Race Class And The Apartheid State:

Race, Class & the Apartheid State Harold Wolpe, 1990 Predicaments of Knowledge Suren Pillay, 2024-09

Predicaments of Knowledge explores the difficult questions South African universities face after apartheid. Is there a difference between Africanising a university and decolonising a university? What about differences between deracialising and decolonising the curricula taught at universities across disciplines? Through a range of reflections on race, language, colonial, postcolonial and decolonial knowledge projects from Africa and Latin America, this book explores the pitfalls and possibilities that face a post-apartheid generation inventing the future of knowledge. The distinctions between Africanisation, decolonisation and deracialisation are often conflated in the political demands put to universities. Suren Pillay emphasises all three as important but distinct imperatives. If an intervention is undertaken with the aim of decolonising the university while actually addressing deracialisation, it can undermine the effort to decolonise. Similarly, if an initiative to Africanise the university does not address decolonisation, both processes can be undermined. Drawing on more than two and a half decades of the author's participation in these debates, these essays aim to intervene in and elucidate questions and predicaments rather than offering blueprints; they are dialogical in spirit even when polemical in tone. In conversation with existing continental African and Latin American experiences, they offer incisive reflections on current South African debates. **Class**

in Education: Knowledge,, Pedagogy,, Subjectivity Deborah Kelsh, Dave Hill, Sheila Macrine, 2009-09-10. Class in Education argues for a materialist understanding of class in analyzing the structure of owning and power in social relations and as a key element in the restructuring of society in a more egalitarian way. Shadow of Liberation Vishnu Padayachee, Robert Van Niekerk, 2019-10-01. Shadow of Liberation explores the intricate twists, turns, contestations and compromises of ANC economic and social policymaking with a focus on the transition era of the 1990s and the early years of democracy. With the damning revelations by the Zondo Commission of Inquiry into State Capture on the massive corruption of the South African body politic, the timing of this book could not be more relevant. South Africans need to confront the economic and social policy choices that the liberation movement made and to see how these decisions may have facilitated the conditions for corruption to emerge and flourish. Answers are needed. Padayachee and van Niekerk focus their attention on the primary question of how and why the ANC, given its historical anti-inequality redistributive stance, came in the 1990s to such a dramatic turn around and move towards an essentially market-dominated approach. Were they pushed or did they go willingly? What role, if any, did Western governments and international financial institutions play? And what of the role of the late apartheid state and South African business? Did leaders and comrades sell out the ANC's emancipatory policy vision? Shadow of Liberation tries to provide answers to these questions, drawing on the best available primary archival evidence as well as extensive interviews with key protagonists across the political, non-government and business spectrum. The authors argue that the ANC's emancipatory policy agenda was broadly to establish a social democratic welfare state upholding rights

of social citizenship However its economic policy framework to realise this emancipatory mission was either non existent or egregiously misguided **Mobilizing for Peace** Benjamin Gidron, Stanley N. Katz, Yeheskel Hasenfeld, 2002-06-28 Mobilizing for Peace brings together the work of international experts to provide an in depth study of thirty three peace conflict organizations in Northern Ireland South Africa and Israel Palestine The contributors show how the sociopolitical and cultural context of the conflict in each region has shaped the type of resolution organizations that have emerged and their conception of the conflict and its resolution By promoting more humane images of the contestants and by offering alternative peaceful approaches to resolve the conflict the organizations have successfully galvanized previously weak or non existent pro peace political forces to become important players in the political struggle for peace **African Development and Public Policy** Stuart S. Nagel, 2016-07-27 This book analyzes various important aspects of methodology and substance regarding economic social and political policy in Africa directed toward achieving more effective efficient and equitable societal institutions The chapters are authored by experts from within Africa and also from Africa research institutes elsewhere The book combines practical policy significance with insightful causal and prescriptive generalizations The emphasis is on the role of governmental decision making and the important but secondary role of the marketplace social groups and engineering

