Regional Dynamics Of Language Differentiation In Belgium A Study In Culturalpolitical Geography:

The Regional Dynamics of Language Differentiation in Belgium Alexander B. Murphy, Jeffrey A. Gritzner, 1988

Routledge Library Editions: Political Geography Various, 2021-06-23 From votes to strikes to street violence politics is intrinsically geographical Many of the books in this set originally published between 1964 and 1990 illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities

Regional Worlds: Advancing the Geography of Regions Martin Jones, Anssi Paasi, 2017-10-02 A key concern in the debate and empirical research on the geography of regions is the evolution of the conceptualizations and practical uses of the idea of region This idea prioritises both the intellectual and the practical development of regional studies This book drives the discussion further It stresses the complex forms of agency advocacy involved in the production and reproduction of regional spaces and space of regionalism as well as the importance of geohistory and context The book moves beyond the territorial relational divide that has characterized debates on regions and regional borders since the 1990s The contributors answer key questions from different conceptual and concrete contextual angles and to motivate readers to reflect on the perpetual significance of regional concepts and how they are mobilized by various actors to maintain or transform the contested spatialities of societal power relations This book was based on a special issue of Regional Studies

Restructuring the European State Paolo

Dardanelli, 2017-12-12 Since 1950 devolution reforms have been widespread across Western Europe leading to constitutional transformation in Belgium Italy Spain and the United Kingdom as well as the potential for state breakup as witnessed by independence referendums in Scotland and Catalonia Over the same period European integration has transferred power upwards to what is now the European Union The simultaneous occurrence of these seemingly contradictory trends raises fundamental questions Is state restructuring a uniform process Has it been fuelled by European integration and if so how Restructuring the European State uses a comparative analysis to present a systematic investigation of the connections between European integration and state restructuring Paolo Dardanelli argues that there are two distinct dynamics of state restructuring bottom up where one or more regions demand self government and top down where the central government decides to devolve power Through quantitative analyses of thirteen key phases of state restructuring in Belgium Denmark France Italy Spain and the United Kingdom he shows that European integration has a powerful influence only in bottom up

cases Dardanelli points to a striking paradox of integration whereby an ethos of Europe growing ever closer to union has become associated with fragmentation divergence and increased complexity rather than a seamless system of multilevel governance Innovative and rigorously researched Restructuring the European State marks a major advance in our understanding of contemporary European politics

Dividing the Land Edward T. Price, 1995-04-15 Many property lines drawn in early America still survive today and continue to shape the landscape and character of the United States Surprisingly though no one until now has thoroughly examined the process by which land was divided into private property and distributed to settlers from the beginning of colonization to early nationhood In this unprecedented study Edward T Price covers most areas of the United States in which the initial division of land was controlled by colonial governments the original thirteen colonies and Maine Vermont Kentucky West Virginia Tennessee Louisiana and Texas By examining different land policies and the irregular pattern of property that resulted from them Price chronicles the many ways colonies managed land to promote settlement develop agriculture defend frontiers and attract investment His analysis reveals as much about land planning techniques carried to America from Europe as innovations spurred by the unique circumstances of the new world Price's analysis draws on his thorough survey of property records from the first land plans in Virginia in 1607 to empresario grants in Texas in the 1820s This breadth of data allows him to identify regional differences in allocating land assess the impact of land planning by historical figures like William Penn of Pennsylvania and Lord Baltimore of Maryland and trace changes in patterns of land division and ownership through transfers of power among Britain the Netherlands France Spain Mexico and the Republic of Texas

Defending French in Flanders, 1873-1974 David J. Hensley, 2023-12-28 This book examines the efforts of the French speaking minority in Flanders Belgium to maintain a legal and social presence of the French language in Flemish public life Chronologically the study is bookended by two developments almost exactly a century apart In 1873 the first laws were passed which required the use of Dutch in some aspects of public administration in Flanders challenging the de facto use of French among the Flemish ruling class One hundred and one years later the last French daily newspaper in Flanders collapsed marking the end of a once vibrant French language public sphere in Flanders The author contends that the methods and arguments by which French speakers defended the role of French in Flemish public life changed along with the social and political situation of this minority As the Flemish movement grew over the course of the twentieth century French speakers appeals to the free choice of language lost traction and they put forward claims that they represented an ethnolinguistic minority who deserved protection for their mother tongue Providing new insights for scholars of European history and in conversation with the literature on liberalism national identity and Francophonie this book demonstrates how the debate over the role of French in Flanders was at the center of Belgium's ethnolinguistic conflict the repercussions of which continue to be felt to this day

