EU Financial Regulation and Supervision Beyond 2005 Karel Lannoo,Jean-Pierre Casey,2005 Retail Depositor and Retail Investor Protection under EU Law Constantinos Tokatlides,2017-02-10 Retail Depositor and Retail Investor Protection under EU Law offers an original perspective on EU financial law in the area of retail investor protection examining the status of protection awarded by EU law to retail depositors and retail investors in the event of financial institution failure The analysis of relevant EU law is on the basis of

effectiveness and has been elaborated in two levels of comparison The first comparative approach examines relevant EU law both externally and internally externally vis vis relevant international initiatives and developments in the area of financial law as the latter affect the features and evolution of EU law and internally by examining relevant instruments of EU law with regard to each other as to their normative structure and content The second comparative approach also examines the status of retail depositors in relation to that of retail investors under EU law in the event of financial institution failure and the relevant legal consequences thereof The future of EU financial regulation and supervision Great Britain: Parliament: House of Lords: European Union Committee,2009-06-17 The European Union Committee undertook this inquiry as the implications of the financial crisis became clear Supervisors in the UK in the EU and globally failed to identify the impending meltdown and failed to take preventative action Reform of regulation and supervision of the financial system has become an important political topic In response to the crisis the European Commission has so far published four regulatory proposals on Capital Requirements Deposit Guarantee Schemes Credit Rating Agencies and Alternative Investment Funds The first two of these have been agreed and are largely sensible responses to the crisis The proposals to regulate alternative investment funds and credit rating agencies are more controversial highlighting the need for more thorough consultation impact assessment and risk analysis Further coordination of supervision of the EU financial institutions and markets is seen as necessary and financial services in the EU will benefit from strengthened macro and micro prudential supervision This should provide a more effective early warning system for mitigating systemic risks and help improve the operation of the single market in financial services The Committee supports the establishment of a new body at the EU level to assess and monitor macro prudential systemic risks arising from financial markets and institutions Major strengthening of the powers of any EU micro prudential body is though a matter of some controversy and thorough and careful debate of the alternatives for reform within existing limitations is necessary The Commission has applied state aid rules speedily and flexibly and has helped ensure that bail outs of failing banks and mitigation of damage to the real economy do not jeopardise the single market

The European Union and Global Financial Regulation Lucia Quaglia,2014 1 Introduction 2 The State of the Art and the Research Design 3 The EU and Global Banking Regulation 4 The EU and Global Securities Markets Regulation 5 The EU and Global Insurance Regulation 6 The EU and International Accounting and Auditing Standards 7 An Overall Cross sectoral Assessment Over Time 8 Conclusions **Financial Regulation in the European Union** Rainer Kattel,Jan Kregel,Mario Tonveronachi,2015-10-08 This collection offers a comparative overview of how financial regulations have evolved in various European countries since the introduction of the single European market in 1986 It includes a number of country studies which provides a narrative of the domestic financial regulatory structure at the beginning of the period as well the means by which the EU Directives have been introduced into domestic legislation and the impact on the financial structure of the economy In particular studies highlight how the discretion allowed by the Directives has been used to meet the then existing

domestic conditions and financial structure as well as how they have modified that structure Countries covered are France Germany Italy Spain Estonia Hungary and Slovenia The book also contains an overview of regulatory changes in the UK and Nordic countries and in post crisis USA This comparative approach raises questions about whether past and more recent regulatory changes have in fact contributed to increase financial stability in the EU The comparative analysis provided in this book raises questions on whether the past and more recent changes are contributing to increase the financial stability and efficiency of individual banks and national financial systems The crisis has demonstrated the drawbacks of formulating the regulatory framework on standards borrowed from the best industry practices from the large developed countries originally designed exclusively for large global banks but now applied to all financial institutions European Financial Regulation and Supervision and the Onslaught of the Financial Crisis Veronica Hagenfeldt, 2011-04 The aim of this paper is threefold first to establish how the regulatory and supervisory architecture has evolved in Europe over the last decade second to determine how the shortcomings of the present system affected the onslaught of the financial crisis in Europe and lastly to evaluate whether the proposed regulatory and supervisory reforms are likely to successfully repair these weaknesses EU Investor Protection Regulation and Liability for Investment Losses Marnix Wallinga, 2020-10-30 This book examines the relationship between the EU investor protection regulations enshrined in MiFID and MiFID II and national contract and torts law It describes how the effect of the conduct of business rules as implemented in national financial supervision legislation in private law extends to the issue of enforcement and critically assesses this interaction from the perspective of EU law In particular the conclusions identified in the book will deepen readers understanding of the interplay between the conduct of business rules and private law norms governing a firm s liability to pay damages such as duty of care attributability of damage causation contributory negligence and limitation In turn the book identifies the subordination and the complementarity model to conceptualise the interaction between the conduct of business rules and private law norms Moreover the book challenges the view that civil courts are or should be forced to give private law effects to violation of the MiFID and MiFID II conduct of business rules in line with the subordination model Instead the complementarity model is advanced as the preferred approach to this interaction in view of what MiFID and MiFID II require from Member States in terms of their implementation as well as the desirability of each model This model presupposes that courts should consider the conduct of business rules when adjudicating individual disputes while preserving the autonomy of private law norms governing liability of investment firms towards clients Based on analysis of case law of courts in Germany the Netherlands and England Wales as well as scholarly literature the book also compares the available causes of action the conditions of liability and the obstacles investors face when claiming damages as well as how and the extent to which investors can benefit from the conduct of business rules in clearing these obstacles In so doing under the approach adopted by national courts to the interplay between the conduct of business rules of EU origin and private law the book shows how investors can benefit

from the influence of these rules on private law norms In closing it demonstrates a hybridisation of private law remedies resulting from the accommodation of the conduct of business rules into the private law discourse according to the complementarity model illustrating how judicial enforcement through private law means may contribute to investor protection

European Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza, 2019-12-26 Mirroring the long established structure of the financial industry EU financial regulation as we know it today approaches banking insurance and investment services separately and often divergently In recent decades however the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries As the contours of the traditional tripartition in the financial industry have faded the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective For each specific research theme including prudential regulation

corporate governance and conduct of business rules the similarities as well as gaps overlaps and unjustifiable differences between banking securities and insurance regulation are clearly presented and discussed This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes
