explores how geography and demographics aligned to create an unstable settlement subject to the constant threat of Apache raids. The fear of surprise attack by day and the theft of livestock by night prompted settlers to shape their lives around the expectation of sudden violence. As the forces of progress strained natural resources, conflict grew between local ranchers and cowboys hired by ranching corporations. Mixed race property owners found themselves fighting white cowboys to keep their land. In addition, territorial law enforcement officers were outsiders to the community and approached every suspect fully armed and ready to shoot. The combination of unrelenting danger, its accompanying stress, and an abundance of firearms proved deadly. Drawing from history, geography, cultural studies, and trauma studies, Page uses the story of Pleasant Valley to demonstrate a new way of looking at the settlement of the West. Writing in a vivid narrative style and employing rigorous scholarship, he creatively explores the role of trauma in shaping the lives and decisions of the settlers in Pleasant Valley and offers new insight into the difficulties of survival in an isolated frontier community. Taming the Elephant John F. Burns, Richard J. Orsi, 2003. The final of four volumes in the California History Sesquicentennial Series, this text compiles original essays which treat the consequential role of post Gold Rush California government politics and law in the building of a dynamic state with lasting impact to the present day. The Deadliest Indian War in the West Gregory Michno, 2007. Gregory Michno, author of several critically acclaimed books on America's Indian wars, gives readers the first comprehensive look at the natives, soldiers, and settlers who clashed on the high desert of Idaho, Nevada, Utah, Oregon, and Northern California in a struggle that over a four-year period claimed more lives than any other western Indian War. *The Business of Killing Indians* William S. Kiser, 2025-03-18. How colonial conquest was driven by state-sponsored profit-driven campaigns to murder and mutilate Indian peoples in North America. From the mid 1600s through the late 1800s, states sponsored scalp bounties and volunteer campaigns to murder and mutilate thousands of Indians throughout North America. Since central governments in Amsterdam, Paris, London, Mexico City, and Washington DC failed to provide adequate military support and financial resources for colonial frontier defense, administrators in regional capitals such as New York, Quebec City, New Orleans, Boston, Ciudad Chihuahua, Austin, and Sacramento took matters into their own hands. At different times and in almost every part of the continent, they paid citizens for killing Indians, taking Indians captive, scalping or beheading Indians, and undertaking other forms of performative violence. As militant operatives and civilians alike struggled to prevail over Indigenous forces, they considered barbaric and savage; they engaged in not just plundering, slaving, and killing, but also dismembering corpses for symbolic purposes and for profit. Although these tactics mostly failed in their intent to exterminate populations, state sponsorship of indiscriminate violence took a significant demographic toll by flooding frontier zones with murderous units whose campaigns diminished Indigenous power, reduced tribal populations, and forced weakened survivors away from traditional homelands. High wages for volunteer campaigning, along with cash bounties for Indian body parts and the ability to take captives and keep valuable plunder, promoted a state-sponsored profit opportunity for civilians. **Team**

of Teams General Stanley McChrystal, Tatum Collins, David Silverman, Chris Fussell, 2015-05-12 From the New York Times bestselling author of *My Share of the Task* and *Leaders* comes a manual for leaders looking to make their teams more adaptable, agile, and unified in the midst of change. When General Stanley McChrystal took command of the Joint Special Operations Task Force in 2004, he quickly realized that conventional military tactics were failing. Al Qaeda in Iraq was a decentralized network that could move quickly, strike ruthlessly, then seemingly vanish into the local population. The allied forces had a huge advantage in numbers, equipment, and training, but none of that seemed to matter. To defeat Al Qaeda, they would have to combine the power of the world's mightiest military with the agility of the world's most fearsome terrorist network. They would have to become a team of teams, faster, flatter, and more flexible than ever. In *Team of Teams*, McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to countless businesses, nonprofits, and organizations today. In periods of unprecedented crisis, leaders need practical management practices that can scale to thousands of people and fast. By giving small groups the freedom to experiment and share what they learn across the entire organization, teams can respond more quickly, communicate more freely, and make better and faster decisions. Drawing on compelling examples from NASA to hospital emergency rooms, *Team of Teams* makes the case for merging the power of a large corporation with the agility of a small team to transform any organization.
