Race, Social Class, and Individual Differences in I.Q. Sandra Scarr, 1981 First published in 1981 Routledge is an imprint of Taylor Francis an informa company *Race, Social Class, and Individual Differences in I.Q.* Sandra Scarr, 1984 *The Science and Politics of Racial Research* William H. Tucker, 1994 Unlike other critiques of the scientific literature on racial difference *The Science and Politics of Racial Research* argues that there has been no scientific purpose or value to the study of innate differences in ability between groups William Tucker shows how for more than a century scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences Tucker structures his work chronologically with each chapter describing how research on genetic difference was used in a particular era to support a particular political agenda He begins with the use of science to support slavery in the mid nineteenth century and ends with the effects of Jensenism in the 1970s Highlights include one chapter describing a little known but concerted attempt by a group of scientists to overturn the Brown v Board of Education decision on the basis of expert testimony about racial differences and another that presents a review of the eugenics movement in the twentieth century The author also considers how to balance the rights and responsibilities of scientists concluding that one generally neglected method is to strengthen the rights of research subjects **A Social Psychology of Prejudice** Douglas W. Bethlehem, 2015-06-19 Prejudice is a topic of major interest to psychologists and sociologists but had rarely been given the broad treatment its importance demanded Originally published in 1985 this title first introduces the term showing how it is related to other terms commonly used in psychology and the social sciences and explains simply and clearly what a scientific analysis must involve It then goes on to show how prejudice affects our reasoning and judgement in a wide variety of spheres in addition to race or ethnic attitudes Next it traces the development of prejudiced attitudes towards black people in Britain and the New World through the slave system and the slave trade with a brief look at the remarkably similar development of ethnic attitudes in South Africa at the time It then goes on to discuss the debate about race differences in intelligence showing simply and clearly what the statistical assumptions underlying the heritability hypothesis are Following that the psychological explanation of prejudice and principles explaining prejudice are spelled out the question of sex prejudice is dealt with and finally the extent of ethnic prejudice in Britain and the USA is discussed The final chapter is a summary of the general principles and conclusions discussed through the book This title provides a scientific and historical perspective on prejudice a thorough literature review and clear summarising principles of prejudice in a simple and straightforward style **Race, Social Class, and Individual Differences in I. Psychology Joseph R. Royce, Leendert P. Mos, 2013-11-11 As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals A major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is eliciting appropriate commentary If this format is to succeed the commentary must be both engaging to the reader and satisfying to the author It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication Nevertheless we do invite readers commentaries on published materials The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and advanced his views elsewhere in print K B Madsen and Joseph Rychlak submitted their manuscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982 We are grateful to our contributors for their expressed commitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground **Studying Correlations between Genetic**
