Race And Politics:

Reaching Beyond Race Paul M. Sniderman, Edward G. Carmines, 1997 If white Americans could reveal what they really think about race without the risk of appearing racist what would they say In this elegantly written and innovative book Paul Sniderman and Edward Carmines illuminate aspects of white Americans thinking about the politics of race previously hidden from sight And in a thoughtful follow up analysis they point the way toward public policies that could gain wide support and reduce the gap between black and white Americans Their discoveries will surprise pollsters and policymakers alike The authors show that prejudice although by no means gone has lost its power to dominate the political thinking of white Americans Concentrating on the new race conscious agenda they introduce a method of hidden measurement which reveals that liberals are just as angry over affirmative action as conservatives and that racial prejudice while more common among conservatives is more powerful in shaping the political thinking of liberals They also find that the good will many whites express for blacks is not feigned but represents a genuine regard for blacks which they will stand by even when given a perfectly acceptable excuse to respond negatively to blacks More crucially Sniderman and Carmines show that the current impasse over race can be overcome if we remember what we once knew The strongest arguments in behalf of equality for black Americans reach beyond race to the moral principles that give the issue of race itself a moral claim on us

Perception and Prejudice Jon Hurwitz, Mark Peffley, 1998-01-01 Based on one of the most extensive scientific surveys of race ever conducted this book investigates the relationship between racial perceptions and policy choices in America The contributors leading scholars in the fields of public opinion race relations and political behavior clarify and explore images of African Americans that white Americans hold and the complex ways that racial stereotypes shape modern political debates about such issues as affirmative action housing welfare and crime The authors make use of the largest national study of public opinion on racial issues in more than a generation the Race and Politics Study RPS conducted by the Survey Research Center at the University of California The RPS employed methodological improvements made possible by Computer Assisted Telephone Interviewing a technique that enables analysts to combine the internal validity of laboratory experiments with the external validity of probability sampling Taking full advantage of these research methods the authors offer highly nuanced analyses of subjects ranging from the sources of racial stereotypes to the racial policy preferences of Democrats and Republicans to the reasons for resistance to affirmative action Their findings indicate that while crude and explicit forms of racial prejudice may have declined in recent decades racial stereotypes persist among many whites and exert a powerful influence on the ways they view certain public policies Race and the Decline of Class in American Politics R. Robert Huckfeldt, C. W. Kohfeld, 1989 Post-Racial or Most-Racial? Michael Tesler, 2016-04-04 When Barack Obama won the presidency many posited that we were entering into a post racial period in American politics Regrettably the reality hasn t lived up to that expectation Instead Americans political beliefs have become significantly more polarized by racial

considerations than they had been before Obama's presidency in spite of his administration's considerable efforts to neutralize the political impact of race Michael Tesler shows how in the years that followed the 2008 election a presidential election more polarized by racial attitudes than any other in modern times racial considerations have come increasingly to influence many aspects of political decision making These range from people's evaluations of prominent politicians and the parties to issues seemingly unrelated to race like assessments of public policy or objective economic conditions Some people even displayed more positive feelings toward Obama's dog Bo when they were told he belonged to Ted Kennedy More broadly Tesler argues that the rapidly intensifying influence of race in American politics is driving the polarizing partisan divide and the vitriolic atmosphere that has come to characterize American politics One of the most important books on American racial politics in recent years Post Racial or Most Racial is required reading for anyone wishing to understand what has happened in the United States during Obama's presidency and how it might shape the country long after he leaves office

Race, Politics and Social Change Les Back, John Solomos, 2002-01-31 Drawing on a wealth of original sources including interviews with politicians and activists this book explores the changing contours of the politics of race in the present social and political environment The volume seeks to go beyond abstract generalisations in order to develop an account which takes seriously the everyday processes that have shaped social understandings of race and politics in British society At the same time it links up to the broader debates about the impact of multiculturalism on contemporary politics the role of minorities in political life and the limits of democratic government Its account of the role of black politicians within the context of party politics will be of particular appeal to those interested in the interplay between mobilisation and the development of racial justice and equality Race Politics and Social Change will appeal to students of British Politics and Society and to all those with interests in the politics of race Race, Politics, and Governance in the United States Huev Perry, 1996 Deracialization is the avoidance of black issues combined with a vigorous appeal to white voters it is a strategy employed by some high profile black politicians Focusing on ten campaigns contributors debate whether this harms the social and economic interests of African Americans New Race Politics in America Jane Junn, Kerry L. Haynie, 2008-05-05 Foreign migration to the United States is dramatically altering the demographic profile of the American electorate Nearly a third of all Americans are of non white and non European descent Latinos and Hispanics have recently eclipsed African Americans as the largest minority group in the United States Between 1990 and 2000 Asians doubled the size of their population to more than 4 percent of Americans Though immigration has altered the racial and ethnic composition of every state in the nation surprisingly little is known about the consequences of this new heterogeneity for American politics This book explores the impact and political consequences of immigration After considering the organizations that mobilize new citizens to politics the authors examine the political psychology of group consciousness for political mobilization Finally they consider the emerging patterns and choices of new voters Still a House Divided

