Stepping Westward Nigel Leask, 2020-02-27 Stepping Westward is the first book dedicated to the literature of the Scottish Highland tour of 1720-1830, a major cultural phenomenon that attracted writers and artists like Pennant, Johnson and Boswell, William and Dorothy Wordsworth, Coleridge, Scott, Hogg, Keats, Daniell and Turner, as well as numerous less celebrated travellers and tourists. Addressing more than a century's worth of literary and visual representations of the Highlands, the book casts new light on how the tour developed a modern literature of place, acting as a catalyst for thinking about improvement, landscape and the shaping of British, Scottish and Gaelic identities. It pays attention to the relationship between travellers and the native Gaels whose world was plunged into crisis by rapid and forced social change. At the book's core lie the best-selling tours of Pennant and Dr Johnson, associated with attempts to improve the intractable *Gaidhealtachd* in the wake of Culloden. Alongside the Ossian craze and Gilpin's picturesque, their books stimulated a wave of home tours from the 1770s through the romantic period, including writing by women like Sarah Murray and Dorothy Wordsworth. The incidence of published Highland Tours, many lavishly illustrated, peaked around 1800 but as the genre reached exhaustion, the romantic Highlands were reinvented in Scott's poems and novels, coinciding with steam boats and mass tourism but also rack-renting, sheep clearance and emigration.

The Decline of Magic Michael Hunter, 2020-01-07 A new history which overturns the received wisdom that science displaced magic in Enlightenment Britain. In early modern Britain, belief in prophecies, omens, ghosts, apparitions and fairies was commonplace. Among both educated and ordinary people, the absolute existence of a spiritual world was taken for granted. Yet in the eighteenth century, such certainties were swept away. Credit for this great change is usually given to science and, in particular, to the scientists of the Royal Society. But is this justified? Michael Hunter argues that those pioneering the change in attitude were not scientists but freethinkers. While some scientists defended the reality of supernatural phenomena, these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and, by extension, of magic and other forms of superstition. Even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti-magical views, slowly change did come about. When it did, this owed less to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place.
