Maps and the Writing of Space in Early Modern England and Ireland B. Klein, 2001-01-11 Maps make the world visible but they also obscure distort idealize This wide ranging study traces the impact of cartography on the changing cultural meanings of space offering a fresh analysis of the mental and material mapping of early modern England and Ireland Combining cartographic history with critical cultural studies and literary analysis it examines the construction of social and political space in maps in cosmography and geography in historical and political writing and in the literary works of Marlowe Shakespeare Spenser and Drayton

Historian's Guide to Early British Maps Helen Wallis, Anita McConnell, 1995-04-06 Great Britain and Ireland enjoy a rich cartographic heritage yet historians have not made full use of early maps in their writings and research This is partly due to a lack of information about exactly which maps are available With the publication of this volume from the Royal Historical Society we now have a comprehensive guide to the early maps of Great Britain The book is divided into two parts part one describes the history and purpose of maps in a series of short essays on the early mapping of the British Isles part two comprises a guide to the collections national and regional Now available from Cambridge University Press this volume provides an essential reference tool for anyone requiring to access maps of the British Isles dating back to the medieval period and beyond

Manors and Maps in Rural England, from the Tenth Century to the Seventeenth P.D.A. Harvey, 2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside

Britain's Tudor Maps John Speed, 2016-10-13 A stunning new edition of the earliest atlas of the British Isles Britain s Tudor Maps County by County reproduces the maps of John Speed s 1611 collection The Theatre of Great Britaine in large easy to read format for the first time Compiled from 1596 these richly detailed maps show each county of Great Britain individually and as they existed at the time complete with a wealth of heraldic decoration illustrations and royal portraits With an introduction by the bestselling author Nigel Nicholson each map is presented alongside a fascinating

commentary by Alasdair Hawkyard elaborating on both the topographical features and the social conditions of each county at the time enabling an examination of how the physical and social landscape has been transformed over time **The Royal Map Collections of England** Helen Wallis,1981 *Maps and History* Jeremy Black,2000-01-01 Explores the role development and nature of the atlas and discusses its impact on the presentation of the past [Ships on Maps](#) Richard W. Unger,2010-08-04 Renaissance map makers produced ever more accurate descriptions of geography which were also beautiful works of art They filled the oceans Europeans were exploring with ships and to describe the real ships which were the newest and best products of technology Above all the ships were there to show the European conquest of the seas of the world *The King's Two Maps* Daniel Birkholz,2004-03-01 While a culture may have a dominant way of mapping its geography is always plural and there is always competition among conceptions of space Beginning with this understanding this book traces the map s early development into an emblem of the state and charts the social and cultural implications of this phenomenon This book chronicles the specific technologies both material and epistemological by which the map shows itself capable of accessing organizing and reorienting a tremendous range of information *Dury and Andrews' Map of Hertfordshire* Andrew Macnair,Anne Rowe,Tom Williamson,2015-11-30 This book is about the map of an English county Hertfordshire which was published in 1766 by two London mapmakers Andrew Dury and John Andrews For well over two centuries from the time of Elizabeth I to the late 18th century the county was the basic unit for mapping in Britain and the period witnessed several episodes of comprehensive map making The map which forms the subject of this book followed on from a large number of previous maps of the county but was greatly superior to them in terms of quality and detail It was published in a variety of forms in nine sheets with an additional index map over a period of 60 years No other maps of Hertfordshire were produced during the rest of the century but the Board of Ordnance later the Ordnance Survey established in the 1790s began to survey the Hertfordshire area in 1799 publishing the first maps covering the county between 1805 and 1834 The OS came to dominate map making in Britain but of all the maps of Hertfordshire that produced by Dury and Andrews was the first to be surveyed at a sufficiently large scale to really allow those dwelling in the county to visualize their own parish local topography and even their own house and its place in the wider landscape The first section examines the context of the map s production and its place in cartographic history and describes the creation of a new digital version of the map which can be accessed online The second part describes various ways in which this electronic version can be interrogated in order to throw important new light on Hertfordshire s landscape and society both in the middle decades of the eighteenth century when it was produced and in more remote periods The attached DVD contains over a dozen maps which have been derived from the digital version and which illustrate many of the issues discussed in the text as well as related material which should likewise be useful to students of landscape history historical geography and local history

