Hood, Jr., Peter C. Hill, Bernard Spilka, 2009-07-15 Scholarly and comprehensive yet accessible this state of the science work is widely regarded as the definitive graduate level psychology of religion text The authors synthesize classic and contemporary empirical research on numerous different religious groups Coverage includes religious thought belief and behavior across the lifespan links between religion and biology the forms and meaning of religious experience the social psychology of religious organizations and connections to morality coping mental health and psychopathology Every chapter features thought provoking quotations and examples that bring key concepts to life New to This Edition Revised and updated with the latest theories methods and empirical findings Many new research examples Restructured with fewer chapters for better fit with a typical semester More attention to the differences between religion and spirituality Covers emerging topics genetics and neurobiology positive psychology atheism and more      *Worlds and Distances* Pasquale De Marco, 2025-03-08 In the vast expanse of the universe countless worlds await discovery Some may be barren and lifeless while others may teem with exotic life forms In this book we will embark on a journey to explore the mind boggling diversity of worlds that exist beyond our own We will begin by examining the nature of worlds themselves What are the different types of worlds How are they created How do they evolve And what is the relationship between different worlds Next we will turn our attention to the distances between worlds How do we measure distance in the vastness of space What are the different types of distance And what are the implications of distance for travel and communication between worlds We will then explore the methods that we can use to bridge the distances between worlds What are the challenges of interstellar travel What are the possibilities of faster than light travel And what are the ethical implications of interstellar travel We will also take a closer look at the worlds in our own solar system What are the different planets moons asteroids and comets that make up our cosmic neighborhood And is there any evidence of life beyond Earth in our solar system Venturing beyond our solar system we will explore the different types of stars and galaxies that exist in the universe We will also discuss the search for habitable planets and the possibility of life beyond Earth Finally we will consider the implications of the existence of multiple worlds What are the philosophical scientific religious ethical and artistic implications of a universe that contains countless worlds This book is an invitation to explore the vastness of the universe and to ponder the mind boggling possibilities that it holds It is a journey that will take us to the far reaches of our imagination and challenge our understanding of the universe and our place in it If you like this book write a review      Search for Meaning David Birnbaum, Martin S. Cohen, The Book of Deuteronomy depicts Moses addressing Israel before his own death as he imagines that some day in the future children will ask their parents to explain the

meaning of the testimonies statutes and judgments Deuteronomy 6 20 that are the foundation of the covenant that binds Israel to its God He thus frames in specifically Jewish terms the same set of haunting intimations that all thoughtful people bring to the contemplation of their own lives and indeed to life itself the sense that being alive can or should mean more than merely not being dead that the contemplation of even the most banal features of daily life can yield rich insight about the nature of existence and the feeling that life itself can be understood as a kind of scrim that might allow us to see through it to the secrets and mysteries that lie beyond That set of hopeful suppositions inspires moderns just as strongly and enticingly as it did the ancients Yet the specific question of what it actually means for this or that part of life to mean anything at all other than what it overtly is or at least appears to be does not seem to have exerted anywhere near as siren a call on our ancient forebears as it does on us moderns Still as we seek meaning in the world and in our lives it behooves us to ponder the meaning of meaning as well These twin notions that life has meaning beyond what the casual observer can see easily and that the effort to uncover and decipher that meaning can be profound enough to be spiritually transformational have animated the contributors to this volume as their work demonstrates just how meaningful the search for meaning can be Some have approached this from a spiritual point of view grounding themselves in traditional biblical talmudic or mystical sources Others have framed their efforts in political terms or in deeply personal ones And still others have attempted to consider the issue through the lens of modern philosophical inquiry But regardless of the specific perspective of any individual author all have in common the deep seated conviction that life bears meaning and that that meaning can best be discovered not by spending a lifetime hoping for momentary satori but rather by standing on the shoulders of fellow travelers from earlier eras and from that slightly elevated vantage point seeing just a bit further than they could or did For almost all of our authors then the search for meaning is best understood as an ongoing intergenerational effort that links the seekers of all ages to each other through the contemplation of earlier efforts to mine profundity and significance from the quarry of human life itself It is at best a slow march forward As readers will see from the Table of Contents the ancient Book of Kohelet has served several of our authors as the framework for their interpretive work Kohelet is the Hebrew name of the biblical book also known as Ecclesiastes which name is derived from the Greek translation of the work Others have chosen to grapple with the question Moses imagined future Jewish children eventually putting to their parents as they wondered what the commandments actually mean in terms of the larger picture of Israelite culture and Jewish life in our own day Still others have addressed the search for meaning in life today by taking into account the question of human suffering considering the issue both generally as a philosophical challenge and<sup>3</sup> Preface more specifically with reference to the Shoah Taken all together the contributors to this volume have put forth the notion that life is ennobled not trivialized by the contemplative effort to seek meaning in the ebb and flow of life's experiences and particularly in those life experiences related to the service of God And yet for all they are united in that conviction our authors in this volume of the Mesorah Matrix series are nonetheless a diverse group older and

