Major Companies of the Far East and Australasia ,1990 The Role of Multinational Companies in the Middle East Mamarinta P. Mababaya,2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom s socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general

International Business Information Michael Halperin,Ruth A. Pagell,2024-02-02 This newly updated and expanded edition of a reference bestseller is the only work available that guides business researchers and librarians to the most valuable sources for information on international

business and shows how to interpret and use that data The authors discuss the best available resources and how to use them to find answers to a wide range of questions about international business They also describe business practices in various regions and countries the basics of international trade and finance international business organizations and relevant political departments and agencies Many exhibits and tables are included and the book s appendices include glossaries checklists for evaluating sources and sample disclosure documents

World Investment Directory 1996 United Nations Conference on Trade and Development,1997 This Directory provides data on foreign direct investment related variables It gives basic data on firms the legal framework within which investments take place bibliographic information pertaining to the role of transnational corporations in individual countries

International Business Success in a Strange Cultural Environment Mamarinta P. Mababaya,2003 The book focuses on the cultural aspect of the author s published PhD thesis entitled The Role of Multinational Companies in the Middle East The Case of Saudi Arabia which he has carried out at the University of Westminster It explores the success of multinational enterprises doing business in Saudi Arabia vis vis their cultural awareness and responsiveness The empirical findings discussed in this book reveal that international business success in a strange cultural environment depends partly on the ability of multinational managers to understand the local culture The cultural subject in this book pertains to Islam in its entirety The findings may seem strange to many readers who are not familiar with Islamic culture in its purest form Many newcomers to Saudi Arabia especially non Muslim foreign investors businessmen and workers often find many things strange about the Kingdom its people and cultural values Some feel it odd that many Muslims give more importance to prayer than business Some are disappointed when they find commercial establishments like shopping centres closed as Muslim workers go to the mosques to attend to their daily prayers Business visitors find strange the fact that in the midst of their meetings with their Saudi or Muslim counterparts the latter excuse themselves for prayer They have these strange feelings due to their lack of understanding of true Islamic culture The cultural aspect of this book will help businessmen and concerned institutions worldwide gain understanding of Islam and reconcile their cultural differences with the Muslim world Through this book international companies will be able to have a better understanding of authentic Islamic culture which will help them gain greater competitive advantages in the Saudi marketplace

Human Rights, the Rule of Law, and Development in Africa Paul Tiyambe Zeleza,Philip J. McConnaughay,2011-06-07 Changes in human rights environments in Africa over the past decade have been facilitated by astounding political transformations the rise of mass movements and revolts driven by

democratic and developmentalist ideals as well as mass murder and poverty perpetuated by desperate regimes and discredited global agencies Human Rights the Rule of Law and Development in Africa seeks to make sense of human rights in Africa through the lens of its triumphs and tragedies its uneven developments and complex demands The volume makes a significant contribution to the debate about the connections between the protection of human rights and the pursuit of economic development by interrogating the paradigms politics and practices of human rights in Africa Throughout the essays emphasize that democratic and human rights regimes are products of concrete social struggles not simply textual or legal discourses Including some of Africa s leading scholars jurists and human rights activists contributors to the volume diverge from Western theories of African democratization by rejecting the continental view of an Africa blighted by failure disease and economic malaise It argues instead that Africa has strengthened and shaped international law such as the right to self determination inspired by the process of decolonization and the definition of the refugee Insisting on the holistic view that human rights are as much about economic and social rights as they are about civil and political rights the contributors offer novel analyses of African conceptions experiences and aspirations of human rights which manifest themselves in complex global regional and local idioms Further they explore the varied constructions of human rights in African and Western discourses and the roles played by states and NGOs in promoting or subverting human rights Combining academic analysis with social concern intellectual discourse with civic engagement and scholarly research with institution building this is a compelling and original approach to the question whether externally inspired solutions to African human rights issues have validity in a postcolonial world
