Urban Transportation Research and Planning, Current Literature ,1974 *Urban America Reconsidered* David L. Imbroscio,2011-01-15 The aftermath of Hurricane Katrina laid bare the tragedy of American cities What the storm revealed about the social conditions in New Orleans shocked many Americans Even more shocking is how widespread these conditions are throughout much of urban America Plagued by ineffectual and inequalitarian governance acute social problems such as extreme poverty and social and economic injustice many American cities suffer a fate similar to that of New Orleans before and after the hurricane Gentrification and corporate redevelopment schemes merely distract from this disturbing reality Compounding this tragedy is a failure in urban analysis and scholarship Little has been offered in the way of solving urban America's problems and much of what has been proposed or practiced remains profoundly misguided in David Imbroscio's view In *Urban America Reconsidered* he offers a timely response He urges a reconsideration of the two reigning orthodoxies in urban studies regime theory which provides an understanding of governance in cities and liberal expansionism which advocates regional policies linking cities to surrounding suburbs Declaring both approaches to be insufficient and sometimes harmful Imbroscio illuminates another path for urban America remaking city economies via an array of local economic alternative development strategies or LEADS Notable LEADS include efforts to build community based development institutions worker owned firms publicly controlled businesses and webs of interdependent entrepreneurial enterprises Equally notable is the innovative use of urban development tools to generate indigenous stable and balanced growth in local economies *Urban America Reconsidered* makes a strong case for the LEADS approach for constructing progressive urban regimes and addressing America's deepest urban problems *Race, Poverty, and American Cities* John Charles Boger, Judith Welch Wegner,1996 Precise connections between race poverty and the condition of America's cities are drawn in this collection of seventeen essays Policymakers and scholars from a variety of disciplines analyze the plight of the urban poor since the riots of the 1960s and **The Economy** Neil L. Shumsky,2020-10-14 Volume 4 THE ECONOMY of the American Cities series This collection brings together more than 200 scholarly articles pertaining to the history and development of urban life in the United States during the past two centuries The selections in Volume 4 of the series concern the development of the urban economy since the early nineteenth century Three groups of articles each arranged chronologically deal with three basic sectors of the economy trade and commerce especially retailing manufacturing and industrialization and finance Individual articles address subjects as diverse as merchants and shopping malls flour milling and scientific management and the Chicago Board of Trade and redlining **Housing America** Randall G. Holcombe,2017-07-05 Housing policy not only affects all Americans quality of life but has a direct impact on their financial well being About 70 percent of

American households own their own homes and for most their homes represent the majority of their net worth Renters are affected by housing policy Even the small minority of Americans who are homeless are affected by housing policies specifically targeted to low income individuals The government's increasing involvement in housing markets fed by popular demand that government do something to address real problems of mortgage defaults and loans provides good reason to take a new look at the public sector in housing markets Crises in prime mortgage lending may lower the cost of housing but the poor and homeless cannot benefit because of increases in unemployment Even the private market is heavily regulated Government policies dictate whether people can build new housing on their land what type of housing they can build the terms allowed in rental contracts and much more This volume considers the effects of government housing policies and what can be done to make them work better It shows that many problems are the result of government rules and regulations Even in a time of foreclosures the market can still do a crucial job of allocating resources just as it does in other markets Consequently the appropriate policy response may well be to significantly reduce not increase government presence in housing markets

Housing America is a courageous and comprehensive effort to examine housing policies in the United States and to show how such policies affect the housing market *Remaking American Communities* David C. Soule, 2007-11-01 Urban sprawl has gained much national attention in recent years Sprawl involves not only land use issues but also legal political and social concerns It affects our schools the environment and race relations Comprehensive enough for high school students and also appropriate for college undergraduates *Remaking American Communities* delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem including Robert Yaro president of the Regional Plan Association Other cutting edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce views about race and class by former mayor of Albuquerque David Rusk and a discussion of transportation dynamics by Curtis Johnson president of the CitiStates Group The essays in this collection explore the core issues of sprawl and the agenda for dealing with it Complete with a glossary resources and contact information for smart growth alliances this book is extremely user friendly David C Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue **Planning, Current Literature** ,1970 **American Studies** Jack Salzman, American Studies Association, 1986-08-29 A major three volume bibliography including an additional supplement of an annotated listing of American Studies monographs published between 1900 and 1988 *Clearinghouse Review* ,1974 **School Desegregation in Metropolitan Areas** ,1977 **The Fall and Rise of Freedom of Contract** F. H. Buckley, 1999-08-27 Declared dead some twenty five years ago the idea of freedom of contract has enjoyed a remarkable intellectual revival In *The Fall and Rise of Freedom of Contract* leading scholars in the fields of contract law and law and economics analyze the new interest in bargaining freedom The 1970s was a decade of regulatory triumphalism in North America marked by a surge in consumer securities and environmental regulation Legal scholars predicted the death of

contract and its replacement by regulation and reliance based theories of liability. Instead we have witnessed the reemergence of free bargaining norms. This revival can be attributed to the rise of law and economics which laid bare the intellectual failure of anticontractarian theories. Scholars in this school note that consumers are not as helpless as they have been made out to be and that intrusive legal rules meant ostensibly to help them often leave them worse off. Contract law principles have also been very robust in areas far afield from traditional contract law and the essays in this volume consider how free bargaining rights might reasonably be extended in tort, property, land use, planning, bankruptcy and divorce and family law. This book will be of particular interest to legal scholars and specialists in contract law. Economics and public policy planners will also be challenged by its novel arguments.