Desmond King, Rogers M. Smith, 2011-08-22 Why race remains the central political issue in America today Why have American policies failed to reduce the racial inequalities still pervasive throughout the nation Has President Barack Obama defined new political approaches to race that might spur unity and progress Still a House Divided examines the enduring divisions of American racial politics and how these conflicts have been shaped by distinct political alliances and their competing race policies Combining deep historical knowledge with a detailed exploration of such issues as housing employment criminal justice multiracial census categories immigration voting in majority minority districts and school vouchers Desmond King and Rogers Smith assess the significance of President Obama's election to the White House and the prospects for achieving constructive racial policies for America's future Offering a fresh perspective on the networks of governing institutions political groups and political actors that influence the structure of American racial politics King and Smith identify three distinct periods of opposing racial policy coalitions in American history The authors investigate how today's alliances pit color blind and race conscious approaches against one another contributing to political polarization and distorted policymaking Contending that President Obama has so far inadequately confronted partisan divisions over race the authors call for all sides to recognize the need for a balance of policy measures if America is to ever cease being a nation divided Presenting a powerful account of American political alliances and their contending racial agendas Still a House Divided sheds light on a policy path vital to the country's future Unraveling Race, Politics, and Gender in Trinidad and Tobago's Economic Development Jeetendra Khadan, Inder Jit Ruprah, 2024-04-27 This book delves into Trinidad and Tobago s development with a fresh lens It stands as the inaugural empirical exploration of the country's unique attributes including its diversity ex British colony status small state categorization by population size and its dependence on hydrocarbons Through meticulous empirical analysis this book scrutinizes the nation s economic social and political outcomes within the context of these four distinctive parameters offering fresh insights into the country's development trajectory. Lowndes, Julie Novkov, Dorian Tod Warren, 2008 Race has been present at every critical moment in American political development shaping political institutions political discourse public policy and its denizens political identities But because of the nature of race its evolving and dynamic status as a structure of inequality a political organizing principle an ideology and a system of power we must study the politics of race historically institutionally and discursively Covering more than three hundred years of American political history from the founding to the

contemporary moment the contributors in this volume make this extended argument Together they provide an understanding of American politics that challenges our conventional disciplinary tools of studying politics and our conservative political moment's dominant narrative of racial progress This volume the first to collect essays on the role of race in American political history and development resituates race in American politics as an issue for sustained and broadened critical attention Black Men, White Cities Ira Katznelson, 1973 Race, Politics, and Reconstruction Rory McGovern, Ronald G. Machoian, 2024-10-11 The first in depth study of racial integration at West Point after the Civil War Race Politics and Reconstruction tells the story of racial integration at the United States Military Academy after the Civil War and spotlights the social environment and cultural currents that led to its failure The first attempt to racially integrate West Point proved not simply a lost opportunity but an opportunity sabotaged with shocking degrees of forethought and deliberation By investigating West Point's experience with race from varied and nuanced perspectives including those of the first Black cadets the US Army officer corps white cadets the Academy s faculty and staff and the Black and white American publics the contributors to this volume cast both the promise and the failure of integration at West Point as an illuminating microcosm of Reconstruction itself Contributors Jonathan D Bratten Army National Guard Makonen A Campbell United States Military Academy Adam H Domby Auburn University Le Trice Donaldson Auburn University Louisa Koebrich US Army North Ronald G Machoian University of Wisconsin Madison Cameron McCoy US Naval War College Rory McGovern United States Military Academy Amanda M Nagel US Army Command and General Staff College Race, Politics, and Irish America Mary M. Burke, 2022 Considers three centuries of writers and creatives of mostly Scots Irish and post Famine Irish descent whose work examines moments of entwined racial social and political transformation for those of that identity in America

