Ferguson, 2013 *Race Gender Sexuality and Social Class Dimensions of Inequality* edited by renowned researcher and scholar Susan Ferguson presents a contemporary and compelling overview of race ethnicity gender and social class issues in the United States today Taking an intersectional approach the book is organized topically rather than focusing on specific race ethnic subgroups The content is framed around the themes of identity experiences of race class gender or sexuality difference inequality and social change or personal empowerment with historical context threaded throughout to deepen the reader's understanding With engaging readings and cutting edge scholarship the collection is not only refreshingly contemporary but also relevant to students' lives Handbook of Race, Racism, and the Developing Child Stephen M. Hirschfeld,1996 Race

in the Making provides a new understanding of how people conceptualize social categories and shows why this knowledge is so readily recruited to create and maintain systems of unequal power Hirschfeld argues that knowledge of race is not derived from observations of physical difference nor does it develop in the same way as knowledge of other social categories Instead his central claim is that racial thinking is the product of a special purpose cognitive competence for understanding and representing human kinds The book also challenges the conventional wisdom that race is purely a social construction by demonstrating that a common set of abstract principles underlies all systems of racial thinking whatever other historical and cultural specificities may be associated with them Starting from the commonplace observation that race is a category of both power and the mind Race in the Making directly tackles this issue Through a sustained exploration of continuity and change in the child's notion of race and across historical variations in the race concept Hirschfeld shows that a singular commonsense theory about human kinds constrains the way racial thinking changes whether in historical time or during childhood After surveying the literature on the development of a cultural psychology of race Hirschfeld presents original studies that examine children's and occasionally adults' representations of race He sketches how a jointly cultural and psychological approach to race might proceed showing how this approach yields new insights into the emergence and elaboration of racial thinking

Keeping up with the Times Mari Riojas-Cortez, 2021-06-15 How do we begin to understand diversity in early childhood in order to combat biases There are many layers of diversity within families that are important to examine We must consider ethnic diversity first and foremost as we engage in a conversation regarding diversity as we know or should know the history of people of color in the US and the challenges and adversities that we have experienced In the context of this book understanding diversity begins with positioning a definition that encompasses the realities of many families particularly across the US such as immigration status gender family structure sexual identity class and spiritual beliefs We also see the importance to talking about race within the context of early childhood **Education Feminism** Barbara J.