Maps in Tudor England Paul D. A. Harvey,1993 **The Map Book** Peter Barber,2005-01-01 Chronicles the historical

development of maps and mapping from the Bronze Age to the present collecting some 175 maps spanning ten millennia that represent the progress of civilization and technology from military plans that depict enemy positions to the famed London Underground layout to the digitally enhanced renderings of today *A Teacher's Manual Accompanying the Harding European History Maps* Samuel Bannister Harding, 1917 Constructing and Representing Territory in Late Medieval and Early Modern Europe Mario Damen, Kim Overlaet, 2025-10-01 In recent political and legal history scholars seldom specify how and why they use the concept of territory In research on state formation processes and nation building for instance the term mostly designates an enclosed geographical area ruled by a central government Inspired by ideas from political geographers this book explores the layered and constantly changing meanings of territory in late medieval and early modern Europe before cartography and state formation turned boundaries and territories into more fixed but still changeable geographical entities Its central thesis is that assessing the notion of territory in a pre modern setting involves analysing territorial practices practices that relate people and power to space s The essays in this book not only examine the construction and spatial structure of pre modern territories but also explore their perception and representation through the use of a broad range of sources from administrative texts to maps from stained glass windows to chronicles **North-East England, 1569-1625** Diana Newton, 2006 This study of England's north eastern parts examines counties Durham and Northumberland as well as Newcastle upon Tyne with its central theme the extent to which the county gentry and urban elites possessed a sense of regional identity It concentrates on these elites social political religious and cultural connections which extended beyond the purely administrative jurisdictions of the county or town By concentrating on a series of seismic changes in the area the demise of its great regional magnates the rapid upsurge of the coal industry and the union of the crowns it offers a distinctive chronological coverage from the latter half of the sixteenth century through to the early seventeenth century Old stereotypes of the north eastern landed elites as isolated and backward are overturned while their response to state formation reveals their political sophistication Traditional views of the religious conservatism of the north eastern parts are reassessed to demonstrate its multi faceted complexion And contrasting cultural patterns are analysed through ballad literature the cult of St Cuthbert and increasing exposure to metropolitan civility to reveal a series of sub regions within the north eastern reaches of the kingdom Dr DIANA NEWTON is Lecturer in History at the University of Teesside Shakespeare's histories and counter-histories Dermot Cavanagh, Stuart Hampton-Reeves, Stephen Longstaffe, 2018-07-30 Shakespeare's history plays have always been pivotal to our understanding of his works This collection renews attention to these crucial plays by exploring official and unofficial versions of the past histories and counter histories in the plays of Shakespeare and his contemporaries By exploring the diversity of Shakespeare's engagement with history in all its forms these contributors open up a range of new interpretive possibilities for understanding the way history plays with the past The book is divided into three sections Memory and mourning Counter histories Identity and performance

In each section leading theorists historicists and performance critics offer fresh perspectives on the key issues that are transforming our understanding of Shakespeare These include gender and violence the mapping of Britain cultural memory and religion This collection will appeal to all critically engaged readers of Shakespeare In particular it will command wide ranging interest from undergraduates postgraduates academic researchers and students of early modern theatre history and culture

Region, Religion and Patronage Richard Dutton, Alison Gail Findlay, Richard Wilson, 2003 This groundbreaking book uses the possibility that Shakespeare began his theatrical career in Lancashire to open up a range of new contexts for reading the plays and introduces readers to the non metropolitan theater spaces which formed a vital part of early modern dramatic activity Essays give a detailed picture of the contexts in which the apprentice dramatist would have worked providing new insights into regional performance touring theatre the patronage of the Earls of Derby and the purpose built theater at Prescott