index are included Anti-Impunity and the Human Rights Agenda Karen Engle,Zinaida Miller,D. M. Davis,2016-12-15 In the twenty first century fighting impunity has become both the rallying cry and a metric of progress for human rights The new emphasis on criminal prosecution represents a fundamental change in the positions and priorities of students and practitioners of human rights and transitional justice it has become almost unquestionable common sense that criminal punishment is a legal political and pragmatic imperative for addressing human rights violations This book challenges that common sense It does so by documenting and critically analyzing the trend toward an anti impunity norm in a variety of institutional and geographical contexts with an eye toward the interaction between practices at the global and local levels Together the chapters demonstrate how this laser focus on anti impunity has created blind spots in practice and in scholarship that result in a constricted response to human rights violations a narrowed conception of justice and an impoverished approach to peace **History from South Africa** Joshua Brown,1991 More starkly than any other contemporary social conflict the crisis in South Africa highlights the complexities and conflicts in race gender class and nation These original articles most of which were written by South African authors are from a special issue of the Radical History Review published in Spring 1990 that mapped the development of interpretations of the South African past that depart radically from the official history The articles range from the politics of black movements in the nineteenth and twentieth centuries to studies of film television and theater as reflections of modern social conflict History from South Africa is presented in two main sections discussions of the historiography of South Africa from the viewpoint of those rewriting it with a radical outlook and investigations into popular history and popular culture the production and reception of history in the public realm In addition two photo essays dramatize this history visually maps and a chronology complete the presentation The book provides a fresh look at major issues in South African social and labor history and popular culture and focuses on the role of historians in creating and interacting with a popular movement of resistance and social change A Theory of Universal Democracy L. Ali Khan,2021-10-18 Democracy is often associated with Western liberal values such as free markets individual rights and secularism Some scholars assert that liberal democracy is the end of history Disputing such claims this work presents the concept of Universal Democracy to think beyond the values of Western democracy A Theory of Universal Democracy empowers cultures and communities across the world to custom design democracy in consonance with their traditional values For example the book makes concrete proposals for Muslim countries to democratize their constitutions without accepting Western values and without violating the principles of Islamic law More importantly Universal Democracy further develops the idea of Free State which the author first presented in his previous book The Extinction of Nation States The proposed fusion of Universal Democracy and Free State is designed to revolutionize the classical theory of government and to offer a new paradigm that accommodates both universality and uniqueness

Systemic Racism in South Africa Rupert Taylor,2024-12-06 This book takes a critical macro level political sociological

perspective to understanding South African politics and society Applying systemic racism theory to South Africa the author argues that South African society through its exclusionary social mechanisms has assumed a systemically racist form that deeply compromises questions of truth and justice Constitutive of and embedded in the structure of South African society racism has a reach and a durability that runs deep through the successive stages of segregationism apartheid and liberal democracy Showing the limits of the rule of law in a racist society the author offers a theoretically informed interpretation as to why the national liberation struggle has fallen short of its promise to deliver a better life for all and as to why truth and justice remain so deeply compromised in South Africa today The arguments advanced are supported by over thirty semi structured interviews conducted by the author with high profile South African politicians jurists and intellectuals as well as by using Truth and Reconciliation Commission hearing transcripts both public and top secret This thought provoking book is driven by the imperative to offer a compelling and sustained argument for taking a systemic racism approach to interpreting South Africa for scholars and students of sociology political science race and ethnic studies law and South African history

Fractured Militancy Marcel Paret, 2022-02-15 Drawing on extensive ethnographic fieldwork and interviews with activists Fractured Militancy tells the story of postapartheid South Africa from the perspective of Johannesburg's impoverished urban Black neighborhoods Nearly three decades after South Africa's transition from apartheid to democracy widespread protests and xenophobic attacks suggest that not all is well in the once celebrated rainbow nation Marcel Paret traces rising protests back to the process of democratization and racial inclusion This process dangled the possibility of change but preserved racial inequality and economic insecurity prompting residents to use militant protests to express their deep sense of betrayal and to demand recognition and community development Underscoring remarkable parallels to movements such as Black Lives Matter in the United States this account attests to an ongoing struggle for Black liberation in the wake of formal racial inclusion Rather than unified resistance however class struggles within the process of racial inclusion produced a fractured militancy Revealing the complicated truth behind the celebrated success of South African democratization Paret uncovers a society divided by wealth urban geography nationality employment and political views Fractured Militancy warns of the threat that capitalism and elite class struggles present to social movements and racial justice everywhere

