Location Theory Jacques-François Thisse, Kenneth John Button, Peter Nijkamp, 1996 In recent years a growing number of social scientists have become increasingly interested in the study of location problems This interest has been fostered by the integration of national economies within broader spaces such as the EU or NAFTA as well as by their impact on the development of regions and cities Another important reason for this attention is the growing awareness among economists that a comprehensive economic theory can no longer put space aside Most economic activities are distributed over space and for such activities space moulds the very nature of competition between firms This major collection of classic articles demonstrates the important contribution of location theory and will be an essential source of reference for students or researchers of modern regional science or economic theory **The Middle East** Arda Özkan, Pinar Yürür, 2024-08-06 The Middle East Crises Conflicts and Wars aims to evaluate the Middle East through international politics with diverse theoretical frameworks Chapters have been written by many contributors who explore the Middle East from multiperspectives The scope of this book is very comprehensive and many relevant issue areas are examined In addition to focusing on the different perspectives of international relations current problems are considered especially in the axis of classic modern and post modern security studies The main issues of Syria Lebanon Qatar Saudi Arabia Iran Iraq the UAE Jordan Palestine Kuwait Oman Yemen Bahrain Israel and Turkey are included Maritime disputes the Arab Spring energy transfer migration the EU hydro politics Green Sukuk green Islamic bond youth policies and strategic investments in the Middle East are a number of the topics examined **Global Competition and Local Networks** Rod B. McNaughton, 2018-02-06 This title was first published in 2002 The interest in becoming globally competitive through network strategies particularly networks between small and medium sized firms in local business communities is high among academic researchers economic development agencies and growth orientated firms Important contributions to our

understanding of the strategic use of networks are coming from a number of disciplinary and theoretical perspectives This volume provides a unique opportunity to both synthesize this diverse literature and report the results of original research It is particularly relevant to scholars of business and management geography and economics **Subject Guide to Books in Print** ,2001 **Transport and Land Use** Joseph Berechman,1996 This collection includes both classical and recent papers that explore the complex interrelationships between transport land use and the spatial organization of metropolitan areas Since land use planning and transportation planning play a major role in shaping these relationships special attention is given to studies on planning issues and policies Whilst one section of the collection features papers written in the tradition of urban economics the main emphasis is on studies which examine the impact of various changes in transportation systems on land use **American Book Publishing Record** ,2003 **Islam, IS and the Fragmented State** Anoushiravan Ehteshami,Amjed Rasheed,Juline Beaujouan,2020-07-02 This book provides a pioneering and original study of the regional effects of political Islam It sets out the multifaceted interactions between Islam and politics in the Middle East and North Africa MENA region focussing in particular on the so called Islamic State IS organization in its broad discussion of political Islam Utilizing a trans disciplinary perspective the book interacts with social constructivism and complex realism theories to analyse the clash between the modern notion of the state and that of identity in the region Looking at issues such as the rise of IS and its attempts to establish a caliphate the book offers three different yet complementary levels of analysis for its discussion These being Regional dis order the erosion of state power and its boundaries and the role of non state actors in shaping the politics of the MENA region Each of these levels are addressed in detail in turn in order to build a comprehensive picture of state and political Islam in the Arab core of the MENA region What emerges is a comprehensive analysis of the interlinked relationships between political and Islamic elements of Arab polities and societies As such this book will be of great interest to academics and policymakers focusing on matters relating to the study of Islam Islam and politics study of religion more broadly and security studies and area studies particularly in the MENA region **New Geopolitics** Michael Don Ward,2022-02-16 First Published in 1992 This volume focuses upon the synergy between geography and international politics A new geopolitics is developed bringing together the insights of political geography and international relations In each chapter leading scholars focus on the spatial context through which contemporary world politics are conducted War conflict cooperation state building and power are examined in a geopolitical context **Fault Lines** Giacomo Parrinello,2015-05-01 Earth s fractured geology is visible in its fault lines It is along these lines that earthquakes occur sometimes with disastrous effects These disturbances can significantly influence urban development as seen in the aftermath of two earthquakes in Messina Italy in 1908 and in the Belice Valley Sicily in 1968 Following the history of these places before and after their destruction this book explores plans and developments that preceded the disasters and the urbanism that emerged from the ruins These stories explore fault lines between rural and urban backwardness and development and
