Always, Rachel Rachel Carson, Dorothy E. Freeman, 2022-03-08 These letters between the pioneering environmentalist and her beloved friend reveal a vibrant caring woman behind the scientist Los Angeles Times Rachel Carson author of *The Silent Spring* has been celebrated as the pioneer of the modern environmental movement Although she wrote no autobiography she did leave letters and those she exchanged sometimes daily with Dorothy Freeman some 750 of which are collected here are perhaps more satisfying than an account of

her own life In 1953 Carson became Freeman's summer neighbor on Southport Island ME The two discovered a shared love for the natural world their descriptions of the arrival of spring or the song of a hermit thrush are lyrical but their friendship quickly blossomed as each realized she had found in the other a kindred spirit To read this collection is like eavesdropping on an extended conversation that mixes the mundane events of the two women's family lives with details of Carson's research and writing and later her breast cancer Few who read these letters will forget these remarkable women and their even more remarkable bond Publishers Weekly Darting fresh sensuous pleasingly elliptical at times these letters also serve to tether the increasingly deified Carson firmly to earth just where she'd want to be Kirkus Reviews starred review It is not often that a collection of letters reveals character emotional depth personality indeed intellect and talent as well as a full biography might these letters do all that The New York Times Book Review Provides insight into the creative process and a look into the daily lives of two intelligent perceptive women whose family responsibilities were at times almost crushing Library Journal Dotted with vivid observations of the natural world and perceptive commentary on friendship family fame and life itself Always Rachel will appeal to readers interested in biography and women's studies as well as those drawn to nature writing and the history of the environmental movement Booklist Online

On a Farther Shore William Souder, 2012 Rachel Carson founder of the modern environmental movement began work on her seminal book *Silent Spring* in the late 1950s when a dizzying array of synthetic pesticides had come into use Leading this chemical onslaught was the insecticide DDT Effective against crop pests as well as insects that transmitted human diseases such as typhus and malaria DDT had at first appeared safe But as its use expanded alarming reports surfaced of collateral damage to fish birds and other wildlife *Silent Spring* was a chilling indictment of DDT and its effects and it shocked the public and forced the government to take action despite a withering attack on Carson from the chemicals industry The book awakened the world to the heedless contamination of the environment and eventually led to the establishment of the Environmental Protection Agency and to the banning of DDT and a host of related pesticides

[Literature, Writing, and the Natural World](#) James Guignard, T. P. Murphy, 2020-06-12 The English Association of Pennsylvania State Universities held its annual meeting in 2006 at Mansfield University in Pennsylvania The conference theme was Literature Writing and the Natural World This collection grows out of the conference and indicates the desire to understand all aspects of our relationship with the natural world the function of literature in clarifying that relationship in ways science and politics cannot and the role of the literature teacher scholar wanting to respond to pressures of environmental change In these times interpretation is a vital task not only for the way it educates us about our attitudes toward nature but because it develops the crucial skills of looking closely engaging reflecting and responding One could argue that as a culture Americans are behind the curve in understanding the ways we depend upon a healthy relationship with nature and one way among many depends upon examining it through texts and textual representation When the writers here dig into *The Main Woods* Jayber Crow the poetry of Pablo Guevara or the movie *Crash* they are contributing to our understanding of the ways in which we view nature and how that view plays a role in the way we relate to nature These days many disciplines engage global warming and other environmental issues routinely and the literature classroom should be no different Just as we read a book and address fundamental themes such as What does it mean to love or How do we develop identity we should also be asking What is my responsibility when I decide what resources to use If we understand literature as equipment for living in a warming world we may be able to help students make some sense out of their world and some decisions about how to act *Methodological Challenges in Nature-Culture and Environmental History Research* Jocelyn Thorpe, Stephanie Rutherford, L. Anders Sandberg, 2016-11-10 This book examines the challenges and possibilities of conducting cultural environmental history research today Disciplinary commitments certainly influence the questions scholars ask and the ways they seek out answers but some methodological challenges go beyond the boundaries of any one discipline The book examines how to account for the fact that humans are not the only actors in history yet dominate archival records how to attend to the non visual senses when traditional sources offer only a two dimensional non sensory version of

the past how to decolonize research in and beyond the archives and how effectively to use sources and means of communication made available in the digital age This book will be a valuable resource for those interested in environmental history and politics sustainable development and historical geography *Circles and the Cross* Loren Wilkinson, 2023-08-21

Circles and the Cross is an invitation to explore two mysteries One is the miracle of the cosmos why is there something and not nothing The other is the miracle of consciousness why should this collection of stardust be an I and not just an it Our basic response to those mysteries is wonder and from wonder have grown the three great trees of human culture religion art and science This exploration is undertaken in the light of a third mystery the cross of Christ is the clearest picture we have of the triune Creator of both cosmos and consciousness That self emptying of the Creator out of love for the creation helps us understand the pleasures paradoxes and pains of science it helps us understand how evolution can be another name for creation it casts light on the Enlightenment and Romanticism In particular it illuminates the environmental movement an ethic in search of a religion Loren Wilkinson drawing on fifty years of teaching and writing about our relationship to creation invites you to join this journey into understanding how the cross of Christ sheds light on the mysteries that surround us and gives us hope in a difficult age *20th Century Americans* ,2000 *Loving Nature, Fearing the State* Brian Allen Drake, 2013-11-01

A conservative environmental tradition in America may sound like a contradiction in terms but as Brian Allen Drake shows in *Loving Nature Fearing the State* right leaning politicians and activists have shaped American environmental consciousness since the environmental movement s beginnings In this wide ranging history Drake explores the tensions inherent in balancing an ideology dedicated to limiting the power of government with a commitment to protecting treasured landscapes and ecological health Drake argues that antistatist beliefs an individualist ethos and a mistrust of government have colored the American passion for wilderness but also complicated environmental protection efforts While most of the successes of the environmental movement have been enacted through the federal government conservative and libertarian critiques of big government environmentalism have increasingly resisted the idea that strengthening state power is the only way to protect the environment *Loving Nature Fearing the State* traces the influence of conservative environmental thought through the stories of important actors in postwar environmental movements The book follows small government pioneer Barry Goldwater as he tries to establish federally protected wilderness lands in the Arizona desert and shows how Goldwater s intellectual and ideological struggles with this effort provide a framework for understanding the dilemmas of an antistatist environmentalism It links antigovernment activism with environmental public health concerns by analyzing opposition to government fluoridation campaigns and investigates environmentalism from a libertarian economic perspective through the work of free market environmentalists Drake also sees in the work of Edward Abbey an argument that reverence for nature can form the basis for resistance to state power Each chapter highlights debates and tensions that are important to understanding environmental history and the challenges that face environmental
