Borders Freedom Harald Bauder, 2016-09-01 International borders have become deadly barriers of a proportion rivaled only by war or natural disaster Yet despite the damage created by borders most people can't or don't want to imagine a world without them What alternatives do we have to prevent the deadly results of contemporary borders In today's world national citizenship determines a person's ability to migrate across borders Migration Borders Freedom questions that premise Recognizing the magnitude of deaths occurring at contemporary borders worldwide the book problematizes the concept of the border and develops arguments for open borders and a world without borders It explores alternative possibilities ranging from the practical to the utopian that link migration with ideas of community citizenship and belonging The author calls into question the conventional political imagination that assumes migration and citizenship to be responsibilities of nation states rather than cities While the book draws on the theoretical work of thinkers such as Ernst Bloch David Harvey and Henry Lefebvre it also presents international empirical examples of policies and practices on migration and claims of belonging In this way the book equips the reader with the practical and conceptual tools for political action activist practice and scholarly engagement to achieve greater justice for people who are on the move The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781315638300> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license International Encyclopedia of Human Geography, 2009-07-16 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of
