Post, Robert H. Binstock, 2004-04-08 A wide variety of ambitions and measures to slow stop and reverse phenomena associated with aging have been part of human culture since early civilization From alchemy to cell injections to dietary supplements the list of techniques aimed at altering the processes of aging continues to expand Charlatans quacks and entrepreneurs proffering anti aging products and practices have always exploited uniformed customers and instilled doubt and apprehension toward practices intended to extend life Recently however the pursuit of longevity has developed into a respectable scientific activity Many biologists are substantially funded by the government and the private sector to conduct research that they believe will lead to effective anti aging interventions While many embrace this quest for prolongevity extended youth and long life others fear its consequences If effective anti aging interventions were achieved they would likely bring about profound alterations in the experiences of individual and collective life What if aging could be decelerated to the extent that both average life expectancy and maximum life span would increase by forty percent What if all humans could live to be centenarians free of the chronic diseases and disabilities now commonly associated with old age What if modern scientists could find the modern equivalent to the Fountain of Youth that Ponce de Leon sought This book addresses these questions by exploring the ramifications of possible anti aging

interventions on both individual and collective life Through a series of essays it examines the biomedical goal of prolongevity from cultural scientific religious and ethical perspectives offering a sweeping view into the future of aging Catalog of Copyright Entries. Chen,2016-07-06 As a nation makes the transition from communism to democracy or another form of authoritarianism its regime must construct not only new political institutions but also a new political ideology that can guide policy and provide a sense of mission The new ideology is crucial for legitimacy at home and abroad as well as the regime s long term viability In The Return of Ideology Cheng Chen compares post communist regimes with a focus on Russia under Putin and post Deng China investigating the factors that affect the success of an ideology building project and identifies the implications for international affairs Successful ideology building requires two necessary but not sufficient conditions The regime must establish a coherent ideological repertoire that takes into account the nation s ideological heritage and fresh surges of nationalism Also the regime must attract and maintain a strong commitment to the emerging ideology among the political elite Drawing on rich primary sources including interviews surveys political speeches writings of political leaders and a variety of publications Chen identifies the major obstacles to ideology building in modern Russia and China and assesses their respective long term prospects Whereas creating a new regime ideology has been a protracted and difficult process in China it has been even more so in Russia The ability to forge an ideology is not merely a domestic concern for these two nations but a matter of international import as these two great powers move to assert and extend their influence in the world

Recurrence in Western Thought G. W. Trompf,2023-11-15 The idea that history repeats itself has a long and intriguing history This volume is concerned with the period of time in the Western tradition when its expressions were most numerous and fervent The author shows that this idea should not be confined to its cyclical version for such notions as reenactment retribution and renaissance also belong under the wide umbrella of recurrence He argues moreover that not only the Greco

Roman but also the biblical tradition contributed to the history of this idea. The old contrast between Judeo-Christian linear views of history and Greco-Roman cyclical views is brought into question. Beginning with Polybius, Trompf examines the manifold forms of recurrence thinking in Greek and Roman historiography, then turns his attention to biblical views of historical change, arguing that in Luke Acts and in earlier Jewish writings an interest in the idea of history repeating itself was clearly demonstrated. Jewish and early Christian writers initiated and foreshadowed an extensive synthesizing of recurrence notions and models from both traditions, although the syntheses could vary with the context and dogmatic considerations. The Renaissance and Reformation intertwine classical and biblical notions of recurrence most closely, yet even in the sixteenth century some ideas distinct to each tradition, such as the Polybian conception of a cycle of governments and the biblical notion of the reenactment of significant events, were revived in stark separation from each other. *The Idea of Historical Recurrence in Western Thought* deals with a continuing but not always fruitful dialogue between the two great traditions of Western thought, a dialogue that did not stop short in the days of Machiavelli but has been carried on to the present day. This study is the first half of a long story to be continued in a second volume on the idea of historical recurrence, from Giambattista Vico to Arnold Toynbee. The idea that history repeats itself has a long and intriguing history. This volume is concerned with the period of time in the Western tradition when its expressions were most numerous and fervent.
