A History of Mexican Poetry José Ramón Ruisánchez Serra, Anna M. Nogar, Ignacio M. Sánchez Prado, 2024-03-21 Covering Mexican literary history from pre-Columbian literature to the twenty-first century, including works from Greater Mexico, this book is the most comprehensive study on Mexican poetry available in English. It examines key authors such as Bernardo de Balbuena, Juana de Asbaje, Ramón L. Velarde, José Gorostiza, and Octavio Paz and considers how they should be read today. Individual chapters focus on important movements, poetic forms, and topics such as epics, lyric poetry, romanticism, modernism, poetry, and performance poetry in indigenous languages, Mexican American and Chicana poetry, and the relationship between Mexican literature and gender. This book provides a global understanding of Mexican poetry, its institutions, and its main authors for students and scholars in any discipline connected to the subject.

A History of Literature in the Caribbean A. James Arnold, Julio Rodríguez-Luis, J. Michael Dash, 1994-09-06 This history for the first time charts the literature of the entire Caribbean, the islands as well as continental littoral, as one cultural region. It breaks new ground in establishing a common grid for reading literatures that have been kept separate by their linguistic frontiers. Readers will have access to the best current scholarship on the evolution of popular and literate cultures in the various regions since their earliest emergence. The *History of Literature in the Caribbean* brings together the most distinguished team of literary Caribbeanists ever assembled, cutting across ideological commitments and critical methods. Differences in point of view between individual contributors are left intact here as the sign of the colonial inheritance of the region. Introductions and conclusions to the various sections of the *History*, written by the respective subeditors, set them in proper perspective. The unique synoptic aspect of the *History* lies in its comprehensiveness and its range, which are unequalled.
