Frontiers of Knowledge is the story of unfolding developments that are revolutionizing our understanding of ourselves and our place in the universe We are birthing a new era in which our ideas about the nature and source of reality are swiftly changing Insights from quantum physics suggest that the basis of our physical world is actually mental conscious thoughts Other discoveries are causing us to redefine our concepts of mind and the elusive thing we call consciousness All strongly hint that spirituality is the underlying source of everything Frontier scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge through systematic investigations of startling phenomena that have been observed in quantum physics cosmology biology psychology disease and healing death near death experiences reincarnation experiences and those occurring in spiritual hypnosis on the nature of the spiritual realm New concepts of reality are especially needed to explain the incredibly finetuned characteristics and the mysterious nature of our physical

universe Ninety five percent of the universe s energy and mass are a mystery to scientists and for the moment we resort to naming them dark matter and dark energy The last time a comparable knowledge revolution occurred was in the late sixteenth century when astronomers determined that the planets revolved around the sun not the earth Historians call it the Copernican Revolution because it led to modern Western science From one perspective the new era predicted in this book a revolution in its own right can be considered the completion of the quantum revolution by defining and explaining the role of consciousness in our universe An underlying aspect of this new revolution is the sense that humanity is moving into a new era of rapidly expanding knowledge of the human spirit our soul aspect and non physical realities Until now this emerging knowledge has not been organized into a coherent and comprehensive structure *Frontiers of Knowledge* provides the first outline of this new structure of reality

Confessions of a Regressionist Barbara H. Pomar, 2012-05-17 For the past thirty five years Dr Barbara Pomar has guided her clients on journeys into their past lives Confessions of a Regressionist presents both her personal account of her work with clients working to reverse past decisions to change the present and future and the theories behind the practice For some the very existence of past lives let alone the ability to reconnect with them is a point of spirited debate Even so Dr Pomar has helped many to come to their own conclusions about the validity of this technique Now she guides readers on using her techniques to live more fully or mold their destinies She also discusses theories on why and how past life regression is possible If you've ever struggled with how the possibility of past life regression fits within your faith Dr Pomar offers advice on how to evaluate your conflict If you are a regressionist Dr Pomar's work can help you realize that by helping your client you also help past and future generations as well If you've ever considered meeting with a regressionist Dr Pomar explains how this sort of experience can help you live more fully in the present with joy confidence and prosperity by releasing or neutralizing memories of harmful events

Framework of Reality: Understanding Our Subtle Spiritual Nature Douglas Kinney, 2014-06-06 Framework of Reality highlights unfolding developments that are revolutionizing our understanding of ourselves and our place in the universe Scientists and scientifically trained researchers are providing us with a rich and expanding base of knowledge about strange and unusual phenomena observed in quantum physics cosmology biology psychology disease and healing death and reincarnation investigations It is a companion book to Frontiers of Knowledge which is a large research book with all the

details and all the references Framework provides all the same information in a summary form It can be considered the Cliffs Notes for Frontiers of Knowledge Insights from quantum physics suggest that the basis of our physical universe is mental conscious thought Other discoveries are causing us to redefine our concepts of mind and this elusive thing we call consciousness The verified near death out of body experiences OBEs show that consciousness can exist in a nonphysical form indicating that mind is not tied to the physical brain New concepts of reality are also needed to explain the incredibly fine tuned characteristics of our physical universe The mysterious nature of dark energy and dark matter suggests that their source resides in subtle energy dimensions Strong hints of subtle dimensions are also provided in near death OBEs subtle energy healings and documented accounts of very unusual mind body effects Thousands of between lives spiritual regression cases and the deeper near death experiences provide us with fairly consistent descriptions of a nonphysical realm populated by souls living in a highly developed culture that is interacting with humans This revolutionary information demands a revised and expanded view of reality one in which spirituality is the underlying source of reality Highlights on all of the above and more are presented in Framework of Reality and they provide readers with the outline of this new revolution in knowledge
