

Relational Grammar

- Developed by linguists David Perlmutter and Paul Postal in the 1970s and '80s
- An alternative to transformational grammar
- According to Blake (1990),

"**Relational grammar** represents a . . . reaction to early Transformational Grammar. It is not a single level theory, but a multilevel one in which the initial stratum is analogous to deep structure, and revaluations to transformations. The principle difference between the two approaches is that RG conceives of a sentence in terms of labeled relations borne to a predicate."
