Townsend, 2024-09-18 Rich industrialised countries entered the 1980s with unemployment higher than before the Second World War Britain experienced the impact of recession more immediately and sharply over one million factory jobs were lost Originally published in 1983 and now reissued with a new Preface by the author this book points to the industries corporations and places in which job losses occurred between 1976 and 1981 The Impact of Recession opens with an examination of national trends which includes the post war rise and fall of manufacturing employment and the fashionable concept of de industrialisation It considers the possible and actual roles of leading industrial corporations in distributing decline to different areas The effects of the crisis on individual regions is examined in detail and the author emphasizes that it is not only the traditional areas of recession such as the North East that were affected but also

the manufacturing centres of the Midlands and the normally prosperous South East Alternative explanations of the distribution of employment are examined and the adequacy of previous explanations of unequal growth and decline are questioned The book also looks at the extent to which New Towns have suffered in the crisis and whether the well established consensus about the merits of regional planning has been broken down by the recession

**The UK Regional-National Economic Problem** Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England

and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

*Modern Britain* Trevor Noble, 1975

**English Folk Poetry** Roger deV. Renwick, 2016-11-11 Drawing on the long tradition of folklore study Roger deV. Renwick examines three genres traditional English folksongs local songs of regional interest and working class poetry In the span of time that extends from the eighteenth to the twentieth century he finds govern world views underlying a large sampling of poems related by common language imagery or topic and then shows how these world views relate to the everyday lives and beliefs of the poetry's makers and users There is in addition a pattern of historical continuity that links the rural folksongs of the eighteenth century with the part rural part urban local songs of the nineteenth and twentieth centuries and with the fully urban working class poetry of the present day English Folk Poetry is an immensely important contribution to folklore scholarship in its examination of contemporary working class poetry in its approach to questions of tacit meaning and in its exploration of the relationship of inferential meanings to real everyday lives

*Ecclesiastical Lordship, Seigneurial Power and the Commercialization of Milling in Medieval England* Adam Lucas, 2016-04-29 This is the first detailed study of the role of the Church in the commercialization of milling in medieval England Focusing on the period from the late eleventh to the mid sixteenth centuries it examines the estate management practices of more than thirty English religious houses founded by the Benedictines Cistercians Augustinians and other minor orders with an emphasis on the role played by mills and milling in the establishment and development of a range of different sized episcopal and conventual foundations Contrary to the views espoused by a number of prominent historians of technology since the 1930s the book demonstrates that patterns of mill acquisition innovation and exploitation were shaped not only by the size wealth and distribution of a house's estates but also by environmental and demographic factors changing cultural attitudes and legal conventions prevailing and emergent technical traditions the personal relations of a house with its patrons tenants servants and neighbours and the

entrepreneurial and administrative flair of bishops abbots priors and other ecclesiastical officials      Regional Policies and Comparative Advantage B"rje Johansson,Charlie Karlsson,Roger Stough,2002-01-01 This title analyzes the conception of economic development in modern regions which has gone through a fundamental change since the early 1980s Regions are today increasingly looked upon as independant market places that are connected via interregional and international trade and not as administrative units embodied in a national state Two complementary theoretical frameworks explain the specialization of economic activity at the regional level The traditional approach assumes that the comparative advantages of regions depend upon differences in the supply of lasting resources In contrast the newer complementary framework called the new economic georgraphy assumes that the dynamic interaction between geographical market potentials and rational firms in its own way creates the comparative advantage of regions The book examines the policy implications of the complementarity of the competing views in a variety of geographic and functional contexts      *Small Firms in Urban and Rural Locations* James Curran,David J. Storey,2016-07-15 When originally published in 1993 this book was one of the first to present a systematic comparison of small enterprises in both urban and rural areas in contemporary Britain Key issues such as relative performance levels and the relevance of recent developoements to the economy as a whole are discussed by well known contributors Throughout insights derived from dialogues with real entrepreneurs are provided An internatinal dimension is added with a comparative discussion of the problems of rurality suffered in many areas of North America and Europe and the continuing effects of the recession of the late 80s and early 90s are also examined and important policy recommendations made      **Library of Congress Catalog** Library of Congress,1970      **The Urban and Regional Transformation of Britain** John Goddard,Anthony Champion,2018-05-30 Originally published in 1983 The Urban and Regional Transformation of Britain analyses economic and social changes recorded across the cities and regions of Britain since the Barlow Report The collection analyses the whole country at a more detailed scale than the ten Standard Regions for which most official statistics are produced Although there are important differences between the major regions of Britain many of the recent processes of change appear to have operated at a local level within rather than between regions The essays in this volume bring together change at the regional and local labour market scales and provides a comprehensive statement of urban and regional change seeking to highlight the new spatial priorities of the 1980s