Decolonising Schools in South Africa Pam Christie, 2020-06-07 This book explores the challenge of dismantling colonial schooling and how entangled power relations of the past have lingered in post apartheid South Africa It examines the on the ground history of colonialism from the vantage point of a small town in the Karoo region showing how patterns of possession and dispossession have played out in the municipality and schools Using the strong political and ontological critique of decoloniality theories the book demonstrates the ways in which government interventions over many years have allowed colonial relations and the construction of racialised differences to linger in new forms including unequal access to schooling Written in an accessible style the book considers how the dream of decolonial schooling might be realised from the vantage point of research on the margins This Karoo region also offers an interesting case study as the site where the world's largest radio telescope was recently located and highlights the contrasting logics of international big science and local development needs This book will be of interest to academics and scholars in the education field as well as to social geographers sociologists human geographers historians and policy makers Chapters 1 and 10 of this book are freely available

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 This book surveys the history of higher education principally universities in Africa. Its geographical coverage encompasses the entire continent from Afro-Arab Islamic Africa in the north to the former apartheid South Africa in the south and the historical time span ranges from the Egyptian civilization to the present. Since little has been written on this topic particularly its historical component, the work fills an important gap in the literature. The book delineates the broad contours of the history of higher education in Africa in exceptional historical breadth, voluminously documenting its subject in the text, detailed footnotes and lengthy appendices. Its methodological approach is that of critical historiography in which the location of the African continent in world history prior to the advent of European colonization is an important dimension. In addition, the book incorporates a historical survey of foreign assistance to the development of higher education in Africa in the post-independence era with a substantive focus on the role of the World Bank. It has been written with the following readership in mind: those pursuing courses or doing research in African studies, studies of the African Diaspora and comparative international education. It should also be of interest to those concerned with developing policies on African higher education inside and outside Africa as well as those interested in African Islamic history, the development of higher education in medieval Europe, the contributions of African Americans to African higher education and such controversial approaches to the reading of African history as Eurocentrism and Afrocentrism.

The Road to Democracy in South Africa: 1970-1980 South African Democracy Education Trust, 2004 v. 3 The third volume in the series examines the role of anti-apartheid movements around the world. The global anti-apartheid movement was very successful in creating awareness of the liberation struggle in South Africa and in contributing to the downfall of the apartheid government. This volume in 2 parts brings together analyses which in the main are written by activist scholars with deep roots in the movements and organizations they are writing about.

The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 A popular myth about the travails of Africa holds that the continent's long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved. These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments. While intellectually charming and often elegantly formulated, that conventional wisdom is actually contradicted by historical evidence and common sense. It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure. In fact, the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological: low-income countries are by definition those where such ingredients are missing. None of today's high-income countries started its growth process with the required and complete list of growth ingredients. Unless one truly

believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the Oxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa s emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book Racial Formation in the United States Michael Omi,Howard Winant,2014-06-20 Twenty years since the publication of the Second Edition and more than thirty years since the publication of the original book Racial Formation in the United States now arrives with each chapter radically revised and rewritten by authors Michael Omi and Howard Winant but the overall purpose and vision of this classic remains the same Omi and Winant provide an account of how concepts of race are created and transformed how they become the focus of political conflict and how they come to shape and permeate both identities and institutions The steady journey of the U S toward a majority nonwhite population the ongoing evisceration of the political legacy of the early post World War II civil rights movement the initiation of the war on terror with its attendant Islamophobia the rise of a mass immigrants rights movement the formulation of race class gender intersectionality theories and the election and reelection of a black President of the United States are some of the many new racial conditions Racial Formation now covers **State of the Nation** John Daniel,Adam Habib,Roger Southall,2003 This anthology provides insightful political analysis of post apartheid South Africa Written by leading South African intellectuals these analyses cover topics such as unemployment trade unionism race relations land reform education international relations and the South Africanisation of the African economy Within each work the inherited apartheid legacy the policies introduced to overcome those legacies and the effectiveness of those policies are addressed
