Regional Conflict Management:

Regional Conflict Management Paul Francis Diehl, Joseph Lepgold, 2003 This collection of original essays is one of the first to examine the implications and efficacy of regional conflict management in the new world order **Handbook of Regional Conflict Resolution Initiatives in the Global South** Jeronimo Delgado-Caicedo, 2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People's Republic of China India Brazil or South Africa in the decision making process in today's world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country's involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives **From Confrontation to Cooperation** Jay Rothman, 1992-07-28 This book explores the roots of transformations in world politics and suggests how the art and science of conflict resolution may be used to guide these changes in constructive and peaceful ways The author proposes that a new emphasis or more precisely a corrective to the power politics approach should prevail in the study and practice of international relations and diplomacy Using the example of the Israeli Palestinian conflict the author presents a methodology for intergroup and international conflict management analysis training policy making and intervention Comparative cases are also included to help readers build upon the approaches suggested for their own educational and peacemaking activities Regional Cooperation and Conflict Management Niklas Swanström, 2002 Regional cooperation is increasingly important as a means to create peaceful relations

and improve economic development The problem today is not to initiate cooperation but rather how to handle disputes and maintain good relations This is done through conflict management mechanisms CMMs in most regional cooperation structures However the interaction between such structures and regional conflict management mechanisms is not sufficiently examined and as a result no coherent theoretical model that could explain this interaction has been constructed This has meant that in many cases the interaction is incorrectly assumed with negative social and economic outcomes

Conflict Management, Security and Intervention in East Asia Jacob Bercovitch, Kwei-Bo Huang, Chung-Chian Teng, 2008-05-07 This edited volume examines the sources manifestations and management of conflict in East Asia which contains many of the worlds conflict flashpoints such as the Korean Peninsula and the China Taiwan Strait In particular the book will elaborate on the following themes general and NGO approaches to third party mediation in conflict situations r

Regional Peacemaking and Conflict Management Carmela Lutmar, Benjamin Miller, 2015-11-06 This volume examines mechanisms for regional peacemaking and conflict management in Europe and the Middle East To date little research has been devoted to uncovering the conditions for peace and the factors that contribute to stabilizing the state of peace This volume assesses the factors that contribute to regional pacification the incentives that motivate states in establishing peaceful relations and most importantly how regions become peaceful It discusses the conditions under which various types of peace might emerge on a regional level and the factors most likely to determine the outcome The book takes an innovative approach through a systematic comparison of two regions that are particularly prominent and important for the subject of regional pacification Europe and the Middle East While many believe that the European case is the indispensable model for peacemaking others believe that these two regions are too different for Europe to be a useful framework for the Middle East This volume occupies a middle ground between these two extreme positions It argues that while a mindless copying of European models will not lead to peace in the Middle East important insights can be gained from the most successful case of regional peacemaking to date This work will be of much interest to students of regional security peacemaking conflict management Middle East politics European security and IR in general

Cold War as Cooperation Roger E. Kanet, Edward A. Kolodziej, 1991-06-18 A study of superpower co operation since World War II this book examines the regulation of USA USSR rivalry and outlines the power of regional states to constrain and manipulate them for their own interests

Managing Regional Conflict Robert Miller, 1987 **Sovereignty as Responsibility** Francis M. Deng, Sadikiel Kimaro, Terrence Lyons, 2010-12-01 The authors assert that sovereignty can no longer be seen as a protection against interference but as a charge of responsibility where the state is accountable to both domestic and external constituencies In internal conflicts in Africa sovereign states have often failed to take responsibility for their own citizens welfare and for the humanitarian consequences of conflict leaving the victims with no assistance This book shows how that responsibility can be exercised by states over their own population and by other states in assistance to their fellow sovereigns Sovereignty as

