For and Against Method Imre Lakatos,Paul Feyerabend,2010-05-27 The work that helped to determine Paul Feyerabend s fame and notoriety Against Method stemmed from Imre Lakatos s challenge In 1970 Imre cornered me at a party Paul he said you have such strange ideas Why don t you write them down I shall write a reply we publish the whole thing and I promise you we shall have a lot of fun Although Lakatos died before he could write his reply For and Against Method reconstructs his original counter arguments from lectures and correspondence previously unpublished in English allowing us to enjoy the fun two of this century s most eminent philosophers had matching their wits and ideas on the subject of the scientific method For and Against Method opens with an imaginary dialogue between Lakatos and Feyerabend which Matteo Motterlini has constructed based on their published works to synthesize their positions and arguments Part one presents the transcripts of the last lectures on method that Lakatos delivered Part two Feyerabend s response consists of a previously published essay on anarchism which began the attack on Lakatos s position that Feyerabend later continued in Against Method The third and longest section consists of the correspondence Lakatos and

Feyerabend exchanged on method and many other issues and ideas as well as the events of their daily lives between 1968 and Lakatos's death in 1974. The delight Lakatos and Feyerabend took in philosophical debate and the relish with which they sparred come to life again in *For and Against Method* making it essential and lively reading for anyone interested in these two fascinating and controversial thinkers and their immense contributions to philosophy of science. Advanced Research Methods in the Built Environment Andrew Knight, Les Ruddock, 2009-03-16. This book provides a bridge between the introductory research methods books and the discipline specific higher level texts. Its unique feature is the coverage of the detailed process of research rather than the findings of research projects. Chapter authors have been carefully selected by their expertise, discipline and location to give an eclectic range of perspectives. Particular care has been taken to balance positivist with interpretivist approaches throughout. The authors' focus is on the practical consequences of research philosophies, strategies and techniques by using their own research and by evaluating the work of others. *Advanced Research Methods in the Built Environment* addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process. Issues covered range from the practicalities of producing a journal article to the role of theory in research. The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research.
