"Reines Denken" Jens Brockmeier, 1992 *Time and Temporality in Intercultural Perspective*, 2023-03-27 Preface

Erneling, David M. Johnson, 2005-01-13 What holds together the various fields that are supposed to consititute the general intellectual discipline that people now call cognitive science In this book Erneling and Johnson identify two problems with defining this discipline First some theorists identify the common subject matter as the mind but scientists and philosophers have not been able to agree on any single satisfactory answer to the question of what the mind is Second those who speculate about the general characteristics that belong to cognitive science tend to assume that all the particular fields falling under the rubric psychology linguistics biology and son on are of roughly equal value in their ability to shed light on the nature of mind This book argues that all the cognitive science disciplines are not equally able to provide answers to ontological questions about the mind but rather that only neurophysiology and cultural psychology are suited to answer these questions However since the cultural account of mind has long been ignored in favor of the neurophysiological account Erneling and Johnson bring together contributions that focus especially on different versions of the cultural account of the mind

Literacy, Narrative and Culture Jens Brockmeier, David R Olson, Min Wang, 2013-12-16 An important contribution to the multi disciplinary study of literacy narrative and culture this work argues that literacy is perhaps best described as an ensemble of socially and historically embedded activities of cultural practices It suggests viewing written language producing and distributing deciphering and interpreting signs are closely related to other cultural practices such as narrative and painting The papers of the first and second parts illustrate this view in contexts that range from the pre historical beginnings of tracking signs in hunter gatherer cultures and the emergence of modern literate traditions in Europe in the 17th to 19th century to the future of electronically mediated writing in times of the post Gutenberg galaxy The chapters of the third present results of recent research in developmental and educational psychology Contributions by leading experts in the field make the point that there is no theory and history of writing that does not presuppose a theory of culture and social

development At the same time it demonstrates that every theory and history of culture must unavoidably entail a theory and history of writing and written culture This book brings together perspectives on literacy from psychology linguistics history and sociology of literature philosophy anthropology and history of art It addresses these issues in plain language not coded in specialized jargon and addresses a multi disciplinary forum of scholars and students of literacy narrative and culture **The Travelling Concepts of Narrative** Mari Hatavara,Lars-Christer Hydén,Matti Hyvärinen,2013-06-15 Narrative is a pioneer concept in our trans disciplinary age For decades it has been one of the most successful catchwords in literature history cultural studies philosophy and health studies While the expansion of narrative studies has led to significant advances across a number of fields the travels for the concept itself have been a somewhat more complex Has the concept of narrative passed intact from literature to sociology from structuralism to therapeutic practice or to the study of everyday storytelling In this volume philosophers psychologists literary theorists sociolinguists and sociologists use methodologically challenging test cases to scrutinize the types transformations and trajectories of the concept and theory of narrative The book powerfully argues that narrative concepts are profoundly relevant in the understanding of life experience and literary texts Nonetheless it emphasizes the vast contextual differences and contradictions in the use of the concept **Die Praxis der Physik** Allan Janik,Monika Seekircher,Jörg Markowitsch,2013-03-11 Diese Studie analysiert das praktische Wissen welches PhysikerInnen im Labor ben tigen sowie dessen Aneignung und Vermittlung Die erkenntnistheoretische Grundlage dazu bilden Michael Polanyis Konzept des impliziten Wissens und Ludwig Wittgensteins pragmatische Sprachauffassung Die Untersuchung steht im Umfeld der sogenannten Laborstudien und zeichnet sich vor allem durch ihren problemorientierten Ansatz aus Sie zeigt die Praxis der Physik wie sie PhysikerInnen in ihren eigenen Worten beschreiben Probleme im Umgang mit Apparaturen Fehlersuche Problemerkennen Messen und Interpretieren Die Rolle von Frauen in der physikalischen Forschung bildet einen besonderen Schwerpunkt Als Grundlage f r eine moderne Wissenschaftsdidaktik Know how Vermittlung sowie f r die Evaluation und Kompetenzentwicklung von Forschungseinrichtungen wendet sich das Buch an eine breite Zielgruppe In Forschung und Lehre t tige PhysikerInnen oder PhysiklehrerInnen an h heren Schulen Philosophen Wissenschaftsforscher und soziologen Bildungs und Berufsforscher **The Varieties of Religious Experience** Michel Ferrari,2002 William James published his classic work on the psychology of religion The Varieties of Religious Experience in 1902 To mark the centenary leading contemporary scholars reflect on changes in our understanding of the questions James addressed *Narrative and Identity* Jens Brockmeier,Donal A.