younger women and men North Americans and Israelis living at home and abroad seasoned scholars and newly minted rabbis and teachers They are teachers and researchers trained in different schools of thought and affiliated with different movements and institutions within the mosaic of Jewish life that characterizes the House of Israel as it enters by its own reckoning the final quarter of the twenty-first century They are a varied lot our authors But in many ways they are all of them cut from the same cloth Our authors work with the original sources and generally present them in their own translations Citations of NJPS refer to the complete translation of Scripture first published under the title Tanakh The Holy Scriptures by the Jewish Publication Society in Philadelphia in 1985 In this volume as in all books in the Mesorah Matrix series the four letter name of God is generally represented by the Eternal or Eternal God Authors who are specifically discussing the actual four letter name on the other hand may occasionally depart from this usage in order to more clearly make the point of their argument I would like to take this opportunity to acknowledge the other senior editors of the Mesorah Matrix series David Birnbaum and Rabbi Benjamin Blech as well as Rabbi Saul J Berman our associate editor They and our able staff have all supported me as I've labored to bring this volume to fruition and I am grateful to them all As always I must also express my gratitude to the men and women and particularly to the lay leadership of the synagogue I serve as rabbi the Shelter Rock Jewish Center in Roslyn New York Possessed of the unwavering conviction that their rabbis' book projects are part and parcel of his service to them and through them to the larger community of those interested in learning about Judaism through the medium of the well written word they are remarkably supportive of my literary efforts as author and editor I am in their debt and I am therefore very pleased to acknowledge that debt formally here and wherever I publish my own work or the work of others

**Faith** Gerrit Immink, 2005 Addressing faith as it is lived rather than as a system of doctrine F Gerrit Immink emphasizes that having faith means more than assenting to certain opinions about God it involves a dynamic relationship or dialogue with God As he investigates the practice of faith Immink holds together the poles of divine activity and human experience external Word and indwelling Spirit At its heart this book is about God How can faithful people speak about God and understand God's presence Well versed in both philosophical analysis and the theological tradition the author argues for an understanding of God as a speaking acting person genuinely experienced in faith In so doing he issues a compelling plea to reevaluate the theoretical foundations of practical theology Applying his work particularly to the theories of preaching and pastoral care Immink brings to bear insights garnered from years as an academic theologian as the dean of a theological seminary and as a minister Scholars ministers and seminary students alike will benefit from his careful reflections on the Christian life of faith

**Life Crises and Experiences of Loss in Adulthood** Leo Montada, Sigrun-Heide Filipp, Melvin J. Lerner, 2014-01-14 A result of a conference at the University of Trier Germany this

volume mirrors its goals to provide an overview of recent advances in research on critical life events and the losses associated with them to collect and stimulate new perspectives for the analysis of these events to compare the psychology of victims experiencing stress and losses with the psychology of observers in their reactions to victims Designed to prevent developmental psychological myths in the area of life crises this collection questions on an empirical basis the adequacy of several widespread generalizations At the same time its contributors attempt to draw paths to conceptualizations and theories in general psychology and social psychology which promise to be helpful in analyzing and interpreting phenomena in the field of life crises

**Positive Psychology in Search for Meaning** Dmitry Leontiev, 2016-03-17 What are the ways in which we can understand the meaning of the psychology of meaning in people's lives In the last century mainstream psychology has largely neglected the topic of meaning More recently the concept has become an academically legitimate one within positive psychology and in some other speciality areas of psychology This book contains a collection of theoretical methodological and empirical papers written by the acknowledged experts systematically working on the problems of personal meaning within the positive psychology framework The authors investigate the possibilities and limitations of a scientific study of personal meaning and new perspectives that this concept brings to the field This book was originally published as a special issue of The Journal of Positive Psychology

**Religion** George Lundskow,2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion s practioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow s approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real

bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and effect of religion in the world today Vincent's Religion William W. Meissner, 1997 Vincent van Gogh was one of the greatest artists of the nineteenth century and his works are known to millions Less familiar is the powerful religious dynamic that played a central role in his life and provided a pervasive motivational thrust that was reflected in some of his greatest artistic achievements The various components of this religious dimension are explored and their dynamic underpinnings discussed The manner in which these psychic forces came into play and found expression in his life and art is developed including the almost mystical aspect of his most sublime efforts **Religion** Margaret Huff, Ann Wetherilt, 2004-07 This thought provoking innovative text presents religion as the human search for meaning and discusses the phenomenon of religion as one way in which individuals and communities engage in that search **Education, Religion and Diversity** L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re think their field and proposes a new post liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While Education Religion and Diversity is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post liberal model of religious education one that is compatible with both confessional and non confessional forms of religious education yet takes religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schr der Professor of Practical Theology and Religious Education University of G ttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of

all curriculum subjects resolutions are most likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education

**Searching for Meaning in the Holocaust** Sidney M. Bolkosky, 2002-07-30 Scholars survivors and other interested parties have offered over the years their own interpretations of the meaning of the Holocaust and the lessons we can learn from it However the quest to find a rational explanation for this seemingly irrational course of events has led to both controversy and continued efforts at assigning meaning to this most horrible of events Examining oral histories provided by survivors written accounts and explanations scholarly analysis and commonly held assumptions Bolkosky challenges the usual collection of platitudes about the lessons or the meanings we can derive from the Holocaust Indeed he argues against the kind of reductionism that such a quest for meaning has led to and he analyzes the nature of the perpetrators in order to support his position on the inconclusivity of the study of the Holocaust Dealing with the perpetrators of the Holocaust as manifestations of twentieth century civilized trends foreseen by the likes of Kafka Ortega y Gasset Arthur Koestler and Max Weber Bolkosky suggests a new nature of evil and criminality along the lines developed by Hannah Arendt Raul Hilberg and Richard Rosenstein Woven into the fabric of the text are insights from literary and historical writers sociologists and philosophers This interdisciplinary attempt to shed new light on efforts to determine the meanings and lessons of the Holocaust provides readers with a challenging approach to considering the oral histories of survivors and the popular and professional assumptions surrounding this devastating moment in history