Responsibility presents a framework that should guide both national governments and the international community in discharging their respective responsibilities. Broad principles are developed by examining identity as a potential source of conflict, governance as a matter of managing conflict and economics as a policy field for deterring conflict. Considering conflict management, political stability, economic development and social welfare as functions of governance, the authors develop strategies, guidelines and roles for its responsible exercise. Some African governments such as South Africa in the 1990s and Ghana since 1980 have demonstrated impressive gains against these standards while others such as Rwanda, Somalia, Liberia, Nigeria and Sudan have failed. Opportunities for making sovereignty more responsible and improving the management of conflicts are examined at the regional and international levels. The lessons from the mixed successes of regional conflict management actions such as the West African intervention in Liberia, the East African mediation in Sudan and international efforts to urge talks to end the conflict in Angola indicate that friends and neighbors outside the state in conflict have important roles to play in increasing sovereign responsibility. Approaching conflict management from the perspective of the responsibilities of sovereign.

Regional Cooperation and Conflict Management Niklas Swanström, 2002. Regional cooperation is increasingly important as a means to create peaceful relations and improve economic development. The problem today is not to initiate cooperation but rather how to handle disputes and maintain good relations. This is done through conflict management mechanisms (CMMs) in most regional cooperation structures. However, the interaction between such structures and regional conflict management mechanisms is not sufficiently examined and as a result, no coherent theoretical model that could explain this interaction has been constructed. This has meant that in many cases, the interaction is incorrectly assumed with negative social and economic outcomes.

Regional Organizations and Peacemaking Peter Wallensteen, Anders Björner, 2014-08-21. This book analyses the new and difficult roles of regional organizations in peacemaking after the end of the Cold War and how they relate to the United Nations. UN Regional organizations have taken an increasingly prominent role in international efforts to deal with international security. The book highlights the complex interaction between the regional and sub-regional organizations on the one hand and their relations with the United Nations on the other. Thus, the general issues of UN and its authority are scrutinized from legal, practical and geopolitical perspectives. Taking on a broad geographical focus on Africa, the Arab world and Europe, the book also provides an extensive range of case studies with detailed analysis of particular situations, organizations and armed conflicts. The authors scrutinize the heterogeneous relationship between the different organizations as well as the challenges to them: political resources, legal standing, financial assets, capabilities and organizational set up. Moreover, they investigate whether regional organizations as compared to the UN are better suited to deal with today's intra-state conflicts. The book also aims to dissect the evolution of these institutions historically in relation to Chapter VIII of the UN Charter which mentions the resort to regional arrangements for conflict management as well as more generally in relation to the principles of international law and UN

principles of peacemaking This book written by a mixture of established scholars diplomats and high level policymakers will be of great interest to students as well as practitioners in the field of peace and conflict studies regional security international organisations conflict management and IR in general *Resolving Regional Conflicts* Roger E. Kanet,1998 The end of the cold war has not meant an end to conflict around the world Disagreements still exist and discord continues to erupt into battles In *Resolving Regional Conflicts* twelve scholars present a broad introduction to the issue of discord within and between nations exploring models by which emerging security problems can be analyzed and looking at specific conflicts and the ways they are being handled *Regional Security* Rodrigo Tavares,2009-12-16 This book is the first systematic study of the capacities of the most recognized intergovernmental organizations with a security mandate **The OAU (AU) and OAS in Regional Conflict Management** Thomas A. Imobighe,2003 This study analyses the pervasive and apparently intractable intensification of conflict around the world in the wake of the Cold War and the failures and limitations of multilateral organisations such as the UN and the African Union to achieve their stated objectives It makes recommendations so that these organisations can make more assertive and positive contributions to conflict reduction Specifically on the OAU AU the author illustrates that the African Union is not fundamentally different from its predecessor and that both have failed to implement practical measures designed to build confidence and regional integration which he argues must be an essential component of conflict prevention and peace building The author is an expert in International Relations and Director of the Centre for Strategic and Development Studies Ambrose Alli University Ekpoma Nigeria *African Reckoning* Francis M. Deng, Terrence Lyons,2001-06-07 This book investigates how changing norms of sovereignty may promote better governance in Africa It begins by tracing the evolution of the concept of sovereignty and how in the post Cold War era sovereignty has been redefined to emphasize the responsibility of the state to manage conflict and protect human rights African Reckoning includes assessments of how state actors in Africa measure up to the norms inherent in the notion of sovereignty as responsibility The book also examines the question of accountability at the regional and international levels The authors conclude that since the power of oppressed people to hold their governments accountable is very limited the international community has a responsibility to provide victims of internal conflict and gross violations of human rights with essential protection and assistance Accordingly the book expounds on the normative principles of responsible sovereignty international mechanisms and strategies for their enforcement and empirical evidence about the performance of governments as measured by the requirements of responsible sovereignty Contributors include Richard Falk Abdullahi Ahmed An Na im James Rosenau Goran Hyden Michael Chege and John D Steinbruner *Regional Organizations and Peacemaking* Peter Wallensteen, Anders Björner,2014-08-21 This book analyses the new and difficult roles of regional organizations in peacemaking after the end of the Cold War and how they relate to the United Nations UN Regional organizations have taken an increasingly prominent role in international efforts to deal with international security The book highlights the complex

