*The Pursuit of Racial and Ethnic Equality in American Public Schools* Kristi L. Bowman, 2014-12-19 In 1954 the Supreme Court decided *Brown v Board of Education* ten years later Congress enacted the Civil Rights Act These monumental changes in American law dramatically expanded educational opportunities for racial and ethnic minority children across the country They also changed the experiences of white children who have learned in increasingly diverse classrooms The authors of this commemorative volume include leading scholars in law education and public policy as well as important historical figures Taken together the chapters trace the narrative arc of school desegregation in the United States beginning in California in the 1940s continuing through *Brown v Board* the Civil

Rights Act and three important Supreme Court decisions about school desegregation and voluntary integration in 1974 1995 and 2007 The authors also assess the status of racial and ethnic equality in education today and consider the viability of future legal and policy reform in pursuit of the goals of Brown v Board This remarkable collection of voices in conversation with one another lays the groundwork for future discussions about the relationship between law and educational equality and ultimately for the creation of new public policy A valuable reference for scholars and students alike this dynamic text is an important contribution to the literature by an outstanding group of authors

**Race, Ethnicity and Education** David Gillborn, 2003-09-02 This book is a major new investigation into the issues of race ethnicity and education following the educational reforms during the late 1980s It provides an up to date and critical introduction to current issues and major research findings in the field exploring the teacher pupil relationship through a detailed account of life in an inner city comprehensive It reveals the influence of different racist stereotypes and highlights the especially disadvantaged position of Afro Caribbean pupils within a school Features Draws on a wide variety of research projects in ethnic schools to examine achievement curriculum content language use assessment and testing under the National Curriculum Uses material collected during two years of research to consider young people s school experiences and issues relating to classroom discipline

**Unequal City** Carla Shedd, 2015-10-20 Chicago has long struggled with racial residential segregation high rates of poverty and deepening class stratification and it can be a challenging place for adolescents to grow up Unequal City examines the ways in which Chicago s most vulnerable residents navigate their neighborhoods life opportunities and encounters with the law In this pioneering analysis of the intersection of race place and opportunity sociologist and criminal justice expert Carla Shedd illuminates how schools either reinforce or ameliorate the social inequalities that shape the worlds of these adolescents Shedd draws from an array of data and in depth interviews with Chicago youth to offer new insight into this understudied group Focusing on four public high schools with differing student bodies Shedd reveals how the predominantly low income African American students at one school encounter obstacles their more affluent white counterparts on the other side of the city do not face Teens often travel long distances to attend school which due to Chicago s segregated and highly unequal neighborhoods can involve crossing class race and gang lines As Shedd explains the disadvantaged teens who traverse these boundaries daily develop a keen perception of injustice or the recognition that their economic and educational opportunities are restricted by their place in the social hierarchy Adolescents worldviews are also influenced by encounters with law enforcement while traveling to school and during school hours Shedd tracks the rise of metal detectors surveillance cameras and pat downs at certain Chicago schools Along with police procedures like stop and frisk these prison like practices lead to distrust of authority and feelings of powerlessness among the adolescents who experience mistreatment either firsthand or vicariously

Shedd finds that the racial composition of the student body profoundly shapes students' perceptions of injustice. The more diverse a school is, the more likely its students of color will recognize whether they are subject to discriminatory treatment. By contrast, African American and Hispanic youth whose schools and neighborhoods are both highly segregated and highly policed are less likely to understand their individual and group disadvantage due to their lack of exposure to youth of differing backgrounds.

Issues in Race and Ethnicity CQ Researcher, 2017-10-13 In the wake of a divisive presidential election charged with debates over immigration and identity politics, Americans continue to grapple with questions of race and ethnicity. This collection of nonpartisan and thoroughly researched reports focuses on provocative issues including gentrification, the Black Lives Matter movement, and the resurgence of white supremacy, anti-Semitism, and the Alt Right. Because it's CQ Researcher, the policy reports are expertly researched and written, showing all sides of the debate. Chapters follow a set template: exploring three issue questions, then offering background, an overview of the current situation, and a look ahead. All issues include a chronology, bibliography, yes/no debate box, photos, charts, and figures.

City Kids Maria Kromidas, 2016-11-03 Cosmopolitanism, the genuine appreciation of cultural and racial diversity, is often associated with adult worldliness and sophistication. Yet, as this innovative new book suggests, children growing up in multicultural environments might be the most cosmopolitan group of all. *City Kids* profiles fifth graders in one of New York City's most diverse public schools, detailing how they collectively developed a sophisticated understanding of race that challenged many of the stereotypes, myths, and commonplaces they had learned from mainstream American culture. Anthropologist Maria Kromidas spent over a year interviewing and observing these young people both inside and outside the classroom, and she vividly relates their sometimes awkward, often playful attempts to bridge cultural rifts and reimagine racial categories. Kromidas looks at how children learned race in their interactions with each other and with teachers in five different areas: navigating urban space, building friendships, carrying out schoolwork, dealing with the school's disciplinary policies, and enacting sexualities. The children's interactions in these areas contested and reframed race. Even as Kromidas highlights the lively and quirky individuals within this super-diverse group of kids, she presents their communal ethos as a model for convivial living in multiracial settings. By analyzing practices within the classroom, school, and larger community,

City Kids offers advice on how to nurture kids cosmopolitan tendencies making it a valuable resource for educators parents and anyone else who is concerned with America s deep racial divides Kromidas not only examines how we can teach children about antiracism but also considers what they might have to teach us      *On the Basis of Race* Lauren S.
