Mexico City World City Map:

The World Through Maps John R. Short, 2003 An illustrated history of maps and mapmaking including reproductions of 200 antique maps

Disease Maps Tom Koch, 2011-06-30 In the seventeenth century a map of the plague suggested a radical idea that the disease was carried and spread by humans In the nineteenth century maps of cholera cases were used to prove its waterborne nature More recently maps charting the swine flu pandemic caused worldwide panic and sent shockwaves through the medical community In *Disease Maps* Tom Koch contends that to understand epidemics and their history we need to think about maps of varying scale from the individual body to shared symptoms evidenced across cities nations and the world *Disease Maps* begins with a brief review of epidemic mapping today and a detailed example of its power Koch then traces the early history of medical cartography including pandemics such as European plague and yellow fever and the advancements in anatomy printing and world atlases that paved the way for their mapping Moving on to the scourge of the nineteenth century cholera Koch considers the many choleras argued into existence by the maps of the day including a new perspective on John Snow's science and legacy Finally Koch addresses contemporary outbreaks such as AIDS cancer and H1N1 and reaches into the future toward the coming epidemics Ultimately *Disease Maps* redefines conventional medical history with new surgical precision revealing that only in maps do patterns emerge that allow disease theories to be proposed hypotheses tested and treatments advanced

TransArea Ottmar Ette, 2016-07-11 Ottmar Ette's *TransArea* proceeds from the thesis that globalization is not a recent phenomenon but rather a process of long duration that may be divided into four main phases of accelerated globalization These phases connect our present across the world's widely divergent modern eras to the period of early modern history Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life both of our planet and on our planet which may only be understood through the application of multiple logics There is no substitute for the knowledge of literature it is the knowledge of life from life This English translation will be of great interest to English speaking scholars in the fields of Global and Area Studies Literary Studies Cultural Studies History Political Science and many more About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam Germany since 1995 He is Honorary Member of the Modern Language Association of America MLA elected in 2014 member of the Berlin Brandenburg Academy of Sciences and Humanities elected in 2013 and regular member of the Academia Europaea since 2010

Worldly Consumers Genevieve Carlton, 2015-06-22 Though the practical value of maps during the sixteenth century is well documented their personal and cultural importance has been relatively underexamined In *Worldly Consumers* Genevieve Carlton explores the growing availability of maps to private consumers during the Italian Renaissance and shows how map acquisition and display became central tools for constructing personal identity and impressing one's peers Drawing on a variety of sixteenth century sources including household inventories epigrams dedications catalogs travel books and advice manuals *Worldly Consumers* studies

how individuals displayed different maps in their homes as deliberate acts of self fashioning One citizen decorated with maps of Bruges Holland Flanders and Amsterdam to remind visitors of his military prowess for example while another hung maps of cities where his ancestors fought or governed in homage to his auspicious family history Renaissance Italians turned domestic spaces into a microcosm of larger geographical places to craft cosmopolitan erudite identities for themselves creating a new class of consumers who drew cultural capital from maps of the time