Calvinists Incorporated Anne Kelly Knowles, 1997-02 Bringing immigrants onstage as central players in the drama of rural capitalist transformation Anne Kelly Knowles traces a community of Welsh immigrants to Jackson and Gallia counties in southern Ohio After reconstructing the gradual process of community building Knowles focuses on the pivotal moment when the immigrants became involved with the industrialization of their new region as workers and investors in Welsh owned charcoal iron companies Setting the southern Ohio Welsh in the context of Welsh immigration as a whole from 1795 to 1850 Knowles explores how these strict Calvinists responded to the moral dilemmas posed by leaving their native land and experiencing economic success in the United States Knowles draws on a wide variety of sources including obituaries and community histories to reconstruct the personal histories of over 1 700 immigrants The resulting account will find appreciative readers not only among historical geographers but also among American economic historians and historians of religion

Secessionism and the European Union Glen M.E. Duerr, 2015-10-30 Secessionist also called nationalist or pro independence political parties exist in many countries in the developed world they raise and then spend a lot of money win votes in elections and their elected officials serve in seats in local regional and national parliaments Yet despite all of this effort there has not been a successful case of secession since 1921 when the Irish Free State effectively seceded from the United Kingdom UK Perhaps the biggest issue is that these secessionist political parties have rarely been popular enough to form a government even amongst their core ethnic group This is further compounded by the fact that secessionist parties have historically been unable to win support from immigrants or people outside their core ethnic and or linguistic group Given this context four central questions are posed in this study including whether and also why any of the secessionist parties have transitioned from ethnic based to civic based policy platforms Why have these

secessionist parties not yet achieved independence And what role does the European Union EU play in facilitating or deterring secession in independence seeking regions within member states This study examines three different cases Flanders in Belgium Scotland in the UK and Catalonia in Spain to investigate how secessionist political parties are approaching the issue of independence All of the cases are different with respect to history governmental structure and economic situation Yet all of the cases are similar in some ways they are close to the same size in terms of population operate within mature democratic political systems have distinct secessionist political parties and all reside within member states of the EU Categorically in all cases there are also shared influences of the ability of the region to secede institutions interests and ideas

The Minorities of Cyprus Nicholas Coureas, Marina Elia, Andrekos Varnava, 2009-05-27 This book examines the various minorities living in the island of Cyprus from the early modern late Venetian and early Ottoman period down to the present day It charts their history with special emphasis on their relations with the powers ruling Cyprus and with the two dominant Christian Greek and Muslim Turkish communities The theme running through the book is that despite being significant members of Cyprus society the three historical minorities Maronites Armenians and Latins were only included in society to a certain extent by the two major communities This was formalised in the post independence 1960 period when they were compelled to become members of either dominant community and thus they suffered internal exclusion by being regarded as religious sub groups of one of the two dominant communities rather than national minorities in their own right Within this general context the social legal and political roles customs culture and language of the various minorities are examined as they evolved through time and in response to internal and external developments affecting Cyprus in the political economic and global spheres They are discussed not as static entities but as evolving groups that have adapted with greater or lesser degrees of success to the radical and at times painful changes Cyprus has undergone especially over the last 150 years in all walks of life Finally the question of what the future holds for the minorities of the island in the light of Cyprus EU membership and the prospect of reunification are also analysed This book is a product of the conference Minorities of Cyprus Past Present and Future which was held on 24 and 25 November 2007 at the European University Cyprus

The Belgian Army and Society from Independence to the Great War Mario

Draper,2018-02-13 This book explores Belgian state building through the prism of its army from independence to the First World War It argues that party politics which often ran along geographical linguistic and religious lines prevented both Flemings and Walloons from reconciling their regional identities into a unified concept of Belgian nationalism Equally it obstructed the army from satisfactorily preparing to uphold Belgium's imposed neutrality before 1914 Situated uneasily between the two powerhouses of nineteenth century Europe Belgium offers a unique insight into the concepts of citizenship and militarisation in a divided society in the era of fervent nationalism By examining the composition experience and image of the army's officer corps and rank and file as well as those of the auxiliary forces this book shows that although military and civilian society often stood aloof from one another the army as a national institution offered a fleeting glimpse into the dichotomy that was pre war Belgium

Urban Regimes and Strategies A. G. Papadopoulos,1996-11-15

If a city based its planning decisions on the needs of an international bureaucracy rather than on the traditional needs of local residents and businesses how would that city change Alex G Papadopoulos addresses this question with a detailed study of how the nineteenth century quarters of Leopold and Nord Est in Brussels have been transformed materially and functionally since the European Communities decided to locate their administrative headquarters there in 1957 Drawing on game and rational choice theories spatial analysis and urban morphology studies Papadopoulos analyzes how the landscape of Brussels's center has evolved over the last three decades under the influence of successive coalitions of local and foreign elites He describes how international real estate developers form ephemeral flexible and specialized regimes of cooperation with governmental organizations at all levels and with special interest lobbies to carry out major urban projects while local neighborhood groups conservationists and political factions such as the Green Party oppose them with qualitatively similar regimes of resistance
