*Liberalism, Black Power, and the Making of American Politics, 1965-1980* Devin Fergus, 2009 In this pioneering exploration of the interplay between liberalism and black nationalism Devin Fergus returns to the tumultuous era of Johnson Nixon Carter and Helms and challenges us to see familiar political developments through a new lens What if the liberal coalition instead of being torn apart by the demands of Black Power actually engaged in a productive relationship with radical upstarts absorbing black separatists into the political mainstream and keeping them

from a more violent path What if the New Right arose not only in response to Great Society Democrats but as significantly in reaction to Republican moderates who sought compromise with black nationalists through conduits like the Blacks for Nixon movement Focusing especially on North Carolina a progressive southern state and a national center of Black Power activism Fergus reveals how liberal engagement helped to bring a radical civic ideology back from the brink of political violence and social nihilism He covers Malcolm X Liberation University and Soul City two largely forgotten federally funded black nationalist experiments the political scene in Winston Salem where Black Panthers were elected to office in surprising numbers and the liberal nationalist coalition that formed in 1974 to defend Joan Little a black prisoner who killed a guard she accused of raping her Throughout Fergus charts new territory in the study of America's recent past taking up largely unexplored topics such as the expanding political role of institutions like the ACLU and the Ford Foundation and the emergence of sexual violence as a political issue He also urges American historians to think globally by drawing comparisons between black nationalism in the United States and other separatist movements around the world By 1980 Fergus writes black radicals and their offspring were more likely to petition Congress than blow it up That liberals engaged black radicalism at all however was enough for New Right insurgents to paint liberalism as an effete anti American ideology a sentiment that has had lasting appeal to significant numbers of voters *The Depression Comes to the South Side*

Christopher Robert Reed, 2021-12-22 Incorporate's microhistories and multiple biographies into a broader understanding of a community as complex and iconic as black Chicago Journal of American Studies In the 1920s the South Side of Chicago was looked on as the new Black Metropolis but by the turn of the decade that vision was already in decline a victim of the Depression In this timely book Christopher Robert Reed explores early Depression era politics on the city's South Side The economic crisis caused diverse responses from groups in the black community distinguished by their political ideologies and stated goals Some favored government intervention others reform of social services Some found expression in mass street demonstrations militant advocacy of expanded civil rights or revolutionary calls for a complete overhaul of the capitalist economic system Reed examines the complex interactions among these various groups as they played out within the community as it sought to find common ground to address the economic stresses that threatened to tear the Black Metropolis apart *The Oxford Handbook of African American Citizenship, 1865-Present* Henry Louis Gates Jr., Claude Steele, Lawrence D. Bobo, Michael Dawson, Gerald Jaynes, Lisa Crooms-Robinson, Linda Darling-Hammond, 2011-03-11

When newly liberated African American slaves attempted to enter the marketplace and exercise their rights as citizens of the United States in 1865 few if any Americans expected that a century and a half later the class divide between black and white Americans would be as wide as it is today The United States has faced several potential key turning points in the status of African Americans over the course of its history yet at each of these points the prevailing understanding of African Americans and their place in the economic and political fabric of the country was at best contested and resolved on the side of second class citizenship The

Oxford Handbook of African American Citizenship 1865 Present seeks to answer the question of what the United States would look like today if at the end of the Civil War freed slaves had been granted full political social and economic rights It does so by tracing the historical evolution of African American experiences from the dawn of Reconstruction onward through the perspectives of sociology political science law economics education and psychology As a whole the book is the first systematic study of the gap between promise and performance of African Americans since 1865 Over the course of thirty four chapters written by some of the most eminent scholars of African American studies and across every major social discipline this handbook presents a full and powerful portrait of the particular hurdles faced by African Americans and the distinctive contributions African Americans have made to the development of U S institutions and culture As such it tracks where African Americans have been in order to better illuminate the path ahead **Multiethnic Moments** Susan E.

