Methods of Metaphysics Alan White, 2019-03-06 Originally published in 1987 This book comprises a critical exposition of the thoughts on metaphysics of the major philosophers of the tradition It introduces the ideas of these philosophers to students but is of interest to teachers as well The author begins with a survey of the metaphysical writings of Plato Aristotle Berkeley Leibniz and Bradley clarifying throughout the relation of their methods and results to those of science He follows this with a careful study of the critical attitudes to metaphysics espoused by Kant Wittgenstein and the Logical Positivists In the final section he scrutinizes the attempts by Collingwood Wisdom and Lazerowitz to rehabilitate metaphysics *Methods in the Philosophy of Science* Sophie J Veigl, Adrian Currie, 2025-07-15 A guidebook to methods and methodology encouraging deeper engagement across the philosophy of science and beyond The last twenty years have seen multiple methodological revolutions in the philosophy of science There has been increased diversity concerning the questions asked who asks those questions who the relevant audiences are and what the techniques and tools involved are In *Methods in the Philosophy of Science A User's Guide* Sophie Veigl and Adrian Currie introduce this range of methods through both practical advice and philosophical reflection Each chapter introduces the reader to a method or set of methods in the philosophy of science discusses its advantages and limitations and provides practical guidance on how to learn skills relevant to applying the method The volume fulfills several critical roles First by introducing and discussing methods in the philosophy of science the collection increases philosophers awareness of methodological options of particular importance for younger scholars who are often not exposed to the diversity of practice Second the collection's practical focus will aid established philosophers in diversifying their own methodological toolkits Third collecting this diversity serves as a ground for philosophical reflection on what we as philosophers take ourselves to be capable of Fourth the collection hopes to increase interdisciplinary links between philosophy and other fields by laying clear the methodological continuity and complement between them
