Fundamentals of Feminist Gerontology J. Dianne Garner, 1999 Fundamentals of Feminist Gerontology strives to increase women's self esteem and their overall quality of life by encouraging education and putting a stop to age sex and race discrimination As a student or professional in psychology social work or gerontology you will learn about feminist conceptions of retirement economic issues psychological issues and social issues and you will explore studies on old age discrimination and devaluation and sexism toward women in Western societies to gain an understanding of the experiences of older Western women This book also shows how some women are experiencing empowerment through alternative health care such as mind body therapies homeopathy aromatherapy and herbal medicine Fundamentals of Feminist Gerontology will provide you with the tools to offer effective therapy to women to help them improve their own lives *HIV, Sex and Sexuality in Later Life* Mark Henrickson, Casey Charles, Shiv Ganesh, Sulaimon Giwa, Kan Diana Kwok, Tetyana Semigina, 2024-05-21 Drawing on international perspectives and research this book explores the experiences of sex and sexuality in individuals and groups living with HIV in later life 50 *Self and Identity Through the Life Course in Cross-Cultural Perspective* Timothy J Owens, 2000 This volume represents a new name and a new focus for its predecessor Current Perspectives on Aging and the Life Cycle volumes 1 4 We begin our new series now titled Advances in Life Course Research with volume 5 Its statement of purpose is the publication of theoretical analyses reviews policy analyses and positions and theory based empirical papers on issues involving all aspects of the human life course It adopts a broad conception of the life course and invites and welcomes contributions from all disciplines and fields of study interested in understanding describing and predicting the antecedents of and consequences for the course that human lives take from birth to death within and across time and cultures construed in its broadest sense regardless of methodology theoretical orientation or disciplinary affiliation *Handbook of Communication and Aging Research* Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an

understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging
