The Search for New Governance of Higher Education in Asia K. Mok, 2010-08-16 The present volume sets out in the wider context of globalization to critically examine how selected countries societies in Asia have responded to the growing pressures of globalization for improving university performance in

the global market place In order to enhance the global competitiveness of their higher education systems many governments in Asia have started comprehensive reforms and adopted new governance measures to enhance their universities Incorporation and corporatization have been identified as important strategies to restructure and re engineer university governance around the world Contributors in this volume critically examine how the quest for world class university status as a global movement has affected the way their universities are governed Despite the popularity of management reforms and restructuring exercises in line with neoliberalism and managerialism worldwide whether and how these reforms have actually transformed the heart of the public sector is still subject to debate This book offers critical reflections on the governance change taking place in the Asian university systems and examines how far the restructuring of higher education governance through incorporation privatization and corporatization has really transformed the values and practices of those who work in the higher education sector

The Strategies of Australia's Universities Timothy Devinney, Grahame Dowling, 2020-05-15 Over the last few decades universities in Australia and overseas have been criticized for not meeting the needs and expectations of the societies in which they operate At the heart of this problem is their strategy This book reviews the organizational level strategies of some of Australia's prominent universities It is based on their public documents that boldly report how they see their role in society and how they intend to navigate the future These strategic statements are written to proclaim relevance showcase achievements attract students and help to gain the support of the communities in which they operate Using a strategy framework taught in their business schools this book suggests that most such statements are deficient Grand aspirations substitute for realistic operations and outcomes The analysis also suggests that many of Australia's universities are poorly governed and have become too complex and bureaucratic A greater focus on their core responsibilities would help alleviate their current funding predicament

Reinventing the Research University C. Kumar N. Patel, 1995 *Financing Public Universities* Marcel Herbst, 2007-05-16 *Financing Public Universities* addresses newer practices of resource allocation which tie funding to indicators of performance The gist of these efforts is to raise the quality of institutional systems Performance based budgeting and funding of public universities is part of broader efforts to reform public management and it is being promoted and implemented by various government agencies around the globe In particular European universities with their normally strong governmental ties or higher education systems molded on European universities are prime targets of such reforms Performance funding has made its inroads in attempts to grant university systems managerial autonomy autonomy was to be granted in exchange for funding modes which are tied to the measurement of performance indicators Unfortunately performance based budgeting or funding measures cannot meet the various expectations they do not raise the quality of teaching or learning they do not raise research performance they take back a great deal of managerial autonomy which is commonly judged to be essential for the well being of higher education institutions in particular research universities and they act as automata in place of proper governance and management

Financing Public Universities addresses policy makers higher education administrators scholars and students of higher education management After an introduction to the theme and to the book Chapter 1 Financing Public Universities covers the evolution of mass higher education and the associated curtailment of funding Chapter 2 the public management reform debate Chapter 3 within which performance based budgeting or funding evolved Chapter 4 sketches alternative governance and management modes which can be used instead Chapter 5 and epitomizes inertia or challenges Chapter 6 Four appendices cover more technical matters such as a comparative exposition of the research performance of universities by nation Appendix C and examples of funding systems in the UK and in the USA Appendix D
