

# WHAT IS PLANNING

---

- Planning is a systematic process to create or development of any specific project.
- In the sense of library automation planning, a thorough study of the library's existing system as well as the library's vision is necessary to enable you to prepare a good technology plan .
- Planning for library automation has been defined as planning for "integrated Library management systems" that computerize an array of traditional library functions using a common database. As physical, spatial and temporal barriers to acquiring information continue to crumble, libraries must plan for a broader and more comprehensive approach to providing automated services.
