Long Term Care A Handbook For Researchers Planners And Providers:

Long-term Care Sylvia Sherwood, 1975 **Current Catalog** National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1971 *Healthy People : the Surgeon General's Report on Health Promotion and Disease Prevention, 1979* Institute of Medicine (U.S.), United States. Public Health Service. Office of the Surgeon General, United States. Office of the Assistant Secretary for Health, 1979 **Evaluative Research on Social Programs for the Elderly**, 1977 **Health planning reports subject index** United States. Health Resources Administration, 1979 Healthy People Institute of Medicine (U.S.), 1979 *Medical Socioeconomic Research Sources*, 1976 Monthly References about events and developments in the sociology and economics of medicine Sources include scientific and medical journals as well as newspapers and popular magazines Entries arranged under subjects in alphabetical order Author index **Behavioral Methods in Social Welfare** Steven Paul Schinke, James. K Whittaker, Scott Briar, 2017-09-08 Behavioral Methods in Social Welfare offers positive proof that behaviorism has come of age in social work Steven Paul Schinke and the contributors to this volume are social work practitioners who document their attempts to extend the basic tenets of behavioral psychology from the laboratory clinic and classroom to the full range of client groups and social problems that make up the practice of social work In social work education traditionally to the extent it appeared in the curriculum at all behavioral content appeared in electives or in courses not focused on practice It is a true measure of progress that behavioral methods are now visible integral component of social work education and practice The authors of each piece in this collection indicate progress in developing an empirically based approach to social work practice Despite the impressive documentation contained in the present volume no conclusive evidence as to the effectiveness of behavioral methods exists What behavioral methods do offer however is a systematic format for both problem intervention and evaluation that over time should produce a more empirically based practice A promising sign well documented in the present effort is the facility with which this book has subjected practice procedures to the rigor of research and evaluation This blending of clinical practice and research develops the sense of competence that student practitioners acquire in understanding and controlling both the art and science of their clinical practice Steven Schinke and his colleagues offer a series of snapshots of important work in process Their collective portrait provides a fresh perspective and new stimulus for all social work practice as well as an affirmation that disciplined responsive and sensitive social work intervention can make a difference in the lives of people **Managing to Care** Ann E. P. Dill, The point of departure for Managing to Care is widespread concern that the present delivery of health and social welfare services is fragmented uncoordinated inefficient costly wasteful and ultimately detrimental to clients health and wellbeing Dill traces the evolution of case management from its start as a tool for integrating services on the level of the individual client to its current role as a force behind the most significant trends in health care Those trends include the

entrenchment of bureaucracy the challenges of once dominant professions and the rise of corporate control The author's purpose in adopting this analysis is to invite further scrutiny of the case management profession and at the same time to identify new possibilities for its application This volume brings together thoughts developed over many years of observing and participating in case management programs It provides a multilayered perspective of case management showing linkages among its social and historical contexts and the ways it is practiced today in diverse service settings The author emerged convinced about the essential need for care coordination and that present ways of providing care can work against our highest objectives in doing so The paradoxes and contraindications embedded in case management practice became a major theme of the book Managing to Care is highly critical of the ways case management has come to absorb and reflect the organizational flaws of the very service systems it was intended to reform Too often management of the case comes to dominate care The author does not call for a rejection of professional systems in favor of a resurrected informal community While much can and should be done to strengthen our ties to one another there will always be people whose problems require more expert help Dill argues here that case management can provide such help and provide it well but only if it is grounded in the human dimension of a caring relationship Ann E P Dill associate professor of sociology and gender studies at Brown University is a medical sociologist and social gerontologist Her research examines issues affecting the long term provision of health care and social services both in the United States and in countries formerly part of Yugoslavia
