The Human Tradition in Urban America Roger Biles, 2002 Introduces problems and concerns facing different groups of urban Americans at different times through biographical readings

Whose Detroit? Heather Ann Thompson, 2017-04-01 Thompson s engrossing book is essential for any collection on the history politics or society of post World War II America Library Journal In Whose Detroit Heather Ann Thompson focuses in detail on the African American struggles for full equality and equal justice under the law that shaped the Motor City during the 1960s and 1970s Even after Great Society liberals committed themselves to improving conditions in Detroit Thompson argues poverty and police brutality continued to plague both neighborhoods and workplaces Frustration with entrenched discrimination and the lack of meaningful remedies not only led black residents to erupt in the infamous urban uprising of 1967 but it also sparked myriad grassroots challenges to postwar liberalism in the wake of that rebellion With deft attention to the historical background and to the dramatic struggles of Detroit s residents and with a new prologue that argues for the ways in which the War on Crime and mass incarceration also devastated the Motor City over time Thompson has written a biography of an entire nation at a time of crisis

[Henry Ford's Plan for the American Suburb](#)
Heather Barrow, 2018-10-29 Around Detroit suburbanization was led by Henry Ford who not only located a massive factory over the city s border in Dearborn but also was the first industrialist to make the automobile a mass consumer item So suburbanization in the 1920s was spurred simultaneously by the migration of the automobile industry and the mobility of automobile users A welfare capitalist Ford was a leader on many fronts he raised wages increased leisure time and transformed workers into consumers and he was the most effective at making suburbs an intrinsic part of American life The decade was dominated by this new political economy also known as Fordism linking mass production and consumption The rise of Dearborn demonstrated that Fordism was connected to mass suburbanization as well Ultimately Dearborn proved to be a model that was repeated throughout the nation as people of all classes relocated to suburbs shifting away from central cities Mass suburbanization was a national phenomenon Yet the example of Detroit is an important baseline since the trend was more discernable there than elsewhere Suburbanization however was never a simple matter of outlying communities

growing in parallel with cities. Instead, resources were diverted from central cities as they were transferred to the suburbs. The example of the Detroit metropolis asks whether the mass suburbanization which originated there represented the American dream and if so, by whom and at what cost. This book will appeal to those interested in cities and suburbs, American studies, technology and society, political economy, working class culture, welfare state systems, transportation, race relations, and business management.

Redevelopment and Race June Manning Thomas, 2013-04-15. In the decades following World War II, professional city planners in Detroit made a concerted effort to halt the city's physical and economic decline. Their successes included an award-winning master plan, a number of laudable redevelopment projects, and exemplary planning leadership in the city and the nation. Yet despite their efforts, Detroit was rapidly transforming into a notorious symbol of urban decay. In *Redevelopment and Race: Planning a Finer City in Postwar Detroit*, June Manning Thomas takes a look at what went wrong, demonstrating how and why government programs were ineffective and even destructive to community needs. In confronting issues like housing shortages, blight in older areas, and changing economic conditions, Detroit's city planners worked during the urban renewal era without much consideration for low-income and African American residents, and their efforts to stabilize racially mixed neighborhoods faltered as well. Steady declines in industrial prowess and the constant decentralization of white residents counteracted planners' efforts to rebuild the city. Among the issues Thomas discusses in this volume are the harmful impacts of Detroit's highways, the mixed record of urban renewal projects like Lafayette Park, the effects of the 1967 riots on Detroit's ability to plan, the city-building strategies of Coleman Young, the city's first black mayor, and his mayoral successors, and the evolution of Detroit's federally designated Empowerment Zone. Examining the city she knew first as an undergraduate student at Michigan State University and later as a scholar and planner, Thomas ultimately argues for a different approach to traditional planning that places social justice, equity, and community ahead of purely physical and economic objectives. *Redevelopment and Race* was originally published in 1997 and was given the Paul Davidoff Award from the Association of Collegiate Schools of Planning in 1999. Students and teachers of urban planning will be grateful for this re-release. A new postscript offers insights into changes since 1997.
