thought or Islamic Traditionalism. In doing so, it draws on Islam's 1400-year-old spiritual and intellectual tradition and its understanding of ethics and virtue along with truth, justice, freedom, and equality. This book argues that Islam's pre-modern approach is indispensable in creating an organic and integral human rights model for Muslims. The first section argues that the current understanding and implementation of international human rights needs to be more flexible and inclusive if it truly aims to be universal in scope. This is because The Universal Declaration and its offshoots are still underpinned by secular liberal principles and therefore are at odds with other cultural traditions. To this end, this section critically explores popular human rights histories.

and contemporary ethical theories that attempt to justify human rights The second section of this book provides a general overview on the subject of Islam and Human Rights After explaining some of the main problems this section examines various solutions offered by Muslim academics and scholars focusing on four different types of Muslim responses to modernity and human rights liberal progressive traditional and fundamentalist It concludes that there are spaces of convergence between modern liberal ethics and traditional Islamic virtue ethics while maintaining that there are also fundamental differences and that these differences should be welcomed by human rights theorists and advocates The book s intended audience is primarily post graduate students and professional academics in the fields of Human Rights Ethical Philosophy and Islamic Studies modern Islamic thought Sufism Islamic theology Islamic Philosophy and Traditionalism It will also appeal to anyone interested in the subject of Islam and modernity in general and Islam and human rights in particular
