Best Books for Children Catherine Barr, 2006 Contains more than 25 000 titles of books recommended for children in grades K 6 Sustainability and the American Naturalist Tradition Craig Thomas, 2018-03-15 Humanity is failing at solving complex socio ecological problems like global climate change biodiversity loss and population growth The existing sustainable development paradigm and its reliance on trade offs between the three pillars of environment economics and equity is not robust enough to maintain global carrying capacity In this timely intervention Thomas argues that the holistic and transdisciplinary thinking of four iconic American naturalists Henry David Thoreau Aldo Leopold Rachel Carson and Edward O Wilson can instead help to solve our biggest twenty first century challenges by synthesizing values from four eras of cultural and environmental history *Towards Fairer Geo-Spiritual Ecosystems* S. Sergio Saleem Scatolini, 2024-11-26 This edited book looks at society education language and spirituality through international multicultural and critical lenses As the elite now eye the colonisation of biology and outer space we must surmount narratives subservient to privilege and power which explains the book s decolonial agenda The rise of AI and biotechnologies has opened the door to a future where the place of humanity and human intelligence in the universe will be understood and experienced differently Evolution shall move beyond natural human intelligence and biology If we want more inclusive fair and sustainable futures we must articulate new narratives and spiritualities that can harmonise science technology and religious wisdom But to re evaluate

the human self and society and their intersection with the non human world we must recognise and neutralise the underlying currents of privilege and power in education language and religion