Persons,2017-09-29 In the past African American aspirations for political office were assumed to be limited to areas with sizeable black population bases By and large black candidates have rarely been successful in statewide or national elections

This has been attributed to several factors limited resources available to African American candidates or identification with a black liberationist ideological thrust Other factors have been a relatively small and spatially concentrated primary support base of black voters and the persistent resistance of many white voters to support black candidates For these reasons the possibility of black candidates winning elections to national office was presumably just a dream Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics This volume is anchored by a symposium that focuses on new possibilities in African American politics Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates

**Contested Transformation** Carol Hardy-Fanta, Pei-te Lien, Dianne Pinderhughes, Christine Marie Sierra, 2016-10-25 Contested Transformation constitutes the first comprehensive study of racial and ethnic minorities holding elective office in the United States at the beginning of the twenty first century Building on data from the Gender and Multicultural Leadership GMCL National Database and Survey it provides a baseline portrait of Black Latino Asian American and American Indian elected officials the women and men holding public office at national state and local levels of government Analysis reveals commonalities and differences across race and gender groups on their backgrounds paths to public office leadership roles and policy positions Challenging mainstream political science theories in their applicability to elected officials of color the book offers new understandings of the experiences of those holding public office today Gains in political leadership and influence by people of color are transforming the American political landscape but they have occurred within a contested political context one where struggles for racial and gender equality continue

*Racial and Ethnic Politics in American Suburbs* Lorrie Frasurre-Yokley, 2015-12-11 Racial and Ethnic Politics in American Suburbs examines racial and ethnic politics outside traditional urban contexts and questions the standard theories we use to understand mobility and government responses to rapid demographic change and political demands This study moves beyond traditional scholarship in urban politics departing from the persistent treatment of racial dynamics in terms of a simple black white binary Combining an interdisciplinary multi method and multiracial approach with a well integrated analysis of multiple forms of data including focus groups in depth interviews and census data Racial and Ethnic Politics in American Suburbs explains how redistributive policies and programs are developed and implemented at the local level to assist

immigrants racial ethnic minorities and low income groups something that given earlier knowledge and theorizing should rarely happen Lorrie Frasure Yokley relies on the framework of suburban institutional interdependency SII which presents a new way of thinking systematically about local politics within the context of suburban political institutions in the United States today

**What Has This Got to Do with the Liberation of Black People?** Robert C. Smith, Cedric Johnson, Robert G. Newby, 2014-03-01 A compelling intellectual and political study of a leading post civil rights era African American political theorist and strategist It is rare that a major leader of a protest movement also becomes an accomplished scholar who provides valuable insight into the movement in which he participated Yet this was precisely what Ronald W Walters 1938 2010 did Born in Wichita Kansas the young Walters led the first modern sit in protest during the summer of 1958 nearly two years before the more famous Greensboro sit in of 1960 After receiving a doctorate from American University Walters embarked on an extraordinary career of scholarship and activism Shaped by the civil rights and black power movements and the African and Caribbean liberation struggles Walters was a pioneer in the development of black studies and black science in political science A public intellectual as well as advisor and strategist to African American leaders Walters founded numerous organizations that shaped the post civil rights era A must read for scholars students pundits political leaders and activists What Has This Got to Do with the Liberation of Black People is a major contribution to the historiography of the civil rights and black power movements African American intellectual history political science and black studies

model of immigrant political incorporation      *Running for Freedom* Steven F. Lawson, 2014-11-10 *Running for Freedom* Fourth Edition updates historian Steven Lawson's classic volume detailing the history of African American civil rights and black politics from the beginning of World War II to the present day. Offers comprehensive coverage of the African American struggle for civil rights in the U.S. from 1941 to 2014. Integrates events relating to America's civil rights story at both the local and national levels. Features new material on Obama's first term in office and the first year of his second term. Includes addition of such timely issues as the Trayvon Martin case, the March on Washington 50th anniversary, state voter suppression efforts, and Supreme Court ruling on Voting Rights Act.

**The Cities on the Hill** Thomas K. Ogorzalek, 2018-05-02 Over the second half of the 20th century, American politics was reorganized around race as the tenuous New Deal coalition frayed and eventually collapsed. What drove this change? In *The Cities on the Hill*, Thomas Ogorzalek argues that the answer lies not in the sectional divide between North and South but in the differences between how cities and rural areas govern themselves and pursue their interests on the national stage. Using a wide range of evidence from Congress and an original dataset measuring the urbanicity of districts over time, he shows how the trajectory of partisan politics in America today was set in the very beginning of the New Deal. Both rural and urban America were riven with local racial conflict, but beginning in the 1930s, city leaders became increasingly unified in national politics and supportive of civil rights changes that sowed the seeds of modern liberalism. As Ogorzalek powerfully demonstrates, the red and blue shades of contemporary political geography derive more from rural and urban perspectives than clean state or regional lines, but local institutions can help bridge the divides that keep Americans apart.
