Miami Years 1809 1984:

The Miami Years, 1809-1984 Walter Havighurst, 1984 *Southern Communities* Steven E. Nash, Bruce E. Stewart, 2019-07-15 Community is an evolving and complex concept that historians have applied to localities counties and the South as a whole in order to ground larger issues in the day to day lives of all segments of society These social networks sometimes unite and sometimes divide people they can mirror or transcend political boundaries and they may exist solely within the cultures of like minded people This volume explores the nature of southern communities during the long nineteenth century The contributors build on the work of scholars who have allowed us to see community not simply as a place but instead as an idea in a constant state of definition and redefinition They reaffirm that there never has been a singular southern community As editors Steven E Nash and Bruce E Stewart reveal southerners have constructed an array of communities across the region and beyond Nor do the contributors idealize these communities Far from being places of cooperation and harmony southern communities were often rife with competition and discord Indeed conflict has constituted a vital part of southern communal development Taken together the essays in this volume remind us how community focused studies can bring us closer to answering those questions posed to Quentin Compson in Absalom Absalom Tell us about the South What s it like there What do they do there Why do they live there Why do they live at all **Haunted Halls** Elizabeth Tucker, 2009-10-20 Why do so many American college students tell stories about encounters with ghosts In Haunted Halls the first book length interpretive study of college ghostlore Elizabeth Tucker takes the reader back to school to get acquainted with a wide range of college spirits Some of the best known ghosts that she discusses are Emory University s Dooley who can disband classes by shooting professors with his water pistol Mansfield University s Sara who threw herself down a flight of stairs after being rejected by her boyfriend and Huntingdon College s Red Lady who slit her wrists while dressed in a red robe Gettysburg College students have collided with ghosts of soldiers while students at St Mary of the Woods College have reported frightening glimpses of the Faceless Nun Tucker presents campus ghostlore from the mid 1960s to 2006 with special attention to stories told by twenty first century students through e mail and instant messages Her approach combines social psychological and cultural analysis with close attention to students own explanations of the significance of spectral phenomena As metaphors of disorder insanity and school spirit college ghosts convey multiple meanings Their colorful stories warn students about the dangers of overindulgence as well as the pitfalls of potentially horrifying relationships Besides offering insight into students initiation into campus life college ghost stories make important statements about injustices suffered by Native Americans African Americans and others **Replanting Cultures** Chief Benjamin J. Barnes, Stephen Warren, 2022-09-01 Replanting Cultures provides a theoretical and practical guide to community engaged scholarship with Indigenous communities in the United States and Canada Chapters on the work of collaborative respectful and reciprocal research between Indigenous nations and colleges and universities museums archives and research centers

are designed to offer models of scholarship that build capacity in Indigenous communities Replanting Cultures includes case studies of Indigenous nations from the St l of the Fraser River Valley to the Shawnee and Miami tribes of Oklahoma Ohio and Indiana Native and non Native authors provide frank assessments of the work that goes into establishing meaningful collaborations that result in the betterment of Native peoples Despite the challenges readers interested in better research outcomes for the world s Indigenous peoples will be inspired by these reflections on the practice of community engagement

Wrongs of Passage Hank Nuwer,2001 Explores the problems of hazing and binge drinking at fraternities and sororities on American college campuses telling the stories of some of the young people who have been seriously injured or died as a result of such behaviors and offers a list of recommendations for reform **How Student Journalists Report Campus**

Unrest Kaylene Dial Armstrong,2017-11-22 Journalists are trained to tell the stories of others and leave themselves out of their writing Student journalists are no different They spend their days on their college newspaper writing about what happens to others especially when what is happening involves protests sit ins riots hunger strikes and other unrest on the very campuses where they also attend school Now some of these former student reporters and editors tell their own stories of some of the challenges all student journalists face in reporting events that most administrators would rather see not covered at all For some this is the first time the stories of what happened in the newsrooms and behind the scenes will appear in print Some of the issues they discuss include censorship the role of the newspaper as the conscience of the community objective and activist journalism and the challenges of reporting crises The protests covered here represent the many concerns college student protesters have tackled through the decades integration in 1962 the free speech movement of 1964 racial issues and the Vietnam War in 1968 and 1970 and continuing racial issues in the present Many of these former student journalists look back decades to their work in the 1960s Some discuss a more recent protest Looking back they admit they might have done things differently if they had to do it again yet all are fiercely proud of the work they did in recording the first version of history **Ball State University** Anthony O. Edmonds,E. Bruce Geelhoed,2001 This is a narrative and interpretive history of a major institution of higher education In it the authors want to avoid the pitfalls of too many other college histories which are sometimes either painfully detailed encyclopaedic catalogues of one damn thing after another or panegyrics praising one damn president or construction project after another Obviously they want to tell an interesting story focusing on the people who inhabited the institution from powerful presidents like John R Emens to boisterous students like David Letterman whose fame as a late night talk show host makes his name a household word And they trace the history of the institution and its people from the local business people who pushed to establish higher education in a small Midwestern city in the late 19th century to a 21st century president who spent most of his life in the South But this is not simply a series of stories The authors emphasise two crucial themes that run throughout Ball State s history First more than most American colleges and universities Ball State has had extraordinarily close ties with the community of Muncie especially its elite From

the fact that it was named after a local industrialist to vital community participation in its latest fundraising campaign Ball State and Muncie East Central Indiana are inextricably linked Second in many ways Ball State is a representative even paradigmatic American university Targeting mainly students from its region Ball State has had virtually open admission standards for most of its history It has lived what we call the Jacksonian vision of access to education It has also followed a trajectory similar to many other American universities as it moved from normal school to teachers college to comprehensive university Indeed the authors argue it is the Ball States of America that best define this nation s genius in higher education separating this country s system of higher education from those of other countries Ball State University then is both distinctive and representative a fascinating case study in educational history **Benjamin Harrison** Anne Chieko Moore,2006 Benjamin Harrison was an honest intelligent hardworking lawyer from Indiana who became the twenty third President of the United States During his term in office he signed important legislation and provided leadership in negotiating foreign policy striving to advance the United States toward becoming a world power The book presents an up to date and cogent biography of this president who is now considered one of the better presidents of the late nineteenth century

Cautionary Tales Alice W. Brown,2023-07-03 Scarcely a week goes by without a headline about the unsustainability of higher education as we know it under threat from new models for profits or online education Most threatened are small liberal arts colleges with commentators predicting the demise of colleges with fewer than 1 000 or even 1 500 students Are these trends inevitable or can they be overcome Through a unique case study approach to examining and analyzing colleges that have struggled Alice Brown reveals the steps that can lead to a sustainable operation and when closure is inevitable the steps to do so with orderliness and dignity Rather than expounding on trends or management theory and prescriptions Brown focuses on narrative examples of survival and closure recounted by real people in actual colleges and reports the lessons they learned Here are examples of strategies involving mergers partnerships or going it alone and their outcomes that illustrate principles that can serve as guides for fragile colleges struggling to address their social and economic challenges Added to Brown s six carefully researched and extended case studies her own insights and analyses of decisions made and actions taken this book offers guidance by seasoned scholars and administrators on issues as varied as leadership the roles of the president governing boards faculty and staff in articulating and implementing mission and strategies for survival and on the changing landscape of higher education The references to the literature on college survival strategies constitute an education in themselves While this book is of immediate practical value for trustees and leaders of small colleges as they look toward and plan for the future and for anyone aspiring to an administrative positions in higher education the examples constitute a microcosm of the interplay between the external constituencies governance structures and internal forces that sustain or undermine institutional health and which are hard to observe clearly in larger more decentralized environments