Transforming Race and Class in Suburbia T. Vicino, 2008-06-09. Just as the nation witnessed the widespread decay of urban centers, there is a mounting suburban crisis in first tier suburbs, the early suburbs to develop in metropolitan America. These places, once the bastion of a large middle class, have matured and experienced three decades of social and economic decline. In the first comprehensive analysis of suburban decline for an entire region, Vicino uses Baltimore as an illustrative case to chronicle how first tier suburbs experienced widespread decline while outer suburbs flourished since the 1970s. At the brink of the twenty first century, Vicino illustrates how the processes of deindustrialization, racial diversity and class segregation have shaped the evolution of suburban decline.

The New Urban Reality Paul E. Peterson, 2001-06-07. America's inner cities, particularly those in older industrial metropolitan areas, have declined sharply in both population and employment over the past two decades. How much of this change is due to technological advances in transportation, communication and manufacturing? How much of it is due to the changing racial composition of the central cities? Can any set of public policies retard or reverse the decline of the industrial cities? This book presents an interdisciplinary collection of papers addressing these questions. In the introduction, editor Paul E. Peterson discusses the ways in which adverse economic and racial changes interact and urges more realistic federal policies to counteract these changes.

In Part I, "The Processes of Urban Growth and Decline," sociologist John D. Kasarda analyzes the growing mismatch between inner city jobs and residents and geographer Brian J. L. Berry discusses the economics of inner city gentrification. Racial change is the subject of Part II. Sociologist Elijah Anderson depicts race relations in a gentrifying inner city neighborhood. Sociologist William J. Wilson delineates the social and economic problems of inner city blacks and political scientist Gary Orfield calls for bold efforts to reverse the continuing

urban pattern of racial segregation Part III looks at the way cities have responded to economic and racial change Economist Kenneth A Small discusses the impact of transportation policy political scientist Herbert Jacob finds that increasing efforts to control urban crime have not been effective and sociologist Terry Nichols Clark emphasizes the effect of political factors on the fiscal condition of cities Economist Anthony Downs reviewing the issues raised by the other authors sees little hope for racial integration as the central social strategy for solving urban problems but does see hope in the internal resources of America's minority communities

Resources for Housing, 1976 **Diversity in America** Peter H. Schuck, 2003

America is the first society in history to make ethnic racial diversity an affirmative social ideal rather than viewing it as a fearful menace as almost all other societies still do Since the 1960s America has pursued this ideal in many forms not only to remedy past discrimination against minorities but also to increase diversity for its own sake It is high time for an accounting How diverse are we now and what can we expect in the future Why do we unlike the rest of the world think that diversity is desirable and that more of it is better What risks does diversity pose What are the roles of law politics and informal social controls in promoting diversity How can we manage diversity better In this magisterial book Peter H Schuck explains how Americans have understood diversity how we came to embrace it how the government regulates it now and how we can do better He mobilizes a wealth of conceptual historical legal political and sociological analysis to argue that diversity is best managed not by the government but by families ethnic groups religious communities employers voluntary organizations and other civil society institutions Analyzing some of the most controversial policy arenas where politics and diversity intersect immigration multiculturalism language affirmative action residential neighborhoods religious practices faith based social services and school choice Schuck reveals the conflicts trade offs and ironies entailed by our commitment to the diversity ideal He concludes with recommendations to help us manage the challenge of diversity in the future

The Affordable Housing Reader Elizabeth Mueller, J. Rosie Tighe, 2022-07-14 This second edition of The Affordable Housing Reader provides context for current discussions surrounding housing policy emphasizing the values and assumptions underlying debates over strategies for ameliorating housing problems experienced by low income residents and communities of color The authors highlighted in this updated volume address themes central to housing as an area of social policy and to understanding its particular meaning in the United States These include the long history of racial exclusion and the role that public policy has played in racializing access to decent housing and well serviced neighborhoods the tension between the economic and social goals of housing policy and the role that housing plays in various aspects of the lives of low and moderate income residents Scholarship and the COVID 19 pandemic are raising awareness of the link between access to adequate housing and other rights and opportunities This timely reader focuses attention on the results of past efforts and on the urgency of reframing the conversation It is both an exciting time to teach students about the evolution of United States housing policy and a challenging time to discuss what policymakers or practitioners can do to effect positive change This

reader is aimed at students professors researchers and professionals of housing policy public policy and city planning
