Mibing Link The Image Of Man In Contemporary Photography:

Missing Link Carl Aigner, 2000 Photography more than any other medium has altered the way we see ourselves and changed our perception of art Pictures of people have become part and parcel of our daily life influencing us through advertising and media At the same time the status of the human image in art has been enhanced even though photography has called into question traditional views of art Photography is as it were the missing link between man the image of man and art

Light and Photomedia Jai McKenzie, 2020-09-02 Light and Photomedia proposes that regardless of technological change the history and future of photomedia is essentially connected to light It is a fundamental property of photomedia binding with space and time to form and inform new explicitly light based structures and experiences Jai McKenzie identifies light space time structures throughout the history of photomedia from the early image machines through analogue and digital image machines to the present day She proposes that they will continue to develop in the future and takes us to future image machines of the year 2039 With the use of the theories of Paul Virilio Jean Baudrillard and Vilem Flusser featuring artists including Henri Cartier Bresson Nam June Paik Yves Klein Eadweard Muybridge Martha Rosler Cindy Sherman and Michael Snow as well as their photographic images Light and Photomedia places the reader in a new history and future which although mostly overlooked by the canon of photomedia theory is an essential line of enquiry for contemporary thinking and dialogue in photography