Routledge Handbook of Latin American Politics Peter Kingstone, Deborah J. Yashar, 2013-03-05 The Routeldge Handbook of Latin American Politics brings together the leading figures in the study of Latin America to present extensive empirical coverage and a cutting edge examination of the central areas of inquiry in the region The End of Race Politics Coleman Hughes, 2024-02-06 An exciting new voice makes the case for a colorblind approach to politics and culture warning that the so called anti racist movement is driving us ironically toward a new kind of racism As one of the few black students in his philosophy program at Columbia University years ago Coleman Hughes wondered why his peers seemed more pessimistic about the state of American race relations than his own grandparents who lived through segregation The End of Race Politics is the culmination of his years long search for an answer Contemplative yet audacious The End of Race Politics is necessary reading for anyone who questions the race orthodoxies of our time Hughes argues for a return to the ideals that inspired the American Civil Rights movement showing how our departure from the colorblind ideal has ushered in a new era of fear paranoia and resentment marked by draconian interpersonal etiquette failed corporate diversity and inclusion efforts and poisonous race based policies that hurt the very people they intend to help Hughes exposes the harmful side effects of

Kendi DiAngelo style antiracism from programs that distribute emergency aid on the basis of race to revisionist versions of American history that hide the truth from the public Through careful argument Hughes dismantles harmful beliefs about race proving that reverse racism will not atone for past wrongs and showing why race based policies will lead only to the illusion of racial equity By fixating on race we lose sight of what it really means to be anti-racist A racially just colorblind society is possible Hughes gives us the intellectual tools to make it happen Race, Politics, and Economic Development James Jennings, 1992-12-17 In April 1992 the world witnessed a renewal in South Central Los Angeles of the urban violence that had exploded there over a quarter of a century earlier As in the Watts rebellion of 1965 the spark that ignited the firestorm was Black rage over police brutality But in both eras the tinder was prepared by decades of social neglect and political disenfranchisement that have left the predominantly non white urban poor trapped and virtually without hope Race Politics and Economic Development examines the underlying causes of Black urban poverty and recommends means to escape the seemingly endless cycle of retributive violence that it spawns The book brings together Black activists and scholars including two former mayors of American cities to analyze the theoretical and practical problems facing the Black community in the United States The essays argue that political influence power and wealth are major factors in determining social welfare policies that both liberal and conservative policies are no longer effective in alleviating a growing human service crisis among Blacks and that political mobilisation of the Black community is absolutely critical in resolving the problem of poverty in urban America Drawing on work in the social sciences political theory and economics and also on the contributors activist experiences these essays present an agenda for the participation of grassroots Black leaders in developing and implementing urban policy Race, Politics, and Pandemic Pedagogy Henry A. Giroux, 2021-01-14 In this book Henry A Giroux passionately argues that education and critical pedagogy are needed now more than ever to combat injustices in our society caused by fake news toxic masculinity racism consumerism and white nationalism At the heart of the book is the idea that pedagogy has the power to create narratives of desire values identity and agency at time when these narratives are being manipulated to promote right wing populism and emerging global fascist politics. The book expands on the notion of the plague as not only a medical crisis but also a crisis of politics ethics education and democracy itself The chapters cover a range topics beginning with historical perspectives on fascism and moving on to issues of social atomization depoliticization neoliberal pedagogy the scourge of staggering inequality populism and pandemic pedagogy The book concludes with a call for educators to make education central to politics develop a discourse of critique and possibility reclaim the vision of a radical democracy and embrace their role as powerful agents of change Race Politics in Britain and France Erik Bleich, 2003-05-26 Britain and France have developed substantially different policies to manage racial tensions since the 1960s in spite of having similar numbers of post war ethnic minority immigrants This book provides the first detailed historical exploration of race policy development in these two countries In this path breaking work Bleich argues against

common wisdom that attributes policy outcomes to the role of powerful interest groups or to the constraints of existing institutions instead emphasizing the importance of frames as widely held ideas that propelled policymaking in different directions British policymakers framing of race and racism principally in North American terms of color discrimination encouraged them to import many policies from across the Atlantic For decades after WWII by contrast French policy leaders framed racism in terms influenced largely by their Vichy past which encouraged policies designed primarily to counter hate speech while avoiding the recognition of race found across the English Channel Race, Politics, and Education in Brazil Rosana Heringer, Ollie Johnson, Ollie A.
