Love War:

War and Conflict Quotations Michael C. Thomsett, Jean Freestone Thomsett, 2015-09-02 History is replete with pronouncements on war. Some reflect on man's warlike nature. We are quick to flare up, we races of men on the earth. Homer others deal with the practical strategies of the combatants. If Hitler invaded hell I would make at least a favorable reference to the devil in the House of Commons. Winston Churchill and still others offer advice for avoiding conflict. The most disadvantageous peace is better than the most just war. Desiderius Erasmus. More than 2 700 quotations on war and conflict are presented in this reference work. The quotations are arranged by more than 100 broad categories from action to winning. For each the quotation is first given followed by its author, the work in which it appeared when appropriate and the date. The book includes numerous cross references and keyword in context and author indexes are provided for further utility. The Fourth Dimension of Warfare: Intelligence, subversion, resistance, by S. G. F. Brandon [and others] Michael Elliott-Bateman, 1970. Quagmire Phil Beidler (foreword) Donald Anderson (editor), 2021-10 In Quagmire you'll find a range of voices, men and women, military and civilian and a range of perspectives from the homeland, the combat zone and war's aftermath. These personal responses to war in Iraq and Afghanistan have been selected from War Literature the Arts. An International Journal of the Humanities to mark the thirtieth anniversary of its inaugural publication. The responses cover approximately fifteen years of the United States conflicts in Iraq and Afghanistan and demonstrate the aftermath of war and the degreed ripples that extend beyond soldiers to families and friends, lovers, hometowns, even pets. As citizens Pablo Neruda advised we have an obligation to come and see the blood in the streets. To ignore what we do in war and what war does to us is to move willfully toward ignorance. To ignore such reminders imperils ourselves, our communities and our nation. **De Bow's Review**, 1861. **Psychologism** Martin Kusch, 2005-06-23 First published in 1995. When did psychology become a distinct discipline? What links the continental and analytic traditions in philosophy? Answers to both questions are found in this extraordinary account of the debate surrounding psychologism in Germany at the turn of the century. The trajectory of twentieth century philosophy has been largely determined by this anti-naturalist view which holds that empirical research is in principle different from philosophical inquiry and can never make significant contributions to the latter's central issues. Martin Kusch explores the origins of psychologism through the work of two major figures in the history of twentieth century philosophy: Gottlob Frege and Edmund Husserl. His sociological and historical reconstruction shows how the power struggle between the experimental psychologists and pure philosophers influenced the thought of these two philosophers, shaping their agendas and determining the success of their arguments for a sharp separation of logic from psychology. A move that was crucial in the creation of the distinct discipline of psychology and was responsible for the anti-naturalism found in both the analytic and the phenomenological traditions in philosophy. Students and lecturers in philosophy, psychology, linguistics, cognitive science and history will find this study invaluable for understanding a key moment in the intellectual history of the
