Race, Nation, and Empire in American History James T. Campbell, Matthew Pratt Guterl, Robert G. Lee, 2017-12-10 While public debates over America's current foreign policy often treat American empire as a new phenomenon this lively collection of essays offers a pointed reminder that visions of national and imperial greatness were a cornerstone of the new country when it was founded In fact notions of empire have long framed debates over western expansion Indian removal African slavery Asian immigration and global economic dominance and they persist today despite the proliferation of anti imperialist rhetoric In fifteen essays distinguished historians examine the central role of empire in American race relations nationalism and foreign policy from the founding of the United States to the twenty first century The essays trace the global expansion of American merchant capital the rise of an evangelical Christian mission movement the dispossession and historical erasure of indigenous peoples the birth of new identities and the continuous struggles over the place of darker skinned peoples in a settler society that still fundamentally imagines itself as white Full of transnational connections and cross pollinations of people appearing in unexpected places the essays are also stories of people being put quite literally in their place by the bitter struggles over the boundaries of race and nation Collectively these essays demonstrate that the seemingly contradictory processes of boundary crossing and boundary making are and always have been intertwined Contributors James T Campbell Brown University Ruth Feldstein Rutgers University Newark Kevin K Gaines University of Michigan Matt Garcia Brown University Matthew Pratt Guterl Indiana University George Hutchinson Indiana University Matthew Frye Jacobson Yale University Prema Kurien Syracuse University Robert G Lee Brown University Eric Love University of Colorado Boulder Melani McAlister George Washington University Joanne Pope Melish University of Kentucky Louise M Newman University of Florida Vernon J Williams Jr Indiana University Natasha Zaretsky Southern Illinois

University Carbondale **Race, Nation, and Reform Ideology in Winnipeg, 1880s-1920s** Kurt Korneski, 2015-06-09

During the late nineteenth and early twentieth centuries a host of journalists ministers medical doctors businessmen lawyers labor leaders politicians and others called for an assault on poverty slums disreputable boarding houses alcoholism prostitution sweatshop conditions inadequate educational facilities and other social evils Although they represented an array of political positions and advocated a range of strategies to deal with what they deemed problems historians have come to term this impulse urban reform or the urban reform movement This book considers the history of reform ideology in Canada It does so by considering four leading reformers living in what might be described as the most Canadian of Canadian cities Winnipeg Manitoba While the book engages in discussions debates surrounding the particular individuals it considers its more general argument is that to understand the history of reform in Canada requires viewing reformers as simultaneously experiencing and responding to two basic phenomena simultaneously It requires understanding them as confronting the polarizing tendencies exploitation and sometimes grinding poverty that was central to the economic order they often unwittingly helped to impose in northern North America It also however requires seeing them as fundamentally shaped by the process and legacy of the dispossession of Aboriginal peoples and the changing nature of Aboriginal settler relations that were also central to the development of Canada **Women Writing Race, Nation, and History** Sonita Sarker, 2022

Race, Nation, & Empire in American History (Volume 1 of 2)
(EasyRead Comfort Edition) , Race, Nation, and Capital in the Modern World Philip Y. Nicholson, 2023-03-17

Race Nation and Capital in the Modern World is a comprehensive yet concise book that traces the history of racism nationalism and capitalism from their combined origins at the end of the fifteenth century to the present This book describes the development of legal codes and institutional practices that brought vast wealth and power to their chief beneficiaries along

with great suffering exploitation and destruction to its victims Instead of understanding racism as an aberration or dark flaw in the troubled past of a world power like the United States this synthesis places race and racism in the forefront of the unfolding history of nationalism and capitalism The work de emphasizes the uniqueness of each nation s particular experience by showing the interdependence of capitalist and racist practices The narrative follows the leading hegemonic national powers as they expanded from mercantile conquests through plantation enslavement massive displacement of populations colonialism global warfare and finally the tenacious contemporary aftermath There are no comparable surveys for undergraduates or general readers seeking a unified historical understanding of these primary drivers of modernity It is a provocative introductory guide and not a work of political theory This volume will appeal to students scholars and those interested in studies on racism race capital the history of inequality and human and civil rights

Rethinking the Racial Moment Barbara Brookes, Alison Holland, 2011-05-25 In recent years race has fallen out of historiographical fashion being eclipsed by seemingly more benign terms such as culture ethnicity and difference This timely and highly readable collection of essays re energises the debate by carefully focusing our attention on local articulations of race and their intersections with colonialism and its aftermath In Rethinking the Racial Moment Essays on the Colonial Encounter Alison Holland and Barbara Brookes have produced a collection of studies that shift our historical understanding of colonialism in significant new directions Their generous and exciting brief will ensure that the book has immediate appeal for multiple readers engaged in critical theory as well as those more specifically involved in Australian and New Zealand history Collectively they offer new and invigorating approaches to understanding colonialism and cultural encounters in history via the interpretive not merely temporal frame of the moment

