Religion A Humanistic Field:

Religion Clyde A. Holbrook, 1963 **The Sacred Is the Profane** William Arnal, Russell T. McCutcheon, 2013 *The Sacred Is the Profane* collects nine essays written over several years by William Arnal and Russell T McCutcheon that share a convergent perspective not simply that both the category and concept religion is a construct something that we cannot assume to be natural or universal but also that the ability to think and act religiously is quite specifically a modern political category in its origins and effects the mere by product of the modern state These collected essays substantially rewritten for this volume advance current scholarly debates on secularism debates which the authors argue insufficiently theorize the sacred secular church state and private public binaries by presupposing religion often under the guise of such terms as religiosity faith or spirituality to historically precede the nation state The essays return again and again to the question of what religion word and concept accomplishes now for those who employ it whether at the popular political or scholarly level The focus here for two writers from seemingly different fields is on the efficacy costs and the tactical work carried out by dividing the world between religious and political church and state sacred and profane *The Science of Religion: A Defence* Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies *The Science of Religion A Defence* offers a brilliant overview of Professor Wiebe s contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on *The Preconceptions of a Science of Religion* by Anthony J Palma and an accompanying reply by Donald Wiebe *The Science of Religion A Defence* is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion **The Study of Religion in Colleges and Universities** Paul Ramsey, John Frederick Wilson, 2015-03-08 The study of religion traditionally sponsored by sectarian institutions has within recent decades come to claim an increasingly larger share of attention in colleges and universities generally and in the process the constituent intellectual disciplines have undergone significant changes In this volume twelve distinguished scholars take stock of the current state of the field and explore the prospects for future development The areas covered in the essays with their authors are biblical studies Stendhal Western religious history Clebsch philosophy of religion Diamond theology McGill Catholic studies Preller Jewish studies Neusner sociology of religion Harrison comparative religious

ethics Little history of religions Sullivan religion and art Turner and religion and literature Driver A practical commentary on the current state of the field Gustafson concludes the volume Taken together the essays provide an overview of the subject matter of religion study that should enable scholars of religion to situate and define their own work while helping others to appreciate the claims that work has upon the resources and concerns of colleges and universities Originally published in 1970 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Kemeny, 2013-03-11 While debates abound today over the cost purpose and effectiveness of higher education often lost in this conversation is a critical question Should higher education attempt to shape students moral and spiritual character in any systematic manner as in the past or focus upon equipping students with mere technical knowledge Faith Freedom and Higher Education argues that Christianity can still play an important role in contemporary American higher education George M Marsden D G Hart and George H Nash among its authors analyze the debate over the secularization of the university and the impact of liberal Protestantism and fundamentalism on the American academy during the twentieth century Contributors also assess how the ideas of Dorothy Sayers C S Lewis Wendell Berry and Allan Bloom can be used to improve Christian higher education Finally the volume examines the contributions Christian faith can make to collegiate education and outlines how Christian institutions can preserve their religious mission while striving for academic excellence

95 Theses on Humanism Ignace Demaerel, 2018-08-02 Since the rise and growth of secularization the place of God and religion is becoming increasingly problematic in our Western culture But what is the alternative to its Christian heritage Humanism puts man at the center of everything but can you believe in man just as much as you can believe in God Is this secular worldview really rational based on science consistent and durable And above all does our society become more humane because of it Can you simply obliterate God from our culture and values without these collapsing like a pudding Secular humanism has always been extremely critical of the church and in itself that is allowed but what if we judge and measure it with the same criteria
