Reducing Animal Use in Carcinogenicity Testing Joseph Manuppello,Jan Willem Van Der Laan,Federica Madaia,2024-12-31 Carcinogenicity to rats and mice is evaluated for substances to which humans are exposed including pharmaceuticals agrochemicals and industrial chemicals For pharmaceuticals recent efforts to reduce animal use in long term studies include an addendum to the International Council for Harmonisation ICH guideline S1B R1 that prioritizes short term studies in transgenic mice and recommends assessing the weight of evidence available to first determine whether a long term study in rats would add value For other sectors an expert group of the Organisation for Economic Cooperation and Development OECD is developing an Integrated Approach to the Testing and Assessment IATA of non genotoxic carcinogens based on common hallmarks of cancers and on key characteristics of carcinogens Within current regulations animal use could be reduced by evaluating toxicokinetics in main study animals with microsampling methods by including only one negative control group and by genotyping transgenic mice instead of using positive control groups in each study

Environmental Health Perspectives ,2004-07 **Fruit and Vegetables** IARC Working Group on the Evaluation of Cancer-Preventive Strategies,2003 This handbook shows that approximately one in ten cancers in western populations is due to an insufficient intake of fruit and vegetables a finding that should encourage all organizations as well as governments to continue efforts to increase or maintain fruit and vegetable intake as an important objective of programs to improve nutrition to reduce the burden of cancer and other chronic diseases The clearest evidence of a cancer protective effect of eating more fruits is for stomach and esophageal cancers Similarly a higher intake of vegetables probably reduces the incidence of cancer of esophagus and colon rectum Fruit and vegetables contain many nutrients they also contain other bioactive compounds that may influence many aspects of human biology and related disease processes Hazards in the European Rubber
