

METROPOLITAN PROBLEMS

Racism, Poverty, Crime, Housing, and Fiscal Crisis

Until recently, urban problems were city problems. That is no longer the case as the issues once associated with the large, compact settlement form have spread out, like the metropolitan population and its economic activities, to characterize the entire urban region. In the late 1960s and 1970s, especially during President Johnson's Great Society, urban problems were defined almost exclusively as those involving racial segregation, poverty, violent crime, and drugs. Now, in the first decade of the twenty-first century, poverty, unemployment, foreclosures, and homelessness, as well as the severe economic recession itself, are particular issues of concern. As the attention of the federal government in Washington, D.C., focuses on the major issues of the economy and health care, the nation's state governments seem to be ignored. Consequently, adding to our other urban ills, we currently face more intense fiscal crises and their impact on local public services and infrastructure.

Was there ever a baseline in America against which the problems of today can be measured? As in the other industrialized capitalist countries of Europe, the quality of urban life with the advent of capitalism in the 1800s was severe for all but the wealthy. Early photographic images of American cities at the turn of the last century feature overcrowding; immense traffic jams of primitive Model-T automobiles mixed in with horse-drawn carts, tenements teeming with immigrants, and crowds of children swarming across city streets. Until after World War II, city life in the United States was plagued by frequent public health crises such as cholera outbreaks, high infant mortality rates, alcoholism, domestic violence, street gang activity, and crime. For much of our history, then, city life has been virtually synonymous with social problems. Yet we know now that these same problems—crime, disease, family breakup—are experienced everywhere.

The sociologists of the early Chicago School, in the 1920s and 1930s, believed that the move to the city was accompanied by social disorganization. While subsequent research showed that this perception was inaccurate, people in the United States still rank small and middle-size cities or suburbs as providing the highest quality of life and

Metropolitan Problems International Perspectives A Search For Comprehensive Ve:

Metropolitan problems: international perspectives; a search for comprehensive solutions S.R. Miles, 1970

Metropolitan Problems S. Miles, 2013-05-13 *Metropolitan Problems* is the end product of one of the most dynamic research programmes of its kind ever conceived and executed. The book, which took three years to complete, represents the culmination of a two-year study that was highlighted by a conference held in Toronto in 1967. In the early 1960s, the Bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas. The study, with the official cooperation of the United Nations, was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis. Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts. Working with these experts were study groups drawn from forty major metropolitan centres throughout the world. After making exhaustive studies of their respective urban centres, the groups reported their findings and submitted detailed briefs through their representatives at the conference. Throughout the symposium, a conscious effort was made to examine single aspects of social, economic, and physical change within the overall perspective of the metropolis. The book reflects this approach. Each chapter directs attention to specific problems of the metropolis, resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change. Together, they prove that despite differences in technology, culture, and political and social matters, the major urban areas of the world do have much in common. Emerging tendencies can be analysed, and corrective and preventative measures can be made through comparative analysis. This book was first published in 1970.

Metropolitan Problems Simon R. Miles, 2007 **Housing and Planning References**, 1971 Mega Urban Regions of Southeast Asia Ira M. Robinson, 2011-11-01 A distinguishing feature of recent urbanization in the ASEAN countries of Thailand, Malaysia, the Philippines, Singapore, and Indonesia is the outward extension of their mega cities: Bangkok, Jakarta, Manila, Singapore, and Kuala Lumpur, beyond the metropolitan borders, resulting in the establishment of new towns, industrial estates, and housing projects in previously rural areas. This process has both positive and negative effects. On one side, household incomes and employment opportunities are increasing, but on the other, the growth often causes serious problems in terms of environmental deterioration, conflicting land uses, and inadequate housing and service provisions. *Mega Urban Regions of Southeast Asia* is the first comprehensive work on the subject of ASEAN mega urban regions. The contributors review T. G. McGee's original idea of *desakota* zones and offer arguments both for and against this concept, making a significant contribution to our understanding of the true face of ASEAN cities. The book brings together authors from around the world and will be of interest to a wide audience, including demographers, urban planners, geographers, sociologists, economists, civil servants, and development consultants.
