Vulnerable Colleen M. Flood, Vanessa MacDonnell, Jane Philpott, Sophie Thériault, Sridhar Venkatapuram, 2020-07-14. The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions, government functioning, and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences along with the legal, ethical, and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance, and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will force us to deeply reflect on how we govern and our policy priorities to focus on preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French. *Traditional, Complementary and Integrative Medicine* Jon Adams, Gavin Andrews, Joanne Barnes, 2017-09-16. This authoritative collection is the first wide-ranging overview dedicated to traditional, complementary, and integrative medicine (TCIM) and its scientific study. Compiled by an expert editorial team, it is an essential guide to the vast and ever-growing international literature on TCIM. Contributions come from practitioners and academics drawn from a diverse range of disciplines and professions across the globe. From perspectives on the significance of TCIM within public health policy to discourses on its influence in fields such as psychiatry and sociology, discrete chapters come together to provide an international map of the contemporary research, key debates, and core issues which shape the field. Carefully structured to ensure easy navigation, the reader is divided into three parts. Part A focuses on the consumption of TCIM, including chapters on its use through the life cycle and within the context of disease and health management. Part B covers considerations for practitioners across the world, taking in issues over ethics, communication, and education. Part C features chapters on the role of evidence research and knowledge production in TCIM and looks at what lies ahead for the field. With its thought-provoking insights and suggestions for further reading, this comprehensive resource provides guidance and inspiration for anyone embarking on study, practice, or research within health, nursing, or medicine.