interaction between the regional and sub regional organizations on the one hand and their relations with the United Nations on the other. Regional Orders David A. Lake, Patrick M. Morgan, 2010-11. Conflict among nations for forty five years after World War II was dominated by the major bipolar struggle between the United States and the Soviet Union. With the end of the Cold War, states in differing regions of the world are taking their affairs more into their own hands and working out new arrangements for security that best suit their needs. This trend toward new regional orders is the subject of this book which seeks both to document the emergence and strengthening of these new regional arrangements and to show how international relations theory needs to be modified to take adequate account of their salience in the world today. Rather than treat international politics as everywhere the same or each region as unique, this book adopts a comparative approach. It recognizes that while regions vary widely in their characteristics, comparative analysis requires a common typology and set of causal variables. It presents theories of regional order that both generalize about regions and predict different patterns of conflict and cooperation from their individual traits. The editors conclude that in the new world of regional orders, the quest for universal principles of foreign policy by great powers like the United States is chimerical and dangerous. Regional orders differ and policy must accommodate these differences if it is to succeed. Contributors are Brian L. Job, Edmund J. Keller, Yuen Foong Khong, David A. Lake, Steven E. Lobell, David R. Mares, Patrick M. Nlotgan, Paul A. Papayoanou, David J. Pervin, Philip G. Roeder, Richard Rosecrance and Peter Schott. Susan Shirk, Etel Solingen and Arthur A. Stein.

Regions and Development Sheila Page, 2020-12-15. At the 1996 EADI Conference, the papers presented in the World Trade and Trade Policy workshop looked at the new trends in regionalism from a variety of points of view for different institutions. They considered the effects of regions, their implications for policy and performance in the developing countries and for international economic institutions and tried to interpret them in terms of economic and political theory.

European 'Security' Governance George Christou, Stuart Croft, 2014-06-11. This book argues that we can

understand and explain the EU as a security and peace actor through a framework of an updated and deepened concept of security governance It elaborates and develops on the current literature on security governance in order to provide a more theoretically driven analysis of the EU in security Whilst the current literature on security governance in Europe is conceptually rich there still remains a gap between those that do security governance and those that focus on security per se A theoretical framework is constructed with the objective of creating a conversation between these two literatures and the utility of such a framework is demonstrated through its application to the geospatial dimensions of EU security as well as specific cases studies in varied fields of EU security This book was originally published as a special issue of European Security

Controlling Latin American Conflicts Michael A. Morris, 2019-03-04 Latin America remains a turbulent region characterized by conflict and increased militarization despite the existence of regional juridical mechanisms for controlling disputes In this book scholars from both Latin and North America collaborate in presenting ten original approaches to containing and resolving conflict in the region Stressing the need to closely link contemporary approaches to conflict management with the Latin American legalistic tradition they examine a broad scope of mechanisms ranging from confidence building measures to arms control agreements This book is the first systematic attempt to survey arms control and to generate approaches for controlling conflicts in Latin America Ten original approaches to containing and resolving conflict in Latin America are developed in the successive chapters of this volume
