Metropolis Proceedings Of A Conference In Honour Of Hans Blumenfeld:

The Shape of the City John Sewell, 1993-01-01 Critics have long voiced concerns about the wisdom of living in cities and the effects of city life on physical and mental health For a century planners have tried to meet these issues John Sewell traces changes in urban planning from the pre Depression garden cities to postwar modernism and a revival of interest in the streetscape grid In this far ranging review Sewell recounts the arrival of modern city planning with its emphasis on lower densities limited access streets segregated uses and considerable green space He makes Toronto a case history with its pioneering suburban development in Don Mills and its other planned communities including Regent Park St Jamestown Thorncrest Village and Bramalea The heyday of the modern planning movement was in the 1940s to the 1960s and the Don Mills concept was repeated in spirit and in style across Canada Eventually strong public reaction brought modern planning almost to a halt within the city of Toronto The battles centred on saving the Old City Hall and stopping the Spadina Expressway Sewell concludes that although the modernist approach remains ascendant in the suburbs the City of Toronto has begun to replace it with alternatives that work This is a reflective but vigorous statement by a committed urban reformer Few Canadians are better suited to point the way towards city planning for the future **Habitations et Milieu de Vie**

John Miron, 1994-04-12 Les collaborateurs identifient certains crit res importants pour l valuation de la situation actuelle et future dans le domaine du logement pr cisent les questions et priorit s de la recherche en mati re de logement et signalent certaines questions de politique qui se dessinent Les articles sont r partis en six sections facteurs conomiques d mographiques et institutionnels sous jacents la demande de logements au cours de la p riode de l apr s guerre principaux aspects de l offre de logements et notamment financement technologie et r glementation croissance du parc immobilier et modifications de la qualit des logements quilibre entre l offre et la demande compte tenu de ce qui est suffisant convenable et abordable volution de l environnement des lieux habit s le ons d fis et questions pour l avenir L ouvrage contient galemment certains r sum s utiles des mesures prises entre 1945 et 1986 en mati re de politiques de logement Document de r f rrence essentiel sur le logement urbain et le d veloppement des villes au cours de la p riode d apr s guerre au Canada Habitations et milieu de vie sera appr ci des universitaires des planificateurs des professionnels et des tudians qui s int ressent aux questions de logement

The Myth of the North American City Michael Goldberg, John Mercer, 2011-11-01 The continuing tendency to continentalize Canadian issues has been particularly marked in the area of urban studies where United States based research findings methodologies and attitudes have held sway In this book Goldberg and Mercer demonstrate that the label North American City as widely used is inappropriate and misleading in discussion of the distinctive Canadian urban environment Examining such elements of the cultural context as mass values social and demographic structures the economy and political institutions they reveal salient differences between Canada and the United States One of the most important of the many contextual differences is the strong collective sense in Canada which accepts more public intervention in social and

economic matters in contrast to the American commitment to individualism Canadians consequently expect a livable central city which is compact and well served by public transit and which has a fiscally sound local government To demonstrate these issues the discussion includes a detailed cross national empirical analysis of over 300 North American metropolitan areas along some three dozen dimensions including density transportation household change and structure income and fiscal disparities and economic structure Since much urban planning in Canada is based upon the continentalist assumption this volume should generate a reassessment of policy and encourage the development of a research base to suit the distinctiveness of the Canadian experience With growing pressures to take a North American view of Canadian policies it is vitally important that the differences delineated in this book are understood not just for their urban policy implications but for broader purposes as well

The Metropolis Hans Blumenfeld,1985 House, Home, and Community John R. Miron,1993-04-29 The contributors identify important considerations for evaluating the current and future housing situation clarify housing research issues and priorities and indicate emergent policy issues The essays are divided into six sections economic demographic and institutional factors underlying the postwar demand for housing principal aspects of the supply side of housing including housing finance technology and regulation housing stock growth and changes in housing quality the balance of supply and demand in terms of adequacy suitability and affordability the changing settlement environment and lessons challenges and issues for the future The book also contains valuable summaries of housing policy initiatives undertaken between 1945 and 1986 An essential reference document on urban housing and city development in the postwar period in Canada House Home and Community will be valuable to academics planners professionals and students with interests related to housing

Stadtplaner "... es sei denn, sie bauen eine humane Stadt." Hans Blumenfeld,Volker Roscher,1993 Housing the Homeless and Poor George Fallis,Alex L. Murray,1990 Multiversities are sprawling conglomerates that provide liberal undergraduate graduate and professional education As well springs of innovation and ideas these universities represent the core of society s research enterprise Multiversities Ideas and Democracy forcibly argues that in the contemporary world multiversities need to be conceptualized in a new way that is not just as places of teaching and research but also as fundamental institutions of democracy Building upon the history of universities George Fallis discusses how the multiversity is a distinctive product of the later twentieth century and has become an institution of centrality and power He examines five characteristics of our age the constrained welfare state the information technology revolution postmodern thought commercialization and globalization and in each case explains how the dynamic of multiversity research alters societal circumstances leading to the alteration of the institution itself and creating challenges to its own survival The character of our age demands reappraisal of the multiversity Fallis argues in order to safeguard them from so called mission drift Writing from a multi national perspective

this study establishes how similar ideas are shaping multiversities across the Anglo American world Ultimately Multiversities Ideas and Democracy seeks to uncover the ethos of the multiversity and to hold such institutions accountable for their contribution to democratic life It will appeal to anyone interested in the role of education in society