The Cambridge Companion to Caribbean Music Nanette de Jong, 2022-08-04 The diverse musics of the Caribbean form a vital part of the identity of individual island nations and their diasporic communities At the same time they witness to collective continuities and the interrelatedness that underlies the region s multi layered complexity This Companion introduces familiar and less familiar music practices from different nations from reggae calypso and salsa to tamb m ringue and soca Its multidisciplinary thematic approach reveals how the music was shaped by strategies of resistance and accommodation during the colonial past and how it has developed in the postcolonial present The book encourages a comparative and syncretic approach to studying the Caribbean one that acknowledges its patchwork of fragmented dynamic plural and fluid differences It is an innovative resource for scholars and students of Caribbean musical culture particularly those seeking a decolonising perspective on the subject

The SAGE Handbook of Nations and Nationalism Gerard Delanty,Krishan Kumar,2006-06-14 With its list of distinguished contributors and its wide range of topics the handbook is surely destined to become an invaluable resource for all serious students of nationalism Michael Billig Professor of Social Sciences at Loughborough University and author of Banal Nationalism SAGE 1995 The persistence some would say revival of nationalism across the recent history of modernity in particular the past two decades has taken many scholars in the social sciences by surprise In response interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other This handbook does just that It deserves particular praise for the wide range of approaches and topic included and for the systematic attempt at studying nationalism as a phenomenon of our time not a remnant from the past Peter Wagner Professor of Social and Political Theory European University Institute and Professor of Sociology University of Warwick For students concerned with the contemporary study of nationalism this will be an invaluable publication The three fold division into approaches themes and cases is a very solid and sensible one The editors have commissioned essays from leading scholars in the field and this handbook provides the best single volume overview of contemporary nationalism John Breuilly Professor of Nationalism and Ethnicity London School of Economics Nationalism has long excited debate in political social and cultural theory and remains a key field of enquiry among historians anthropologists sociologists as well as political scientists It is also one of the critical media issues of our time There are however surprisingly few volumes that bring together the best of this

intellectual diversity into one collection This Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future Its three sections guide the reader through the theoretical approaches to this field of study its major themes from modernity to memory migration and genocide and the diversity of nationalisms found around the globe The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines illuminate themes and issues of central importance in both historical and contemporary contexts and show how nationalism has impacted upon and interacted with other political and social forms and forces This book provides a much needed resource for scholars in international relations political science social theory and sociology **Race, Nation,**

History Oded Y. Steinberg, 2019-08-02 In *Race Nation History* Oded Y Steinberg examines the way a series of nineteenth century scholars in England and Germany first constructed and then questioned the periodization of history into ancient medieval and modern eras shaping the way we continue to think about the past and present of Western civilization at a fundamental level Steinberg explores this topic by tracing the deep connections between the idea of epochal periodization and concepts of race and nation that were prevalent at the time especially the role that Germanic or Teutonic tribes were assumed to play in the unfolding of Western history Steinberg shows how English scholars such as Thomas Arnold Williams Stubbs and John Richard Green and German scholars such as Christian Karl Josias von Bunsen Max Müller and Reinhold Pauli built on the notion of a shared Teutonic kinship to establish a correlation between the division of time and the ascent or descent of races or nations For example although they viewed the Germanic tribes conquest of the Roman Empire in A D 476 as a formative event that symbolized the transformation from antiquity to the Middle Ages they did so by highlighting the injection of a new and dominant ethnoracial character into the decaying empire But they also rejected the idea that the fifth century A D was the most decisive era in historical periodization advocating instead for a historical continuity that emphasized the significance of the Germanic tribes influence on the making of the nations of modern Europe Concluding with character studies of E A Freeman James Bryce and J B Bury Steinberg demonstrates the ways in which the innovative schemes devised by this community of Victorian historians for the division of historical time relied on the cornerstone of race

Race, nation and empire Catherine Hall, Keith McClelland, 2024-06-04 The essays in this collection show how histories written in the past in different political times dealt with considered or avoided and disavowed Britain's imperial role and issues of difference Ranging from enlightenment historians to the present these essays consider both individual historians including such key figures as E A Freeman G M Trevelyan and Keith Hancock and also broader themes such as the relationship between liberalism race and historiography and how we might re think British history in the light of trans national trans imperial and cross cultural analysis Britishness and what British history is have become major cultural and political issues in our time But as these essays demonstrate there is no single national story race empire and difference have pulsed through the writing of British history The contributors include some of the most distinguished historians writing today
